

## Kohl's Gift Helps Magnify Local Pediatricians' Power

Saturday, June 3, 2006

Area Kohl's stores sent A-Teams, or groups of five volunteers, to help staff the "[10th Annual Stroll for Strong Kids](#)", at Genesee Valley Park, Rochester.

Kohl's department store chain made a **\$57,537 donation** to the hospital's Pediatric Links with the Community program, which helps to promote the health of kids on a community level, putting resident pediatricians to work with

community-based organizations, not just in the doctor's office.

### **ABOUT KOHL'S CARES FOR KIDS\***

- Kohl's commitment to [hospital] is made possible through the Kohl's Cares for Kids\* program, which raises funds for children's health and educational opportunities across the country through the sale of special gift items. One hundred percent of the net profits from the sale of these items support children's health and educational opportunities in the market areas served by Kohl's.
- The gift supports the Pediatric Links with the Community Program, which prompts pediatricians to go beyond their offices and collaborate with community organizations, making a powerful difference in the health of local kids.
- Kohl's introduced the *Kohl's Cares for Kids\** program to reinforce its commitment to the communities it serves and to promote children's health and educational opportunities. Over the last 2 years, Kohl's has donated more than \$82,000 to Golisano Children's Hospital at Strong through the Kohl's Cares for Kids\* program.
