## Course Credit

### Continuing Dental Education Credits: 7

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP

**FEATURING:**  
DR. RICARDO MITRANI, DDS, MSD  
**27th Annual Handelman Conference: TERMINAL DENTITION... Quo Vadis?**

The conference will be held at:

**DoubleTree Hotel**  
1111 Jefferson Rd.  
Rochester, NY 14623  
Friday, May 03, 2024  
8:00 am - 5:00 pm

**Dr. Ricardo Mitrani,  
DDS, MSD**

## Learning Objectives

- Review a treatment planning algorithm that facilitates the assessment of the remaining dentition.
- Review a simple Classification (LTR Classification) that helps identify the patient's condition and therefore decide the ideal treatment design for each patient.
- Improve communication among the members of the dental team.

### Corporate Grants

The following organizations have generously provided unrestricted educational grants in support of the Handelman Conference:

## TERMINAL DENTITION... Quo Vadis? Educational Objectives

For more than a decade, the term "Terminal Dentition" has unquestionably gained traction in the dental community and implies that there is a need to remove a patient's remaining dentition. But how do we reach such a conclusion? Does it mean the same to everyone? The reality is that the term Terminal Dentition is actually a "dentist-made term." At present, among dental practitioners, the ideal Prosthodontic solutions for this segment of the population are controversial.

This presentation will include a discussion on a linear algorithm that allows the treating team to decide when to give up hope on the remaining dentition and provides a classification system that will help evaluate the available restorative possibilities.

Dr. Mitrani received his DDS degree from the Unitec University In México City, a certificate in Prosthodontics as well as a Master of Science in Dentistry from the University of Washington, where he served as the Assistant Director of the Graduate Prosthodontic Program in 2001. He currently holds an academic affiliation at the University of Washington, and is a resident faculty member at SPEAR Education in Scottsdale, Arizona. He is a member of several organizations, including the American Academy of Esthetic Dentistry and the American Academy of Restorative Dentistry. He is on the editorial boards of the Journal of Esthetic and Restorative Dentistry (JERD), The Journal of Cosmetic Dentistry (JCD), Compendium, and is the Executive Director of Spear Digest. Dr. Mitrani has authored numerous scientific publications and chapters in textbooks in the fields of Implant Prosthodontics and Aesthetic Dentistry. Dr. Mitrani has given over 600 lectures around the globe and maintains a private practice limited to Prosthodontics, Implants and Aesthetic Dentistry in Mexico City.
