FT position available. Primarily weekdays, occasional weekend & on-call responsibilities (phone Triage) for the SMH employee health bloodborne pathogen exposures.

Available Positions

Works in a fast-paced environment providing nursing care and immunizations for pre-employment requirements, annual health updates, vaccination clinics, work-related injuries and illnesses, U of R employee contagion & exposures. Three years' experience required. Requires excellent communication skills and the ability to prioritize and work collaboratively. Demonstrate flexibility and excellent customer service skills.

Neurology - Neuro Immunology - RN 2, Outpt (252098)

FT position available: M-F days

Our team of Neurologists, Advanced Practice Nurses, and RN's is looking for an RN to fill a dual role in the care of patients with Multiple Sclerosis and other neurologic disorders. The dual role includes working with other RNs in the care of patients through telephone management and working with Neuro Infusion RNs in two infusion centers, infusing neuro stabilizing intravenous medications. The RN coordinates care for patients with Multiple Sclerosis and other neurological conditions in partnership with the multidisciplinary team. Our interdependent workflow depends upon a nurse who thrives in a dynamic work environment and who is interested in the growth of UR Neurology. Responsibilities include: telephone/my chart communication, care of infusion patients, including IV placement, patient education, active participation in quality improvement initiatives, and a demonstration of positive communication and teamwork within clinic and between departments. Requires RN with current NYS License Minimum of 1 year of professional nursing experience.

Neurology, RN, Nurse Navigator Outpatient (251876)

FT: 40 hours, Days/No Weekends

The role of the UR |Neuro Navigator is to make neurologic health ever better everywhere. In partnership with all members of the UR | Neurology team, the navigator integrates service delivery and proactively guides and supports patients through our complex health care system. The navigator offers patients seamless care by integrating primary, secondary and tertiary services. One of the main aims is to build productive relationships with patients and their caregivers, healthcare clinicians from hospital, to in home care, to skilled nursing health care facilities, outpatient clinical service and service to our community. This role is dependent upon methodological considerations, capitalizing on new insights from regular evaluations. Plan. Do. Study. Act. Our neurology department Navigator roles have similar functions and will be required to develop in partnership with UR nursing and UR Neurology specialty specific plans of care team delivery. This requires a current NYS License.

Become part of an exciting procedure team caring for patients with cardiac and vascular conditions. This is a growing field focused on the treatment of vascular, electrical conduction, coronary disease, and structural heart diagnosis. Responsibilities include direct patient care and procedural support in acute and non-acute situations in a dynamic setting. Critical care experience or applicable medical/surgical experience required.

Cardiac Cath/EP Lab Holding Area - Registered Nurse - Level II (250278)

FT/PT positions available. Primarily week days with some late and night responsibilities.

Join an exciting professional multidisciplinary team involved in the care of patients with cardiac and vascular conditions. Our fast-paced expanding fields include the treatment of patients with vascular, electrical conduction, coronary diseases, and structural heart diagnosis. Responsibilities include providing direct patient care and procedural support in acute and non-acute situations. We provide dynamic pre and post procedure care as well as PACU recovery. Benefit of shift flexibility with minimal off shift requirements. Critical care experience or applicable medical/surgical experience required.

Dialysis (Acute Unit) - Registered Nurse - Level II (235941)

FT position available D/E Holiday, weekend and on call per unit policy

Seeking motivated individuals to join UR Dialysis providing inpatient acute hemodialysis to a wide variety of medical and surgical inpatients on three campuses (Strong Memorial, Highland Hospital and FF Thompson). Dedication to teamwork, strong communication skills are essential. Previous dialysis experience is desirable. Primarily Days and evenings with overnight on call responsibilities.

Dialysis (Acute Unit) - Registered Nurse - RESIDENCY OPPORTUNITY - Level I (235939)

D/E, Night with on-call responsibility

This is a unique opportunity for new graduate nurses or nurses with less than a year experience who are interested in hemodialysis. A brand new residency program of six months will prepare the new nurse to care for hospitalized acute

Available Positions

patients who require hemodialysis treatments. The resident will be exposed to learning opportunities for a wide range of medical and surgical patients to build their lifelong foundation of nursing experience. The residency program will be based at the dialysis unit at Strong Memorial Hospital but could include learning opportunities at our other affiliate hospital inpatient dialysis sites (F.F. Thompson and Highland Hospital). Dialysis nursing is primarily Day/Evening for 6 days a week with on call requirements.

Nuclear Cardiology RN 2, Outpt (251453)

FT (36) Straight Days, No Holidays, No Weekends, No Call

Seeking a skilled RN to work in an exciting cardiac procedural area. The ability to work effectively as a member of a multidisciplinary team is essential for success in this role. The RN will collaborate closely with Nuclear Technologists in performing nuclear stress testing, administering radioactive isotopes, and other medications as per protocol. Additionally, the candidate will coordinate with nursing staff across all areas of the facility to ensure comprehensive patient care. This position includes participation in service activities, strong teamwork, and flexibility. Role requires ACLS certification and previous experience in Cardiology is preferred.

UR Cardiac Care Flex Team - Registered Nurse - Level II (248000)

FT, PT and Per Diem positions available. D/E/N weekends and holidays as required. Straight Night and Evening shifts available.

Unique offering to explore the rewarding nursing care of cardiac patients throughout our Cardiac Care service line with opportunity for professional growth as well as advanced clinical skill building. Patient populations include the continuum of pre-procedural to post-surgical care of patients with varied cardiovascular and thoracic disease states including advanced heart failure and mechanical circulatory support. Flex team members generally complete an eight week assignment on one of our units. Successful candidates will demonstrate flexibility, critical thinking, excellent communication and organizational skills and willingness to work in variable settings and teams. Orientation to the units and new populations are provided. One year of adult med surg or cardiac experience required. ICU experience is a plus. Opportunities for clinical advancement are supported and encouraged. Ask about the potential options for special scheduling arrangements.

UR Cardiac Care Flex Team - Registered Nurse - Level III (247994)

FT, PT and Per Diem positions available. D/E/N weekends and holidays as required. Straight Night and Evening shifts available.

Available Positions

Wilmot Cancer Center - Clinical Trials Office - Clinical Research Nurse - Registered Nurse, Level II (242536)

Full Time Day Shifts

Seeking a team focused professional with a passion for oncology. This is an exciting opportunity to join the Clinical Trials Office as part of the Wilmot Cancer Center (WCC) within the University of Rochester Medical Center (URMC) as a Clinical Research Nurse (CRN). The CRN works closely with and is guided by the Principal Investigator, to ensure the integrity and quality of our clinical trials are maintained and conducted in accordance with the Food and Drug Administration, Institutional Review Board (IRB) approvals, Office for Human Research Protections (OHPP) and URMC/WCC policies and procedures. This nursing role independently provides nursing care; identifies and communicates the impact of the research process on patient care; adjusts interventions based on findings; and reports issues/variances promptly to the research team. The CRN administers research interventions; collects patient data according to protocol specifications; evaluates the patient response to therapy; and integrates evidence-based practice into nursing practice so as to best protect the health and safety of research participants. Join a team that is growing and improving the clinical trial experience for oncology patients. Our CRNs are developing and changing the way we manage care for clinical trial oncology patients. The CRN role allows you to apply your nursing and oncology expertise without leaving the field of nursing. In reviewing research and nursing literature the CRN maintains a working knowledge of their area(s) of expertise and assigned working disease group. Excellent communication skills, detail oriented and the ability to work autonomously with multidisciplinary teams are required to be successful in this role. BSN with 1-2 years oncology experience and/or clinical research experience preferred. Oncology nursing certification preferred. Knowledge of computer databases, word processing and spreadsheets required.

Wilmot Cancer Nursing Services

4-1200 - Palliative Care/ General Medicine - Asst Nurse Manager - Level IV Inpatient (252125)

FT position available (40 hours), D.E/N, 8 & 12 hour shifts. Weekends, holidays, and on-call per unit policy.

Exciting opportunity for a highly motivated registered nurse to impact end of life patient care by functioning as a clinical leader as part of an interdisciplinary palliative team. The ideal candidate will possess effective leadership and problem-solving skills, including strong communication skills with the ability to resolve conflict. The ANM will work in collaboration with the Nurse Manager and small unit leadership team to articulate and accomplish department, unit, and hospital goals. Recent acute care experience preferred; BS required.

Available Positions

Blood and Coagulation Disorder Center at Lattimore - Senior Assistant Nurse Manager, Level IV (249961)

FT position, M-F, 40 hrs, primarily days, some travel may be involved

FT position, M-F, 40 hrs, primarily days, some travel may be involved Seeking an individual with demonstrated leadership experience to assist the NM in supporting a growing nonmalignant hematology ambulatory practice with 10 exam rooms, 12 infusion chairs, and multiple procedure-based treatments. This practice has clinics at both Lattimore and Wilmot Cancer Institute. The Senior Assistant Nurse Manager will add expertise in the infusion center, certification specific to the specialty, direct support to the Nurse Manager, and be accountable for daily unit operations. The Sr. ANM focuses on implementing change, quality improvement projects, and mentoring staff. This is a new practice, and the Sr. ANM will assist in staff retention and coordination of services across multiple locations. Strong communication skills are necessary to collaborate with multidisciplinary hospital partners and regional offices to achieve positive patient outcomes. RN licensure in NY, BSN required, previous ANM experience preferred.

WCC5 - Surgical Oncology - Assistant Nurse Manager, Inpt (252232)

FT position available, D/E/N, 8 & 12 hour shifts, weekends & holidays per unit policy

In search of a dynamic, inclusive, flexible individual willing to care for a diverse population in a changing environment. The ANM will be involved in direct patient care, unit activities, maintaining standards, staff development and education. Must have excellent interpersonal and communication skills, working collaboratively as an active member of a multidisciplinary team. Ability to critically think and problem solve required. Demonstrates ability to function in a leadership role. Requires a BSN or matriculation in a BSN program from an accredited Nursing Program and an active New York State license in good standing. Applicants will have a minimum of 5 years or RN experience. Recent surgical experience preferred.

WCC6 - Blood and Marrow Transplant - Assistant Nurse Manager - Level IV (237966)

FT position available, D/E/N, 8 & 12 hour shifts, weekends & holidays per unit policy

Exciting opportunity for RN with BSN (or matriculated in BSN program), and > 3 years experience in BMT or Heme/Onc nursing to be an active member of our interdisciplinary Blood and Marrow Transplant program. Position will be involved in clinical care, coordinator activities, patient and staff education, and leadership. Individual must demonstrate the ability to develop standards of care, and program goals/objectives. Candidate must have the ability to work cohesively in a team or independently, have advanced skills of organization, have strong communication skills, have the ability to coach people toward their potential, and the ability to multi-task. OCN preferred.

WCC7 - Hematology - Oncology - Assistant Nurse Manager, Level IV (234913)

FT position available. D/E/N, on-call responsibilities, some weekends and holidays

Interested candidates should possess a strong motivation and desire for creating team excellence. Prioritizations include patient safety/satisfaction, customer service utilizing the patient and family centered model, and staff development;

Available Positions

emphasis on effective communication, productivity, exemplary self-care, creative thinking, confident decision making skills, ability to function well in a demanding environment, approachability, and the ability to embrace constant continuous improvement initiatives. Leadership experience preferred and/or exemplified in current/past positions. OCN and oncology experience preferred. Superb nursing skill and patient care abilities required.

WCC7 - Hematology/Oncology - Senior Assistant Nurse Manager, Level IV (247121)

FT position, 40 hours, D/E/N. Weekend and administrative on-call responsibilities. Split position between administrative and clinical responsibilities.

The Senior Assistant Nurse Manager (Senior ANM) provides direct support to the Unit Nurse Manager and is accountable for daily unit operations. Able to cover and fill in as NM during his/her absence. Participates in the management of human resources, career sculpting, mentoring, the development and evaluation of recruitment and retention strategies and the monitoring of patient outcomes. Accountable for supporting standards of care and providing consultation and expertise within the oncology service. Actively participates in performance improvement activities on the unit, service, and hospital level. Models and holds nursing and other staff accountable to meet IICARE values. Supports a positive work environment and provides leadership unit/service adherence to UR/Strong policies and procedures. Participates in community and professional organizations, demonstrating commitment to the promotion of nursing's visibility and future. Requires a BSN from an accredited nursing program and an active New York state license in good standing. Applicants will have a minimum of 3-5 years of nursing experience. Recent leadership and oncology experience preferred.

Wilmot Cancer Institute @ Myers Cancer Center in Dansville, NY - Assistant Nurse Manager, Outpt (252127)

FT position, M-F, 40 hrs, primarily days, some travel involved

Seeking an individual with demonstrated leadership experience to assist the NM in supporting a busy practice within a regional cancer center. The Assistant Nurse Manager provides supervision, direct patient care, and acts as a clinical liaison/expert for our Southern Region practices. This position is an exciting opportunity to gain regional cancer experience and navigate community infusion referrals. This candidate must be able to work in a fast-paced environment with proven leadership and follow up skills. Strong communication skills are necessary in order to collaborate with our community and hospital partners.

Available Positions

71200 - Thoracic and Surgical Specialty - Licensed Practical Nurse 2 Inpt (244095)

FT position (36 hrs), D/N/E, holidays and weekends per unit policy

7-1200 offers an exciting opportunity for new graduates or experienced nurses with a special interest in surgical patients, who are eager to learn. On our 25-bed unit, we care for a variety of different surgical patients including Thoracic & Foregut Surgery, Colorectal Surgery, Plastic surgery, and Burn Surgery. We have 2 step down beds for post-operative patients requiring more frequent monitoring. Additionally, we specialize in the management and care of pulmonary hypertension patients through the Pulmonary Care Center at URM, the only center in upstate New York and one of only four centers in NYS. We are excited to have also been newly certified to care for readmitted patients with LVAD therapy and support URM's expanding VAD program. On 7-1200, you will develop a diversified skill set working with a variety of medical equipment, tubes, lines, and drains. We take pride in our nursing culture and strive to maintain a positive working environment, supporting all team members to meet their professional and personal goals. Looking for candidates who exhibit critical thinking skills, strong communication, and a desire to learn and work as part of a team. Primary tasks will include working with RN staff to provide patient care within the scope of a NYS LPN, and under the direction and supervision of an RN.

Research Nurse (243662)

8 AM-4:30 PM

Position Summary: This position supports the Cardiology Division as a research nurse coordinator for the clinical operations of the unit. This position requires a nursing degree with strong clinical skills, with a background in cardiology nursing. Typical duties will include but are not limited to: assessing clinical feasibility of newly proposed projects, evaluating study protocols regarding standard of care and research-oriented tasks, evaluating time effort needed to complete clinical tasks and study procedures and visits related to conduct of the studies, assisting unit manager and director with the above information toward assessment and preparation of budgets for the studies. The duties will also include conducting study protocols as the primary coordinator being responsible for enrollment and entire conduct of given study under the direction of Principal Investigator. On-call responsibilities are expected and dependent on individual study protocols. This position will assist the administrative efforts of the Director of the Unit regarding regulations of WIRB, RSRB, Patient Accounting, and the funding sponsors in study start-up and management of pharmaceutical and device clinical trials. This person will be committed to providing high quality research efforts on the Cardiology Division's behalf. Reports to Director of the Cardiology Clinical Trials Unit Responsibilities: Coordinates the administrative details required to initiate and conduct human subject research, such as, receiving, distributing, and explaining study information, including protocol, and human subject recruitment materials to immediate team members and relevant others. Ensures all immediate and extended team members understand and adhere to all aspects of all approved protocols, procedures and standards for documentation and communication. Under general direction from the Principal Investigator, trains staff on details of protocol, including inclusion and exclusion criteria, informed consent procedures, study activities, process for source documentation and case report form (CRFs) completion, and adverse event reporting. Recruiting/screening/consenting/enrollment of patients, record reviews and interviews, history and physicals across multiple units. Dispensing of investigational medications and devices, performing

Available Positions

procedures as required by protocols (obtaining lab specimens, performing electrocardiograms, collecting data while observing electrophysiology, diagnostic, interventional cardiology procedures, exercise testing, drawing of bloods, etc.). Develop good working relationship with sponsors and multiple research institutions to foster a positive research environment and attend study Investigator/Coordinator meetings as required for study start-up. Assist in training new staff members within the department. Filling out case report forms, creating patient instructions and calendars, scheduling patient appointments, and assisting the investigators as needed. Reviews and documents the dispensing and returning of study materials (such as study drugs and devices). Ensures additional training is provided to ensure changes to protocol and documents are communicated and adhered to. Other duties as assigned. Requirements: Nursing degree required Strong clinical skills; or equivalent combination of education and experience. Cardiology background and research experience is preferred. Knowledge of word processing and data analysis software. Professional Research Coordinator Certification (i.e. SoCRA or ACRP) preferred. The University of Rochester is committed to fostering, cultivating, and preserving a culture of equity, diversity, and inclusion to advance the University's mission to Learn, Discover, Heal, Create – and Make the World Ever Better. In support of our values and those of our society, the University is committed to not discriminating on the basis of age, color, disability, ethnicity, gender identity or expression, genetic information, marital status, military/veteran status, national origin, race, religion/creed, sex, sexual orientation, citizenship status, or any other status protected by law. This commitment extends to the administration of our policies, admissions, employment, access, and recruitment of candidates from underrepresented populations, veterans, and persons with disabilities consistent with these values and government contractor Affirmative Action obligations.

Research Nurse, RN (251264)

10 AM-3 PM; WKNDs; SCHEDULE VARIABLE BASED ON NEEDS

POSITION IS UNTIL JUNE 31, 2025; WITH POSSIBLE RENEWAL PENDING GRANT POSITION SUMMARY: The Research Nurse will work daily to implement research interventions aimed at improving asthma care delivery and reduce morbidity for children in the Rochester community. The Research Nurse will regularly communicate with both internal and external parties (i.e., caregivers and children, primary care and specialist providers, school health staff, pharmacists, insurance companies, etc.) to provide guideline-based asthma care, and will provide ongoing education and support to internal/external parties around asthma care through Zoom, telephone, and in-person (homes, schools, etc.) communication. The Research Nurse will adhere to research protocols, maintain timely communication with families and medical providers, and will track and record intervention components in a database. The Research Nurse will also support other research needs as necessary, including study recruitment, obtaining informed consent, administering surveys, conducting medical record reviews, and supporting dissemination of results. The Research Nurse will have appropriate clinical knowledge, excellent communication and organizational skills, and passion to support and advocate for children and families from marginalized communities. The position requires a flexible schedule, a valid driving license and personal vehicle for travel into the community. RESPONSIBILITIES: Carefully review health data collected for multiple complex research interventions, and under direction of the PI, draft appropriate treatment regimens based on national guidelines to support the implementation of several complex-NIH funded research trials. Coordinate clinical care delivery between participants and healthcare providers, school health staff and others. Travel to homes, pharmacies, and schools to implement asthma care

Available Positions

interventions. Conduct asthma education and support to families via Zoom, telephone and in-person. May utilize telemedicine platforms (Tytocare) to implement interventions. Communicate daily with caregivers and patients of research trials, primary care and specialist providers, pharmacists, school health staff, insurance companies, and others to ensure the timely and appropriate delivery of the asthma care for interventions. Primary contact for all intervention-specific, asthma, and asthma medication questions or concerns. Present intervention details during annual school-nurse orientation, and semi-annually to provider offices. Provide links to community resources as necessary. Maintain meticulous documentation of intervention details in an online database to track delivery of asthma intervention components, and document any issues or concerns. Provide weekly status reports to PI and Program Director on intervention outcomes. Participate in additional research activities, including screening potential participants for eligibility, obtaining informed consent, administering surveys, collecting data from medical records and school records, and supporting dissemination of results. Participate in weekly staff meetings and help lead the annual Community Advisory Board meetings. Other duties as assigned.

QUALIFICATIONS: NYS Nursing license (RN or NP) and a bachelor's degree with major course work in an appropriate health, social or similar field and a minimum of 1-3 years of relevant work experience (pediatric nursing, counseling, public health, community-based programming, etc.) required. Certification in Asthma Education (AEC®), as well as advanced knowledge of guideline-based clinical asthma care preferred. Minimum 1 year of relevant experience with local, community-based healthcare systems and/or programs serving historically marginalized children and families required. Prefer 2-3 years of relevant experience. Demonstrates excellent skills in organization and communication including communications with extramural agencies, officials, primary care physicians and investigators required. Must be flexible, empathetic, able to engage effectively with diverse children, adolescents and caregivers required. Demonstrates efficiency in prioritizing assignments, proactively resolving problems, and recommending and implementing continuous quality improvements required. Background in clinical and translational research, including study design, and implementation preferred. Must have a car and valid driver's license and be willing to travel to schools, homes, and other local sites required.

The University of Rochester is committed to fostering, cultivating, and preserving a culture of equity, diversity, and inclusion to advance the University's mission to Learn, Discover, Heal, Create – and Make the World Ever Better. In support of our values and those of our society, the University is committed to not discriminating on the basis of age, color, disability, ethnicity, gender identity or expression, genetic information, marital status, military/veteran status, national origin, race, religion/creed, sex, sexual orientation, citizenship status, or any other status protected by law. This commitment extends to the administration of our policies, admissions, employment, access, and recruitment of candidates from underrepresented populations, veterans, and persons with disabilities consistent with these values and government contractor Affirmative Action obligations.

Strong Memorial Hospital

Anesthesia Technologist-Lic (226392)

1:30 PM-10 PM; OCC WKENDS/HOL

Role : Performs a variety of technical assignments for the Department of Anesthesiology. Exercises high degree of skill, judgment, and knowledge of the terminology, common procedures, and practices of the assigned area, including the set-up of medications and supplies in both the work room and mobile carts and anesthesia equipment set-up and troubleshooting.

Available Positions

Specific Responsibilities: Under limited direct supervision: Assist anesthesia providers, including: preparation of anesthesia equipment prior to the patient's arrival, placement of equipment in the operating rooms, ensuring cleanliness of anesthesia equipment, cart and machine set-up of supplies and medications based on case variables including: patient age, case type and case length, between cases and at the end of the day in each operating room, work room and mobile cart.
