

Schedule of Events

Stroke Treatment Alliance of Rochester

2<sup>nd</sup> Regional Stroke Management Symposium

8:00 am	Coffee & Registration	11:40 am	KEYNOTE ADDRESS: Intracranial Atherosclerotic Disease Marc Chimowitz, MBChB <i>Neurosciences, Medical University South Carolina</i>
8:25 am	Welcome & Course Outline Webster Pilcher, MD, PhD <i>Neurosurgery, URMC</i>	12:40 pm	Networking Lunch
8:40 am	3hr, 4.5hr or 6hr? When Does The IVtPA Clock Actually Stop? Jeffrey Burdett, MD, MPhil <i>Neurology, Rochester General Hospital</i>	1:30 pm	My Experience With Stroke Patient Speaker
9:00 am	The ABCDs Of TIA Screening & Management Todd Holmquist, MD <i>Neurology, URMC</i>	2:00 pm	Extracranial Atherosclerotic Disease: CREST & ICSS: Is The Answer Here? Babak Jahromi, MD, PhD <i>Neurosurgery, URMC</i>
9:20 am	Stroke In Young Adults Adam Kelly, MD <i>Neurology, URMC</i>	2:20 pm	Q&A Session Followed by Break & Exhibits
9:40 am	Q&A Session Followed by Break & Exhibits	2:40 pm	PANEL DISCUSSION: IMS-3 - End Of Endovascular Salvage For Stroke? Babak Jahromi, Md, PhD & Curtis Benesch, MD, MPH
10:10 am	Secondary Prevention Programs, Do They Really Work? Kate Young, PhD, MPH <i>Neurology, URMC</i>	3:10 pm	AVMs & Cavernous Malformations: Watch Or Treat And When? G. Edward Vates, MD, PhD <i>Neurosurgery, URMC</i>
10:30 am	SPS-3: Aspirin & Plavix ..... Not For Everyone Curtis Benesch, MD, MPH <i>Neurology, URMC</i>	3:30 pm	Unruptured Aneurysms: Who, When And How To Treat? Paul Maurer, MD <i>Neurosurgery, Unity Health System</i>
10:50 am	Stroke & High Dose Statins: Boon Or Bust? Chris Burke, MD <i>Neurology, Unity Health System</i>	3:50 pm	Q&A Session
		4:10 pm	Thank You & Acknowledgements Babak Jahromi, Md, PhD & Curtis Benesch, MD, MPH
11:10 am	Q&A Session Followed by Break & Exhibits	4:30 pm	Session Close

Registration

Person(s) wishing to register should complete and return the Registration Form by **March 14, 2013** to:

University of Rochester Medical Center

Department of Neurosurgery

601 Elmwood Avenue - Box 670

Rochester, New York 14642

Phone: 585.275.8344

Fax: 585.756.5183

Accreditation and Certification Statements

This activity has been planned and implemented in accordance with the Essentials Areas and Policies of the Medical Society of the State of New York (MSSNY) through the sponsorship of the University of Rochester Center for Experiential Learning. The University of Rochester is accredited by the Accreditation Council for Continuing Medical Education to provide continuing Medical Education for physicians.

The University of Rochester Center for Experiential Learning designates this live activity for a maximum of 5.5 *AMA PRA Category 1 Credits™*. Physicians should only claim credits commensurate with the extent of their participation in the activity.

check payable to:

URMC Department of Neurosurgery

\* All fields must be completed for CME/CNE credits.

This conference will take place at:

**Hyatt Regency**  
25 E. Main St.  
Rochester, NY 14604

**Who Should Attend**

This activity is intended for primary care physicians, internists, neurologists, neurosurgeons, emergency physicians, family physicians, radiologists, cardiologists, mid level providers, nurses, physician assistants and EMS personnel who care for patients with cerebrovascular disorders.

**Objectives**

At the conclusion of this activity participants should be able to:

- Identify advances in acute management of Ischemic stroke, TIA.
- Identify secondary stroke prevention measures and programs for Stroke/TIA from a primary care perspective.
- Identify the management of symptomatic intracranial atherosclerotic disease and extracranial atherosclerotic disease in patients after a Stroke/TIA.
- Describe the advances in surgical and endovascular management of aneurysms, arteriovenous malformations and cavernous malformations.

**Topic Info/Needs Assessment**

This activity will serve as a comprehensive review of the most recent advances in diagnosis, management and secondary prevention for stroke patients. The activity will also increase awareness about the efforts of STAR in our community. It will help to create a core strength of providers within our community who remain committed to delivering the most advanced, expedited and evidence based care to our population.

**The Stroke Treatment Alliance of Rochester** (STAR) is a collaboration among the University of Rochester Medical Center, Rochester General Hospital and Unity Health System, funded by the Greater Rochester Health Foundation and generous donations of leaders within the Rochester community. STAR consists of a consortium of neurologists and neurosurgeons from all 4 hospitals in an effort to decrease variations in practice patterns across the community, while improving delivery of rapid treatment and cutting edge endovascular/cerebrovascular treatments for stroke.

Only about 8% of patients in Rochester with acute stroke, receive IV tPA, fewer get advanced stroke care (endovascular/ cerebrovascular treatment). Monroe County has amongst the highest rates of hospitalization for stroke patients in NY state. It has amongst the lower rates of home discharges, higher rates for death within 30 days, and higher rates of discharge to skilled nursing facilities (CDC data).

The most recent results of STAR show that less than 30% of patients in our community arrive to the hospital within 4.5 hours of symptom onset.

All of the above reasons have contributed to the cost of stroke care, which is upwards of \$228 million in Monroe County and the surrounding areas.

Through community education on the signs and symptoms of stroke, provider education on best treatment strategies and a greater effort to streamline and improve the quality of care, the Stroke Treatment Alliance of Rochester aims to save lives and save dollars in the Rochester community.

In keeping with the its aims, the Stroke Treatment Alliance of Rochester wishes to update the local medical community, about treatment guidelines for stroke/TIA patients, the advances and availability of new treatment strategies. Our goal is that by keeping the medical community informed, we can streamline the chain of survival for stroke patients, increase intervention rates for stroke patients, and improve patient outcomes while reducing the healthcare costs associated with stroke.
