

Postdoctoral Position in Cardiovascular Biology and Disease

Two postdoctoral associate positions or staff scientist positions are available in the laboratory of Prof. Zheng-Gen Jin at Aab Cardiovascular Research Institute/Department of Medicine, the University of Rochester Medical Center, Rochester, NY, USA. The positions are supported by the United States National Institute of Health (NIH)-funded grants focused on molecular and epigenetic regulation of cardiovascular metabolism, inflammation, and atherosclerosis.

We are looking for candidates with experiences or interest in following areas: vascular biology, gene regulation, cell metabolism, cardiovascular disease, diabetes and obesity, and genetic and disease animal models. Priority will be given to motivated candidates with a strong background and prior experience in molecular and cell biology, epigenetics, metabolism, immunology, and animal studies. We will provide competitive salary/benefits for individuals who are motivated, creative, capable of conducting research independently, and have excellent written and oral communication skills in English.

Interested applicants should submit a cover letter with a brief summary of research interests, curriculum vitae, and contact information of three references to Zheng-gen_Jin@urmc.rochester.edu.
