

Postdoctoral Research Position
Department of Biomedical Genetics
University of Rochester Medical Center
Wilmot Cancer Institute
Rochester, New York, USA

A postdoctoral position is available in the lab of Dr. Isaac Harris in the Department of Biomedical Genetics at the University of Rochester Medical Center and Wilmot Cancer Institute in Rochester, NY, to study the roles of antioxidants in cancer. The Harris Lab uses mouse modeling and high-throughput screening approaches to examine disease-related biological questions. For information on the lab, please see <https://www.urmc.rochester.edu/labs/harris.aspx>. Candidates should have earned a Ph.D. or M.D./Ph.D. degree(s). Expertise in biochemistry and molecular/cellular biology is required, and experience with mouse handling is preferred. Interested applicants should send a CV, a brief description of research interests, and contact information for three references to Dr. Isaac Harris at Isaac_harris@urmc.rochester.edu.
