

Asthma Actions Plans on Hospital Discharge

Background: It is important to provide asthma education to patients and families to help prevent symptoms and treat them when they occur.

Initiative: To provide a printed, personalized Asthma Action Plan to inpatients with asthma in addition to routine discharge instructions.

Goal: Our goal for 2012 was to provide Asthma Action Plans to at least 85% of our patients with asthma discharged from the hospital.

Outcome: We exceeded our goal by providing Asthma Action Plans to 89.5% of our patients with asthma.
