# Community Attitudes about Research: 2019 Survey Results 

Ann Dozier, PhD<br>Carrie Dykes, PhD<br>Cody Gardner, MBA

University of Rochester Clinical and Translational Science Institute

## Recruitment Locations 2019 Survey

## Community-Based Agencies

Rochester Area Task Force on AIDS
CTSI Community Advisory Council

## Races/Walks for a Cause

Strollin' for the Colon 5 k
Tour De Cure bicycle and foot race

## Farmers Markets

Pittsford Farmers Market
Westside Farmers Market
Rochester Public Market*

## Festivals

Clarissa St Reunion
Summer Soul Fest*
Puerto Rican Festival*
Black Pride
Clothesline Festival at MAG

## Community Events

Speak Life! Health Equity Conference
Men's Health Day at Locust Hill Country Club
Parsells Ave Health Fair*
"March for Science" at Lyell Ave Library

## Street Outreach

Susan B. Anthony Neighborhood
Ontario Beach Park

## Social Media

Shared across CTSI social media channels
Paid Facebook/Instagram Advertising**

[^0]** $31 \%$ of all surveys completed via this method

## Demographics ( $\mathrm{N}=637$ )

| Demographic |  | Number (\%) | Demographic |  | Number (\%) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Gender | Woman | 352 (55) | Ethnicity | Not Hispanic | 417 (65) |
|  | Man | 179 (28) |  | Hispanic/Latino | 57 (9) |
|  | Other | 9 (1) | Language | English | 505 (79) |
| Age | 18-34 | 191 (30) |  | Spanish | 15 (2) |
|  | 35-64 | 256 (40) |  | Other (ASL, Arabic, French, USA) | 16 (3) |
|  | 65+ | 91 (14) | Education | Graduate School | 149 (23) |
| Sexual Orientation | Heterosexual | 435 (68) |  | University Graduate or 4-yr degree |  |
|  |  |  |  |  | 148 (23) |
|  | Gay or Lesbian | 43 (7) |  | Some College or 2-yr degree | 148 (23) |
|  | Bisexual | 35 (5) |  | High School or GED | 76 (12) |
|  | Other | 16 (3) |  | Some High School | 15 (2) |
| Race | White | 337 (53) |  | $8^{\text {th }}$ grade or less | 3 (<1) |
|  | Black or AA | 126 (20) | Zip Code | NYS | 297 (47) |
|  | Asian | 34 (5) |  | City of Rochester | 173 (27) |
|  | Not Listed | 28 (4) |  | Outside NYS | 67 (11) |
|  | A. Indian or A. Native | 12 (2) |  |  |  |
|  | N. Hawaiian or other P. Is. | $2(<1)$ |  |  |  |

## Research Experience 2019 Survey

- $47 \%$ of respondents have never been asked to participate in a research study
- 38\% said they did participate
- $15 \%$ were unsure or left the question blank
- $26 \%$ declined participation in a research study
- 74\% said they had seen a research advertisement in the past

## 26\% said they declined to participate in a research study

| Reason | $\%(\mathrm{~N}=163)$ |
| :--- | :--- |
| Too many risks | 32 |
| Did not qualify | 28 |
| Not enough time | 28 |
| Not interested | 17 |
| Other | 13 |
| Not enough money | 12 |
| Too afraid | 12 |
| No Benefit | 10 |
| Lack of Transportation | 9 |

## Opinions about Clinical Research

| Below are 10 statements. Mark the box that best describes YOUR OPINION. | Strongly Disagree | Disagree | Agree | Strongly Agree |
| :---: | :---: | :---: | :---: | :---: |
| In my opinion, clinical research is valuable. |  |  |  |  |
| The results of clinical research studies are worth learning about. |  |  |  |  |
| The organization running the research influences my decision to participate in clinical research. |  |  |  |  |
| I am willing to participate in clinical research at this time or in the future. |  |  |  |  |
| I trust the way clinical research is run in Rochester. |  |  |  |  |
| Among my friends or coworkers, there is a positive attitude towards clinical research. |  |  |  |  |
| In my opinion, Blacks and Latinos are asked to be in studies with greater risk. |  |  |  |  |
| If a member of my family was asked to participate in a clinical research study, I am likely to encourage them. |  |  |  |  |
| In my opinion, clinical research is safe. |  |  |  |  |
| The results of clinical research can benefit me or my family. |  |  |  |  |

2019 Survey ( $\mathrm{n}=637$ )

## Opinions

## 2019 Survey

- 84-97\% gave positive responses (Agree or Strongly Agree)
- In my opinion, clinical research is valuable.
- The results of clinical research studies are worth learning about.
- The organization running the research influences my decision to participate in clinical research.
- I am willing to participate in clinical research at this time or in the future.
- I trust the way clinical research is run in Rochester.
- Among my friends or coworkers, there is a positive attitude towards clinical research.
- If a member of my family was asked to participate in a clinical research study, I am likely to encourage them.
- In my opinion, clinical research is safe.
- The results of clinical research can benefit me or my family.
- $43 \%$ gave positive responses (Agree or Strongly Agree)
- In my opinion, Blacks and Latinos are asked to be in studies with greater risk.

## Motivators

| There are many reasons people participate in clinical research studies. <br> In thinking about whether to join a clinical research study, how <br> important are the following considerations to you? | Not at all <br> important | Slightly <br> important | Moderately <br> important |
| :--- | :--- | :--- | :--- |
| You would get paid | Very <br> important |  |  |
| You are curious about the research study |  |  |  |
| You or someone you care about had or has the disease being studied |  |  |  |
| It might improve your own health |  |  |  |
| You would receive some medical care at no cost |  |  |  |
| It might benefit my community |  |  |  |
| It might help improve medical care for future generations |  |  |  |

How important are the following considerations to you?
SCORE Response ( $\mathrm{n}=79$ )

How important are the following considerations to you?

## Motivators

|  | \% that selected <br> Moderately Important or <br> Very Important |
| :--- | :--- |
| It might help improve medical care for future <br> generations | 91 |$|$| It might benefit my community | 88 |
| :--- | :--- |
| It might improve your own health | 88 |
| You or someone you care about had or has the <br> disease being studied | 83 |
| You are curious about the research study | 82 |
| You would receive some medical care at no <br> cost | 73 |
| You would get paid | 69 |

## Type of Research Activity

| How likely are you to participate in clinical research if you had to: | Not at all | A little | Somewhat | Very |
| :--- | :--- | :--- | :--- | :--- |
| Answer questions about your health, such as about your exercise routines, nutrition, or stress |  |  |  |  |
| Let a researcher review your medical records |  |  |  |  |
| Wear a health monitoring device (like a Fitbit) |  |  |  |  |
| Have your blood drawn |  |  |  |  |
| Give a saliva sample |  |  |  |  |
| Get a cheek swab (to collect your DNA) |  |  |  |  |
| Allow your genetic information (DNA) to be used for research |  |  |  |  |
| Take part in an exercise program |  |  |  |  |
| Take medicine |  |  |  |  |
| Try out a new piece of medical equipment or device |  |  |  |  |
| Get an injection (a shot) |  |  |  |  |

How likely are you to participate in clinical research if you had to...
SCORE Response ( $\mathrm{n}=79$ )

## Demographic Comparisons

- Men vs Women
- Age
- 18-34, 35-64, 65+
- Education
- Zip code
- City vs Non-city
- Ethnicity
- Race
- Chi-square analysis was used to calculate p values

## Men vs Women

| \% of Respondents | Women | Men | P value |
| :--- | :--- | :--- | :--- | :--- |
|  | answering moderately important or very <br> important |  |  |
| Motivator-receive medical care at no cost | 76 | 69 | 0.0048 |
|  | answering somewhat or very |  |  |
| Research activity- review medical record | 75 | 84 | 0.0252 |
| Research activity- blood drawn | 76 | 87 | 0.0127 |
| Research activity- saliva | 79 | 88 | 0.0183 |
| Research activity- check swab | 74 | 82 | 0.0447 |
| Research activity- genetic info | 67 | 70 | 0.0185 |
| Research activity- take medication | 49 | 60 | 0.0289 |
| Research activity- medical device | 70 | 85 | 0.0008 |
| Research activity- injection | 44 | 60 | $<0.0001$ |
|  |  |  |  |

## Age

| \% of Respondents | $18-34$ | $35-64$ | $65+$ | P value |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | answering agree or strongly agree |  |  |  |
| Opinion-Black asked to participate in <br> riskier studies | 50 | 41 | 33 | 0.0414 |
|  |  |  |  |  |
| Research activity- blood sample | 73 | 81 | 90 | 0.0003 |
| Research activity- genetic info | 57 | 70 | 78 | 0.0005 |
| Research activity- take medication | 43 | 55 | 71 | 0.0004 |
| Research activity-get injection | 38 | 53 | 62 | 0.0004 |
|  | answering moderately important or very |  |  |  |
| important |  |  |  |  |

## Level of Education

## Zip Code

People in the city were more often motivated to participate in a research study if they received medical care at no costs ( $82 \%$ of city vs. $72 \%$ of non-city; $p=0.0364$ ).

## 14605, 14606, 14607, 14608, 14609, 14611, 14613, 14619, 14621

## Ethnicity

| \% of Respondents answering <br> Agree or Strongly Agree | Hispanic | Non-Hispanic | P value |
| :--- | :--- | :--- | :--- |
| Opinion- Research is valuable | 89 | 99 | 0.0025 |
| Opinion- trust | 84 | 93 | 0.0050 |
| Opinion- Encourage family <br> member | 82 | 87 | 0.0272 |
| Opinion- Likely to participate | 77 | 88 | 0.0486 |
| Opinion- safe | 86 | 88 | 0.0270 |
| Opinion- benefit me or my family | 90 | 97 | 0.0435 |

No significant differences in motivators or research activities.

## Race- Opinions

| \% of Respondents <br> answering Agree or <br> Strongly Agree | People of Color | White | P value |
| :--- | :--- | :--- | :--- |
| Trust | 85 | 96 | $<0.0001$ |
| Blacks greater risk studies | 53 | 36 | $<0.0001$ |
| Encourage family member | 78 | 91 | $<0.0001$ |
| Benefit them or family | 92 | 98 | $<0.0001$ |

Other significant differences where people of color responded less positively were research is valuable, results of research are worth learning about, organization running research, among friends and coworkers there is a positive attitude about research, research is safe.

## Race- Motivators

| \% of respondents answering <br> moderately important or very <br> important | People of Color | White | P value |
| :--- | :--- | :--- | :--- |
| Being paid | 75 | 66 | $<0.0001$ |
| Might benefit my community | 78 | 71 | $<0.0001$ |
| Improving care for future <br> generations | 85 | 96 | $<0.0001$ |
| Receive medical care at no cost | 84 | 93 | 0.0027 |
| You or someone has the disease | 79 | 88 | 0.0159 |

## Race- research activities

People of color were less likely to participate regardless of the type of research activity except for taking part in an exercise program.

## Does motivator affect research activity?

How important is "You would get paid" if you participate in a study vs. How likely are you to participate in a study if you had to...
$\square$ Answer questions about your health, such as about your exercise routines, nutrition, or stress

- Let a researcher review your medical records
90.00\% Wear a health monitoring device (like a Fitbit)
- Have your blood drawn
- Give a saliva sample
80.00\% Get a cheek swab (to collect your DNA)

■ Allow your genetic information (DNA) to be used for research
$\square$ Take part in an exercise program
■ Take medicine
$\square$ Try out a new piece of medical equipment or device
60.00\% ■Get an injection (a shot)

How important is "You are curious about the research study" if you participate in a study vs. How likely are you to participate in a study if you had to...

| 100.00\% | $\square$ Answer questions about your health, such as about your exercise routines, nutrition, or stress |
| :---: | :---: |
|  | $\square$ Let a researcher review your medical records |
|  | - Wear a health monitoring device (like a Fitbit) |
| 90.00\% | - Have your blood drawn |
|  | $\square$ Give a saliva sample |
|  | $\square$ Get a cheek swab (to collect your DNA) |
| 80.00\% | - Allow your genetic information (DNA) to be used for research |
|  | Take part in an exercise program |
|  | $\square$ Take medicine |
| 70.00\% | ■ Try out a new piece of medical equipment or device |
|  | ■ Get an injection (a shot) |

60.00\%

## Conclusions

Research viewed positively in general.
People of color still have concerns about riskier studies.
Younger adults and people of color are less likely to participate.
Altruism is a strong motivator.
Compensation should be considered for younger people and people of color.
People are less likely to participate in studies with riskier methods.

## Future work

Multivariate analyses
Compare 2019 data to 2008 and 2010
