Ambulatory Services

Abdominal Imaging Advanced Practice Provider, within the department of Imaging Sciences (251446)

FT position available, Monday - Friday.

The Abdominal Imaging Advanced Practice Provider (AI APP) is responsible for providing competent medical care in accordance with the professional scope of practice and current State of New York Regulatory Statutes. The position is designed to be onsite-at SMH. There is future potential for reading at other affiliated sites covered by the Abdominal Imaging Division. As an AI APP, you will be expected to become proficient in the full spectrum of Abdominal Imaging applications to problem solving for diagnostic challenges affecting the GI System and GU System, Vascular System and other body systems found in the abdomen and pelvis. Problem solving will include providing guidance to clinicians in the planning/selection of studies and review of studies after completion. The timeline for proficiency will vary depending upon the candidate's prior scope of practice. Examination reviews are in conjunction with interpretation with the supervision of a licensed Radiologist. Our patient population includes ED patients, inpatients, and outpatients. Exam preparation encompasses the planning and protocolling of studies followed by real time review of imaging, especially for acutely ill patients. AI APPs are educated to become proficient in rapid response assessment and treatment of patients with contrast reactions. The AI APP collaborates with all members of the Imaging Sciences team in the promotion and provision of our common goals of optimizing patient care. The AI APP will participate in the education of learners (students and new employees) using clinical learning experiences, knowledge, sharing and skill training. Key characteristics for a practitioner in these roles include an ability to work independently and in the framework of a team. The ability to meet the intellectual and physical challenges of this rewarding position are key elements of the success of our team efforts. **QUALIFICATIONS:** Current New York State License as a Physician Assistant or Nurse Practitioner. Current RT license or eligibility not required but a plus. 3-5 years minimum practice experience. Radiology experience not required.

Available Positions

ENT - Outpatient Otolaryngology - Nurse Practitioner/Physician Assistant ,opportunities available at Rochester, Geneseo, and Canandaigua (251843)

FT position available (40 hours), daytime hours, no weekends or call

This is an exciting opportunity for an experienced NP/PA to join our team, working in an interdisciplinary otolaryngology office that integrates education and clinical care. Responsibilities will include diagnosing and treating patients with a variety of acute otorhinolaryngologic problems. Opportunity to learn/complete many in-office procedures. This position is suited for a self-motivated NP/PA who possesses strong organization, effective communication, and critical thinking skills. Must be a team player but also feel comfortable seeing patients independently. Will direct bill for services. Past experience in urgent care, ED, and/or ENT highly preferred. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training. Requirement: Current certification through NYS as an NP/PA. Ability to meet productivity targets.

Employee Health - Strong Memorial Hospital - Nurse Practitioner (251087)

Full time position—M-F daytime hours 4 10 hour days a possibility after orientation

Unique, challenging opportunity to provide Employee Health onboarding services as well as evaluation and treatment of workplace-related injuries and illness for healthcare workers. Become a member of a collaborative team that provides care based upon evidence-based practice and NYS Workers Compensation treatment guidelines. Responsibilities include onboarding physical exams, treatment for blood borne pathogen exposures, work related contagion exposures, company requested evaluations, longitudinal treatment for work related injuries and illnesses: medication management, ordering and interpreting diagnostic tests, referrals for treatments-physical therapy, chiropractic treatment, referral to specialists and disability evaluations. Many opportunities for patients, employer and staff education. Work independently. Collaborate as needed with network-based physicians. Excellent communication and collaboration skills. Ability to work in a team environment. Independent judgement and critical thinking. An NP with 2 or more years of adult NP experience is preferred, new graduates will be considered. An NP orientation program is available for all new hires. Credentials: NYS NP licensure and AANP/ANCC national certification is required prior to start date.

Primary Care Network (Bushnell's Basin Family Medicine & Med-Peds) - Nurse Practitioner/Physician Assistant (248941)

PT or FT position available. Monday – Friday, daytime hours.

Exciting opportunity for an experienced NP or PA to join a busy Family Medicine/Med-Peds practice and become part of an interdisciplinary team that provides patient care utilizing the Patient Centered Medical Home model. This is a fast-paced office in the Bushnell's Basin, NY area. The providers care for newborns, children, teenagers, and adults across all ages and medical issues. Responsibilities include: evaluation and management of acute/chronic illnesses, ordering/interpreting/communicating diagnostic tests and results, complete physical exams, Wellness visits, hospital/ED follow-ups and Transitional Care Management, collaboration with network based physicians and medical team regarding

Available Positions

patient care, facilitating appropriate referrals to specialists or community-based agencies, opportunities for office based procedures, and patient education/counseling intended to maintain or restore physical/emotional health and function, and educational support for various learners consistent with the goals of the UR teaching institution. Ultimately, the APP will have the opportunity to establish a team supported patient panel. Excellent communication and collaboration skills are essential with the ability to exercise independent judgement and initiative. Only APPs with greater than 2 years of active primary care clinical practice are being considered at this time. An APP mentoring program is available for all new hires along with thoughtful onboarding. The candidate must possess NYS NP/PA certification along with licensure and have applied for DEA registration prior to hire/start date.

Primary Care Network (Hornell/Bath NY) - Nurse Practitioner/Physician Assistant (250288)

FT position available, M-F, 40hrs per week, daytime hours.

Exciting opportunity to join a busy Family Medicine medical practice in the Hornell & Bath, NY area and become part of an interdisciplinary team that provides patient care utilizing the Patient Centered Medical Home model. Responsibilities include: evaluation and management of acute/chronic illnesses, ordering/interpreting/communicating diagnostic tests and results, complete physical exams, Wellness visits, hospital/ED follow-ups and Transitional Care Management, collaboration with network based physicians and medical team regarding patient care, facilitating appropriate referrals to specialists or community-based agencies, opportunities for office based procedures, patient education/counseling intended to maintain or restore physical/emotional health and function, and educational support for various learners consistent with the goals of the UR teaching institution. Ultimately, the APP will have the opportunity to establish a team supported patient panel. Excellent communication and collaboration skills are essential with the ability to exercise independent judgement and initiative. The candidate must have completed NYS NP/PA certification along with licensure and have applied for DEA registration prior to hire/start date.

Urology - Geneseo- Nurse Practitioner/Physician Assistant (251775)

Location: GENESEO, NY FT position available. Monday-Friday. Ambulatory

Exciting opportunity to provide patient care in collaboration with members of the URMCM medical staff for clinical services in the Geneseo area. Population consists primarily of general urology. Adult Congenital Heart Center - Family Nurse Practitioner/Adult Gero - Nurse Practitioner/Physician Assistant (No Pediatric Nurse Practitioners) (248952)

Full Time position available (M-F, 40 hours per week, no holidays)

Exceptional opportunity to join our rapidly growing Adult Congenital Heart Disease program and be part of a multidisciplinary team committed to delivering top-tier care to adults with congenital heart disease. The selected candidate will offer professional consultations and direct patient care in inpatient and outpatient settings, complying with a multidisciplinary care model and established protocols. Your duties will encompass the evaluation and management of acute and chronic cardiac conditions, execution and interpretation of diagnostic tests, meticulous maintenance of patient records, facilitation of specialist referrals, performance of office-based procedures, and delivery of education to patients and families, all aligned

Available Positions

with our academic mission. We are searching for an experienced Advanced Practice Provider (APP) with a strong passion for cardiology and a commitment to lifelong care. While prior experience in cardiology is preferred, it is not mandatory. Essential qualifications include outstanding communication and organizational skills and proficiency in essential computer software such as Excel, Word, PowerPoint, etc. Required credentials include NYS NP/PA certification, National NP board certification, BLS, and ACLS. New hires will benefit from a comprehensive educational program and a thorough onboarding process. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Adult Inpatient Cardiac Surgery Step-Down - Nurse Practitioner/Physician Assistant (250691)

FT or PT position available , days and evenings, weekends and holidays per unit policy

Exciting opportunity to work in a well-established practice as part of a collaborative team providing care to pre- and post-operative patients within the Division of Cardiac Surgery. Our patient population includes those undergoing CABG, open valve or minimally invasive valve replacements/repairs (including TAVRs), and patients post-ECMO. Key job responsibilities include providing direct care, assessment, evaluation, and intervention on arrhythmia management, wound care, surgical follow-up, drain care, and medical optimization. Must have strong communication skills as this role collaborates closely with other members of the interdisciplinary team to achieve excellent patient outcomes both during hospitalization and after discharge. Familiarity with core measures and performance improvement commitment is required. NYS licensed (PA/NP), Master's degree required (ACNP preferred for NPs). Nationally certified or eligible for certification required. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Valve clinic/Structural heart team - Nurse Practitioner/Physician Assistant (252016)

Full time (40 hours), primarily days, no weekends

This is a great opportunity for an experienced cardiac APP to join the multi-disciplinary structural heart team. This adult population is undergoing evaluation and intervention of structural heart disease (some examples include aortic stenosis, mitral stenosis, hypertrophic cardiomyopathy, or closure of the left atrial appendage). Role involves both management and coordination of complex patient care. This role occurs in both the inpatient and outpatient settings. Other responsibilities include research and QA. It involves leading/coordinating new initiatives. This integral position will need an APP with cardiology experience and excellent communication, organizational and computer skills. Experience with the heart failure population is highly desired. This is a fast evolving field/department-therefore the right candidate will be flexible and innovative. In addition, there will be opportunities to precept students from various programs. Applicants must have 2-5 years recent relevant experience. Nurse practitioners must be NYS licensed and nationally certified. Physician assistants must have completed an AMA approved PA program, NYS licensure and national certification.

Available Positions

FT position available. Primarily days.

Exciting opportunity for motivated APP to work with an interdisciplinary team in the management of Neurosurgery patients. The Primary work location will be Strong Memorial Hospital, with occasional time spent at FFTH and RGH. Must

Available Positions

demonstrate a high level of clinical competence in the care of Neurosurgical patients. This position will include a majority of outpatient care of the neurosurgery patient. Strong communication skills required. Must be NYS NP/PA license and national certification. We strongly prefer an APP with experience caring for neurosurgical patients. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Pain Management - Neurosurgery - Nurse Practitioner/Physician Assistant (252014)

FT position available, Monday – Friday, office based practice

Opportunity to join our nationally recognized program which is focused on the treatment of acute and chronic pain in the setting of spinal disorders and neurological disease. This program was named a Clinical Center of Excellence by the American Pain Society in 2013, the only academic medical center program in the nation to earn designation that year. This candidate will join a multidisciplinary team that brings together clinicians from diverse specialties (nursing, neurology, neurosurgery, anesthesiology, radiology). Patients with chronic nerve injury pain due to spinal disease, peripheral nerve trauma, trigeminal neuralgia, and neuropathies are the focus of this rapidly growing collaboration with leading institutions across the region. Experienced APP desired with proven clinical skills. Experience in Pain Management, Neurology and Neurosurgery desired. Practice is based in Rochester. Referral triage, telephone management, and participation in research activities will account for approximately 15% of professional time. Outpatient patient management responsibilities include new and follow up visits including procedures, with a team of Pain Management Specialists. Occasional call for collaborating physician. Candidates must have excellent organizational and communication skills. National Certification required. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

URMC Comprehensive Sleep Center @ South Clinton Avenue - Nurse Practitioner/Physician Assistant (251707)

FT position available, Monday to Friday Days, no weekends or holidays and no call responsibilities. Primary office location is Brighton with secondary offices in Brockport and Canandaigua (on occasion).

We are looking for an APP to help with our ever-increasing clinical need at the adult URM Comprehensive Sleep Center. The focus of this job will be to improve access for patients and provide excellent clinical care in collaboration with our multidisciplinary team. Our practice has a focus on education and research with opportunities to participate in academic activities including monthly complex cases conference and journal club as well as annual conferences. The APP will be responsible for direct patient care, documentation of care delivered, adherence to hospital and nursing policies, procedures and practice standards, education of patients and staff, assurance of service excellence, completion of state and hospital-required reviews of practice, and participation in performance improvement and other activities as required. Responsibilities include: Strong organizational skills, communication skills, and flexibility are needed. In time, the APP will be expected to see established patients in an unsupervised capacity and some new patients with the guidance of attending physicians. This includes diagnosing, evaluating, and managing sleep conditions. Documents pertinent elements in electronic patient

Available Positions

records. Prescribes and monitors controlled medications, orders procedures as appropriate, and manages PAP therapy with other health team members. Instructs and educates patients in collaboration with other health team members (registered nurse, sleep technologist, respiratory therapists, and attending faculty). Telephone/EMR follow up communications as required. Participates in quality assurance/ quality improvement initiatives. Qualifications: Accredited Nurse Practitioner/Physician Assistant Program required. Previous experience in ambulatory health care setting preferred. Clinical competence in a mix of well, acute, and chronic patients. NP Certification/Registers Physician Assistant, NYC license, DEA license

OB/GYN Department

GYN and Chronic Pain - Nurse Practitioner/Physician Assistant (251867)

40 hours

Exciting opportunity for an experienced advanced practice provider to work in collaboration with a multidisciplinary team in the provision of clinical care, for patients with gynecologic needs including chronic pelvic pain at the Adult Pelvic Health and Center for Advanced Laparoscopic Surgery office. The APP will work with our minimally invasive surgeons in caring for patients with chronic pelvic pain needs including endometriosis, pelvic floor dysfunction, pelvic congestion syndrome, and other chronic pelvic pain concerns, in addition to providing routine gynecology care. The APP as part of the multidisciplinary team provides direct patient care and management, in-basket management, follow-up and education for patients. Candidates must have excellent communication skills, self-motivation for on-going learning, flexibility, interest in quality improvement, and teamwork experience. Prior experience or exposure to managing chronic pain, and experience in gynecology is highly desired. No new graduates. Experienced APPs only due to high level of autonomy. Candidates must be NYS NP, PA or CNM licensed/license eligible, and eligible for certification. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

High Risk Obstetrics/Maternal - Fetal Medicine - Nurse Practitioner/Physician Assistant or Certified Nurse Midwife (251444)

PT position, 28 hours (eligible candidates who are interested in part-time positions are also encouraged to apply, further details will be provided after applications are reviewed)

Exciting opportunity for an advanced practice provider (APP) to work in collaboration with Maternal-Fetal Medicine (MFM) Faculty and other APPs in provision of clinical care for patients with complex obstetric needs. The position would focus on the pregnancy care of high-risk obstetric patient population. MFM offices are located at Lattimore Road and Red Creek Drive. There are multiple specialty areas and focuses within these offices, including prenatal care and consultations, as well as the Diabetes in Pregnancy program (DiPP), the pregnancy loss clinic, and genetics clinic. The APP as part of the MFM multidisciplinary team provides direct patient care and management, in-basket management, follow up and education for complex Maternal-Fetal Medicine patients. Learners including fellows, residents, APP students, and medical students rotate through these offices. APPs are expected to aid in multidisciplinary care management for all patients in the practices, including coverage of electronic/phone-based patient questions, result and order follow-up, regional care coordination, and

Available Positions

participation in delivery care planning teams. Cross-coverage and support of the MFM APP cohort would be expected.

Candidates must have excellent communication skills, self-motivation for on-going learning, flexibility and teamwork experience. While work is supported by MFM faculty, who are available at all times, the candidate would need to be able to work independently to see and support patients. Candidates must be NYS NP, PA, or CNM licensed, and eligible for certification. Shifts include daily patient visits and care management, with a minimum of 8 sessions/week. While not required, fetal monitoring experience, perinatal loss certification, nutritionist degree, diabetes experience/certifications, and/or IBCLC certifications would be welcome, as would bilingual skills (any language).

Orthopaedic Services

Orthopaedic / Sports Division - Nurse Practitioner/ Physician Assistant (251326)

FT position available, primarily days.

The orthopedic position is focused on sports and work-related injuries. The APP will join a collective group of orthopedic surgeons and APPs, providing patient care in the ambulatory care setting. The APP will care for patients with traumatic and degenerative knee and shoulder conditions, patients requiring shoulder reconstruction and replacement, and sports and work related injuries. The APP will work at our offices located at the new orthopedic ambulatory clinic in Henrietta and our location in Brockport. Strong communication and clinical skills required. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Orthopaedic Inpatient/Outpatient Canandaigua/FFT - Nurse Practitioner/Physician Assistant (251281)

FT/PT position available, primarily days with some evenings/weekends.

Experienced APP needed for busy practice involving orthopedic care in Canandaigua. The position is a wonderful blend of ED consults, OR work and clinic-based follow-up. The APP will be part of the orthopedic group working in Canandaigua, closely aligned to the surgeons. There is significant independent work, therefore the APP must have orthopedic experience. Specifically, the APP will work in FFT hospital covering orthopedic consults in the ED, OR work, and outpatient clinic time at our new Canandaigua office. The APP should be comfortable with fracture reduction and management, nail bed/lac repairs, and be comfortable working independently. The successful candidate will join other APPs in a professionally rewarding environment - clinically challenging with tremendous opportunities for advancing skills. Candidate must possess excellent communication skills and a willingness to learn new skills. Prior NP/PA experience required, with preferred orthopedic experience. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Orthopedic Department Trauma Division - Nurse Practitioner/Physician Assistant (251538)

FT position available, primarily days. Weekends and evenings as required.

. Work collaboratively with busy orthopedic trauma service and all members of the health care team at our new Orthopedic

Available Positions

Center at Marketplace Mall. Applicant will provide high quality care to outpatient orthopedic trauma patients including ED follow-ups and post-op patients. Prior APP experience or orthopedic experience preferred, as APP will primarily work independently. Strong communication and clinical skills required. Must be eligible for billing. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Psychiatric Department

Comprehensive Psychiatric Emergency Program (CPEP) - Psychiatric Nurse Practitioner

Available Positions

(251540)

Full Time positions available, day/night rotation and rotating weekends and holidays. No on-call responsibilities.

The Psychiatric Nurse Practitioner working in the Comprehensive Psychiatric Emergency Program will provide psychiatric evaluations and assessments, interventions and disposition planning for patients who present to the emergency room with urgent psychiatric mental health needs. The Psychiatric Nurse Practitioner will also be responsible for conducting consults for patients in the medical ED. The Psychiatric Nurse Practitioner will have accessibility to psychiatrist consultation within a dynamic multidisciplinary team. Strong communication, interpersonal and organizational skills a must. CPEP is a 24/7 service so the NP must also be flexible with scheduling needs of the service. The NP will also participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Qualifications: NYS Licensure as a Psychiatric Nurse Practitioner and ANCC Board Certification (certification required by end of first year of employment). Two years of experience as a psychiatric nurse practitioner in an acute clinical setting required.

Integrated Family/Adult Psychiatric Mental Health Nurse Practitioner (251741)

FT position available, M-F Days

We are seeking a highly skilled PMHNP to join our behavioral health team at Strong Internal Medicine (SIM). Part of the General Medicine Division at URMC, SIM's purpose is to help its diverse patients live full and healthy lives—and the practice is equipped to do so. An NCQA-recognized Patient-Centered Medical Home, SIM's highly team-based care model includes attending physicians, internal medicine residents, advanced practice providers, registered nurses, social workers, behavioral health providers, clinical pharmacists, registered dietitians, care managers, and administrative support. The PMHNP will play a crucial role in providing direct and consultative psychiatric mental health services to adult patients within our integrated primary care clinic. As an embedded member of our primary care team, you will collaborate with clinicians to identify high-risk patients with behavioral health and medical comorbidities, develop person-centered treatment plans, and ensure access to specialty psychiatric and substance use care as needed. You will also be part of the overall BH integration team at SIM, which is part of the Division of Collaborative Care in the Department of Psychiatry, and you will have access to a psychiatrist through that division for consultation and support. Responsibilities: - Conduct psychiatric diagnostic evaluations and provide psychopharmacology support for adult patients. - Serve as a resource for primary care providers, offering consultative support and brief warm handoff evaluations throughout the day. - Educate primary care residents, nurses, and other providers on mental health disorders and psychotropic medications through formal in-services and education sessions. Qualifications: - Licensed Psychiatric Nurse Practitioner in NYS with ANCC Certification. - DEA license required. - Minimum 2 years of experience as a psych NP; integrated care experience preferred. To apply, please submit your resume to Nursing Recruitment, Box 619-19. EOE Minorities/Females/Protected Veterans/Disabled.

Telepsychiatry/In-Person Consultation - Division of Geriatric Psychiatry - Psychiatric Nurse Practitioner (248302)

Full-time (40 hours)

Available Positions

The Psychiatric Nurse Practitioner will work in a supportive and collaborative telepsychiatry practice primarily serving patients in long-term care facilities with behavioral and/or mental health needs. This model is consultative in nature and has proven success through a multi-level systems approach including one-on-one telepsychiatry, Project ECHO and a nurse engagement specialist. This individual will provide psychiatric consultation via video communication for residents of long-term care facilities across New York State. The individual that occupies this position must have strong interpersonal and organizational skills, be flexible in nature to meet the needs of the resident/facility, utilize a collaborative approach to patient care as well as a desire to contribute to an evolving program. Function autonomously while conducting psychiatric evaluations and making psychotropic medication recommendations, including opportunities to simplify medication regimes. Support transition of individuals from psychiatric centers to nursing homes. Collaborate with healthcare providers, social workers, and nurses while providing psychoeducation to bolster use of nonpharmacological interventions. One day per week will be on-site at The Highlands at Brighton, caring for patients on the specialized Neurobehavioral Unit, which includes weekly, synchronous dialogue with the interprofessional team. Qualifications: ANCC Board Certification and NYS Licensure as a Psychiatric Nurse Practitioner. 3—5 years of geriatric experience preferred. The NP will also participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Surgical Department

Colorectal Surgery (Inpatient) - Nurse Practitioner/Physician Assistant (251932)

Full time position, primarily days with weekends and holidays as needed for the division of colorectal surgery.

Work in an empowering and collaborative relationship with surgeons within the Division of Colorectal Surgery, providing supportive and independent care to primarily inpatients under the care of Colorectal Surgery. Responsible for direct patient care, with opportunity to expand into the out-patient clinics. Required: adherence to hospital and nursing policies, procedures and practice standards, education of patient and staff, and assurance of service excellent. Candidate must possess communication, organizational and interpersonal skills. As well as a willingness to learn new skills and a firm team work ethic. Completion of a state and hospital required reviews of practice, participation in performance improvement and other activities as required. Must be NYS licensed. National certification is required, and if NP, if not currently certified must be done within three months. Prior surgical experience is preferred. Must be ANCC or ACNP Board Certified if NP and PAs are required completion of ARC-PA accredited PA program. Willing to train new graduates. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Colorectal Surgery - Ambulatory - Nurse Practitioner/Physician Assistant (251458)

Full-time position available. Monday – Friday with option for 4 (10 hour shifts)

Exciting opportunity to work collaboratively with our colorectal surgery team of surgeons, residents, advance practice providers (APP's) and secretarial staff to manage the colorectal surgery outpatient population. Candidate must possess strong communication skills, have a high level of clinical competency, demonstrate flexibility and have a firm team work

Available Positions

ethic. Will be working in our specialty clinics- colorectal anal physiology (CPC), anal- rectal disorders, and Inflammatory bowel disease (IBD) and colorectal cancer. Responsibilities will include assisting surgical attending providers with outpatient clinic management and run an independent clinical practice. Emphasis on evaluation, implementing a treatment plan and follow up care of the surgical patient from the preoperative phase through post hospital recovery. Must be New York State eligible for NP/PA certification for independent billing. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing, and skill training

General Surgery/Trauma - Nurse Practitioner/Physician Assistant (249057)

FT positions available. Primarily days and evenings, 10 hr shifts, weekends

Exciting position for a motivated NP/PA to participate in the management of patients admitted to the Trauma/EGS service. This NP/PA will work with other APPs in providing comprehensive clinical care to general surgery and trauma patients. Responsibilities will include daily clinical management, participation in interdisciplinary care, and developing programs consistent with service priorities. Prefer applicants with at least 3-5 years of experience, critical care, wound care or internal medicine background. Will consider new graduates. For NPs- RNFA experience preferred. The APP will participate in the education of learners (students and new employees), using clinical learning experiences, knowledge sharing and skill training.

Surgical APP Fellowship - Nurse Practitioner/Physician Assistant (249642)

FT, D/N, 8-12 hour shifts, weekends and holidays as needed

The Surgical APP Fellowship is an exciting opportunity for nurse practitioners and physician assistants to participate in a 1-year postgraduate specialty training. The intensive clinical fellowship includes a core program focusing on the care of the surgical patient with rotations through ambulatory and inpatient settings. Fellows will gain experience in several of the surgical subspecialties within the department of surgery within URM. In addition, there are several specialty training experiences to enhance the surgical APP fellow education which include both didactic and clinical experiences. Training methods include clinical immersion, didactic lectures and self-guided learning, and on-line and in person training modules. Qualifications: Nurse Practitioners require a Master's degree in Nursing, an active NYS licensure in good standing, and eligible for national certification. Physician Assistants require completion of an AMA approved Physician Assistant program, NYS licensure in good standing, and eligible national certification as a Registered Physician Assistant.
