

## **CHARGES FOR RODENT ANESTHESIA MACHINE RENTAL**

\$20 for the first calendar date that the machine is taken

\$5 for each additional consecutive calendar date (up to 4 days)

NOTE: Charges are calculated by calendar day, not 24 hours. If a machine is in the possession of an investigator for any part of a day, the daily charge will apply.

NOTE: Rodent anesthesia machines cannot be loaned out for more than 5 consecutive days to the same investigator. They must be returned for maintenance. If another machine is available at this time, an investigator may borrow it. Charges begin again at this point.

Each anesthesia machine rental includes a full tank of oxygen and a full reservoir of isoflurane. If investigators need more of these supplies while they have the machine, they will be charged for these items through DLAM supply sales. The costs are:

Isoflurane: \$30/250 ml. bottle

Oxygen: \$5/bottle

F-Air canister: \$8

Investigators may keep the isoflurane that they purchase, but must return the oxygen and F-Air canister.

Portable pulse oximeter or CO<sub>2</sub> monitor.....\$5/day
