

Department of Imaging Sciences  
Stanley M. Rogoff Lecture

# “Role of PET and PET/CT in Oncology”

Presented by

**Steven M. Larson, MD**

Chief, Nuclear Medicine  
Memorial Sloan-Kettering Cancer Center  
New York, NY

“Dr. Steven Larson is one of the world's foremost experts in targeted radiotherapy and molecular imaging. His research, which spans three decades, has resulted in many novel findings, especially in understanding cancer. As an expert on translational aspects of nuclear medicine, Dr. Larson has made significant contributions to the advancement of positron emission tomography (PET) as a clinical tool for oncology. He was recruited to the National Institutes of Health (NIH) in 1983, in part to establish a state of the art PET center for NIH researchers. His success in this endeavor led to an NIH Directors Medal in 1987 for him and his colleagues.”

Thursday, June 2, 2005

11:30 AM - 12:30 PM

**Class of 1962 Auditorium - Arthur Kronberg Building**

University of Rochester Medical Center  
Rochester, New York
