

Using *images.MD* for Class Materials

images.MD, an online encyclopedia of over 50,000 medical images ranging from allergy to urology, is now available on the **Miner Digital Library**. You can create your own image library to be used for teaching and study purposes. Images can be downloaded to your computer or converted to a PowerPoint slide show that will be emailed to you within an hour. All the text that accompanies the images can be edited or added to. Images from *images.MD* can be posted to Blackboard.

Creating PowerPoint Slide Sets from *images.MD*:

1. Register in order to use the My Slides feature
2. Create personal slide sets by selecting appropriate images and clicking on the “+” icon
3. Edit text if necessary by clicking on the “E” icon
4. When slide set is complete, click on Create PowerPoint Presentation.
Presentations containing up to 20 slides will be emailed to you for free. Larger presentations can be burned to a CD-ROM for a small fee.

CURRENT SLIDASETS

Click on the name of any slideset to view and edit the contents. You can also rename or delete a slideset, create a PowerPoint® presentation, or extend your slideset's expiration using the links below.

EMAIL A PRESENTATION

Send your PowerPoint® presentation to any email address for **free**. Simply provide the address to where you would like to send this presentation and click the button to submit.

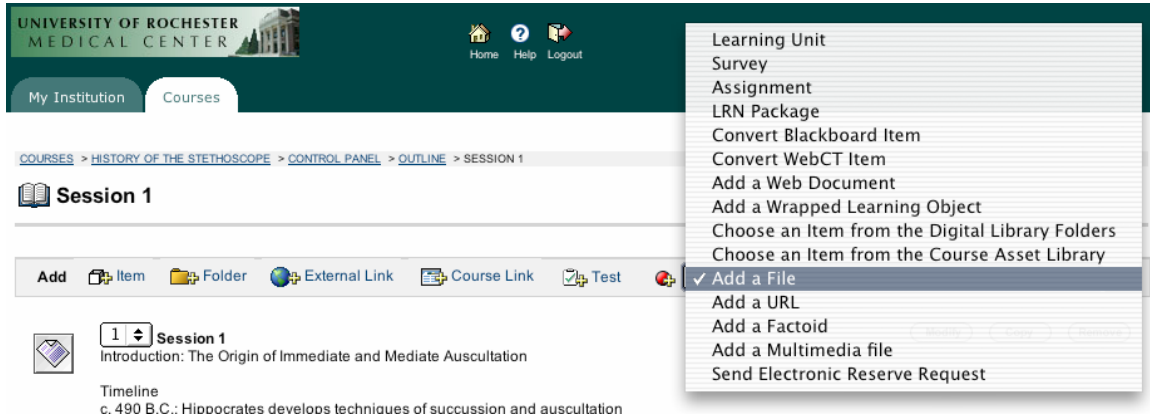

This slideset will be approximately 300 kilobytes (300K) in size.

Please note the size of your slideset. Some mail servers do not allow their users to receive emails with attachments over a certain size, so be sure to check with your provider to make certain you or your colleague can receive your presentation.

Adding a Powerpoint Presentation to Your Blackboard Course

1. Go to the Control Panel of your course
2. Go into the Content Area where you want to place the file
3. Under the Masterfile pull-down in the Add menu, choose **Add a File**. Click **Go**.

Add A File option under Masterfile pull-down menu

4. To specify the file, click **Browse....** Choose the file from your local computer.
5. In the name field, type a pertinent name. You can also add descriptive text and notes if desired.
6. Accept the default of **Myself** under “Sharing.”
7. Under “Options,” select **Yes** for making the content visible, display newer versions, view in HTML, and include more viewer choices.

2 Options
