

Golisano Children's Hospital at Strong is a children's hospital within a hospital, providing inpatient and ambulatory care for more than 85,000 infants, children and adolescents annually.

In 1998 we started an annual tournament that allows us to raise money for a specific area of this hospital to benefit both the children and their families.

The cost for some simple comforts that we would want for our children cannot always be assumed by a hospital dedicated to the world-class medical and technological expertise Strong offers. With the participation of individuals like you, we can help the kids in ways overlooked when funds are distributed in the hospital's annual budget.

Please join us this year for a great day and help us help them!
