

To turn off the Visual Text Box Editor

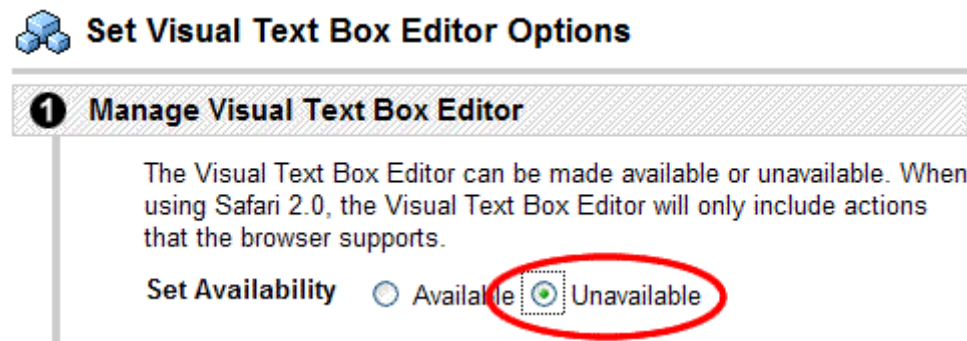

1. Login to Blackboard
2. Click on the “Personal Info” link under Quick Links

3. Select “Set Visual Text Box Editor Options”

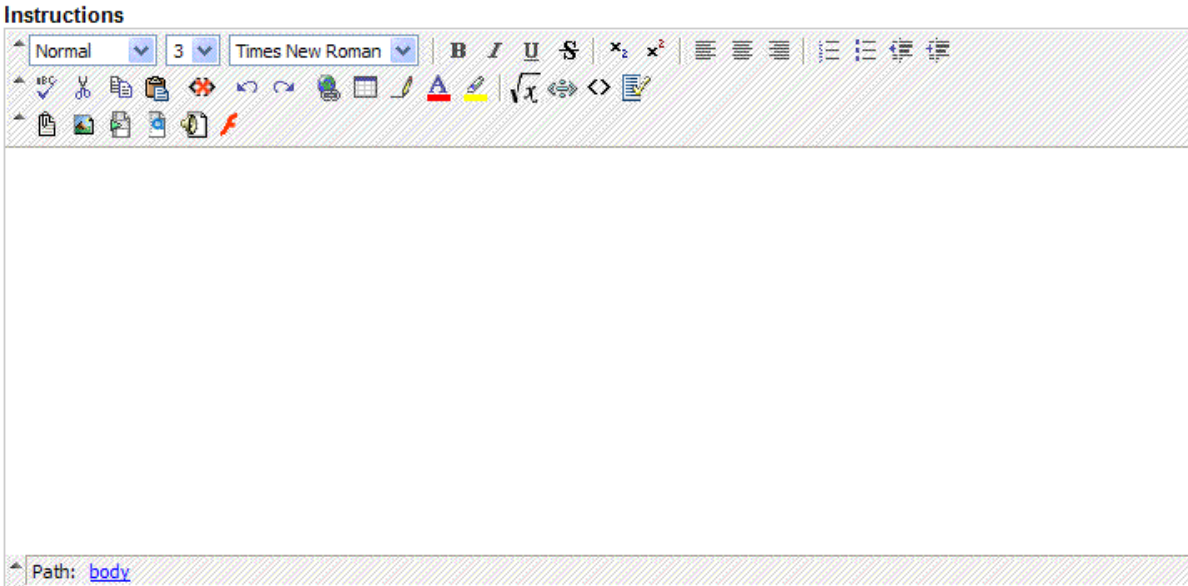

4. Select the “Unavailable” option

5. Submit

The Editors

The Visual Text Box Editor (a WYSIWYG editor), allows you to copy text from other applications and retain some of the formatting or it allows you to apply your own formatting using the tool bar options.

In the non WYSIWYG editor, you can select Smart Text mode and things like URL's will resolve into a clickable link. The Plain Text mode is like Notepad, there's no formatting. The HTML mode allows you to copy in html code and once viewed it will display as rendered.
