8. PLANS FOR THESE ANIMALS:
ACUTE USE THEY WILL BE GONE WITHIN DAYS WEEKS MONTHS OF ARRIVAL
PLAN TO KEEP THEM LONG-TERM
9. IF YOU PLAN TO KEEP THESE ANIMALS, HOW MANY DO YOU ESTIMATE YOU WILL HAVE UPON RELEASE FROM QUARANTINE?(ABOUT 6-8 WEEKS AFTER ARRIVAL)

HOW MANY DO YOU ESTIMATE YOU WILL HAVE 6 MONTHS AFTER RELEASE FROM QUARANTINE?

WHAT SIZE COLONY OF THESE ANIMALS DO YOU ULTIMATELY PLAN ON HAVING?
AVG. # OF CAGES MAX. AVG. # OF ANIMALS MAX.

***It is recommended that rodent colonies that would be difficult to replace be divided into two animal-housing rooms. This would prevent you from having to rederive or replace them if a pathogen is discovered in one room. For Helicobacter negative mice, second housing options can include the DLAM-managed foundation colony, the Helicobacter negative suite (B9816) in the KMRB, or a Helicobacter negative MIT room in SMD. For Helicobacter positive mice, second housing options can include the Helicobacter positive DLAM-managed foundation colony or the Helicobacter positive MIT breeding room in SMD. A DLAM-managed foundation colony also exists for rats. Please contact one of the DLAM veterinarians for a list of the quarantine test requirements and their costs for rodents going into these various rooms.**
