SUBJECT: Change in Special Hematology Testing

DATE: May 25, 2010

As of 8:00am on Monday, May 24, 2010, SMH Clinical Laboratories will no longer offer the Leukocyte Alkaline Phosphate (LAP) Test, RBC Osmotic Fragility Test, and Unstable Hemoglobin testing (Isopropanol Denaturation and Thermolabile Hemoglobin). The RBC Fragility Test and Unstable Hemoglobin (Isopropanol Denaturation) testing will be offered as a sent-out test to either ARUP or Mayo Medical Laboratory.

The RBC Osmotic Fragility Test and Isopropanol Denaturation test must still be pre-scheduled with the Special Hematology Lab at 275-5187. The pre-scheduling of these two tests is done to satisfy mailing and sample age restrictions.

Please direct any questions concerning this announcement to either Dr. Majed Refaai or Robert Miller via the methods listed above.
