

Dear Investigators and staff working with mice at the University of Rochester,

I will be holding a town hall meeting on two dates to discuss our mouse pinworm eradication and prevention program targeted for the two suites in the KMRB Vivarium. All labs using mice campus-wide (including CVRI) should attend one of the two sessions given the potential for cross contamination across all buildings. I will generate a written plan after the meetings which will be posted on the Mouse Users Group section of our Animal Resource web site (<http://www.urmc.rochester.edu/vivarium/>) if you cannot attend one of the meetings. Follow up updates will also be posted at that site. Please don't hesitate to call or e-mail me with any questions. Jeff

Wednesday, December 17th 2-4pm .. Class of 1962 Auditorium (G-9425)
Friday, December 19th 2-4pm.. Whipple Auditorium (2-6424)
