

This link contains a number of programs for power analysis within a longitudinal and/or clustered data setting. The programs are developed in either SAS or Splus. The programs under “Programs and documentation” are developed for power analysis for each of the five examples in:

X.M. Tu, J. Zhang, J. Kowalski, J. Shults, C. Feng, W. Sun, W. Tang. [Power Analyses for Longitudinal Study Designs with Missing Data](#). Statistics in Medicine 2006, in press.
