Huntington's Disease: Treatment with Muscimol, a GABA-Mimetic Drug

Ira Shoulson, MD, David Goldblatt, MD, Maurice Charlton, MD, and Robert J. Joynt, MD

Muscimol, a γ -aminobutyric acid (GABA) analogue that exerts potent and specific agonist effects on GABA receptors, was administered orally to 10 patients with Huntington's disease. In this double-blind study, muscimol treatment did not result in improvement in these patients' motor or cognitive functions. However, muscimol administration did ameliorate chorea in the most severely hyperkinetic patient, and it was associated with the appearance of dystonic features, electroencephalographic changes, and behavioral alterations in some patients. These latter observations support a functional relationship between GABA-ergic activity and the genesis of both dystonia and EEG abnormalities in humans. The therapeutic failure of muscimol indicates that the GABA disturbance in Huntington's disease does not alone account for the clinical features of this disorder.

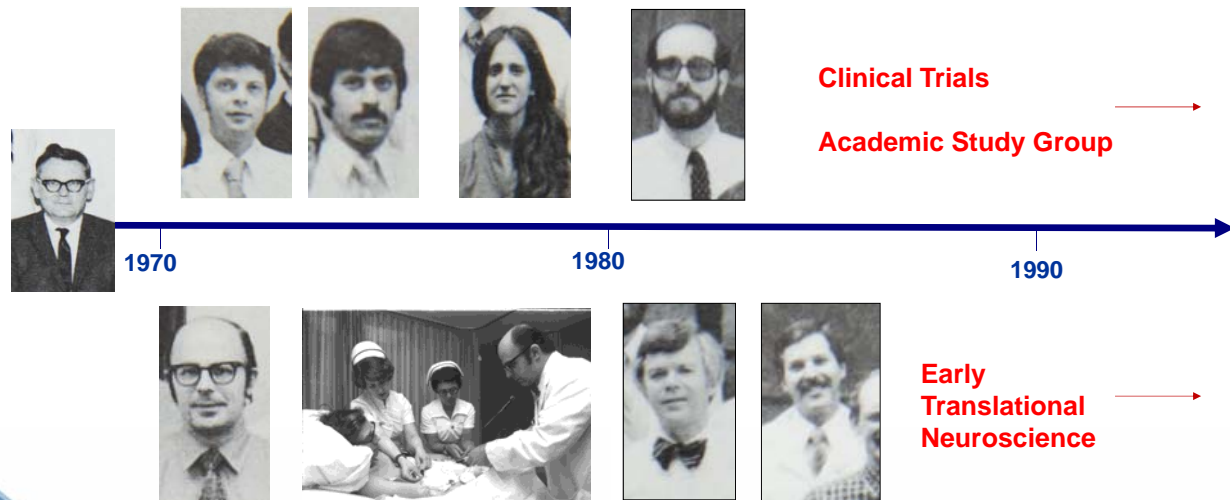

Shoulson I, Goldblatt D, Charlton M, et al: Huntington's disease: treatment with muscimol, a GABA-mimetic drug. *Ann Neurol* 4:279-284, 1978

Strategic Plan, 2014-2018

"From Vision to Reality"

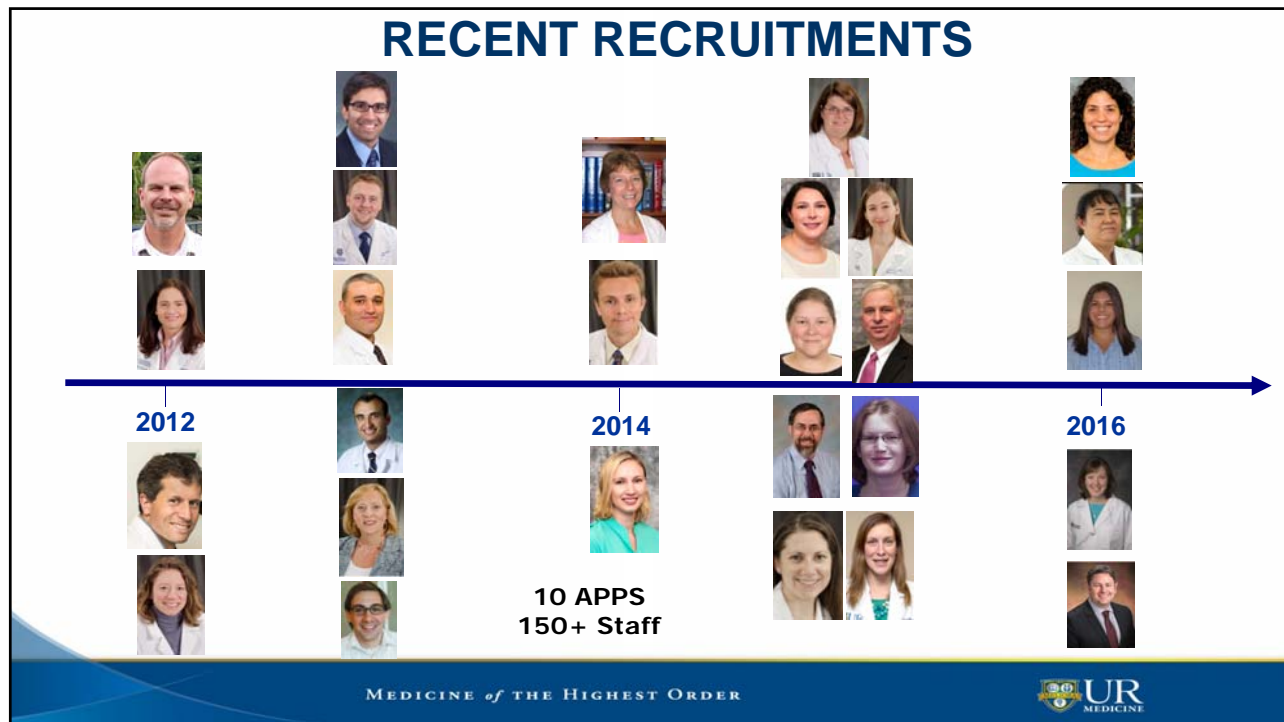

"To learn, discover, heal, create and make the world ever better for patients and families with neurological disorders"

GOALS

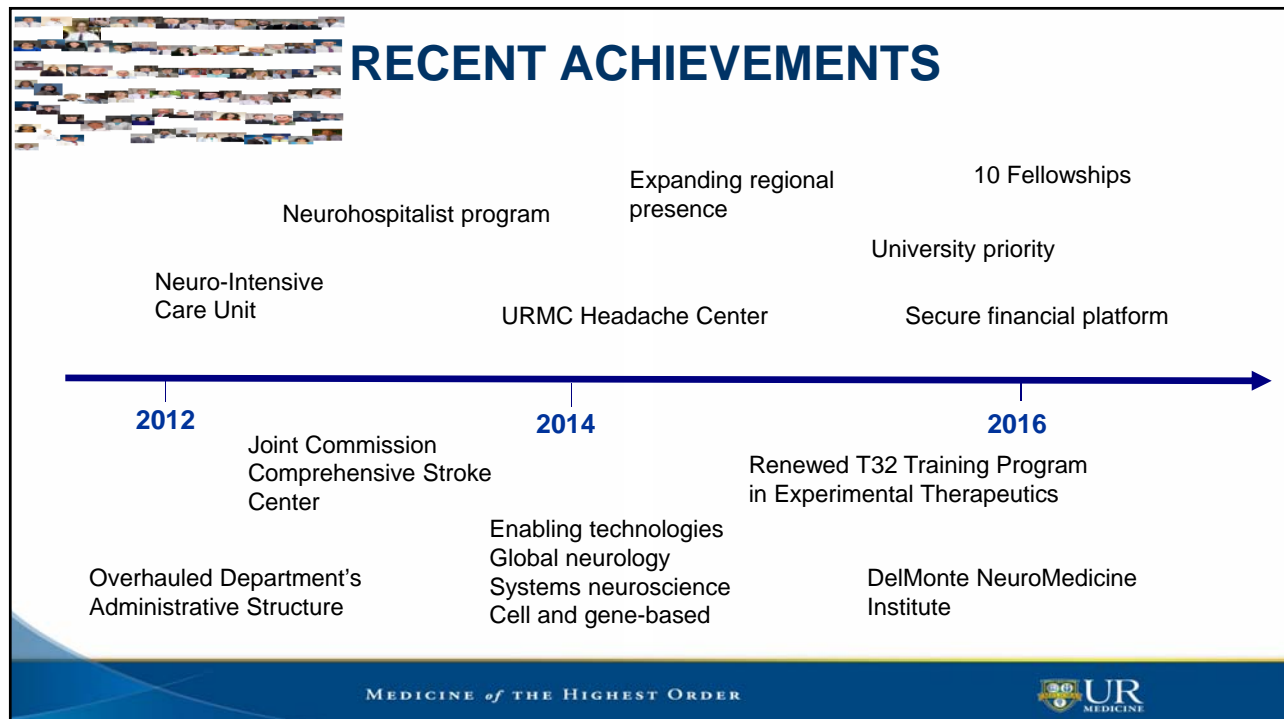

1. Radically Change Clinical Practice
2. Strategic Research Growth
3. Targeted Educational Efforts
4. Develop New Leaders
5. Intense Relationship Building
6. Financial Sustainability

THE UNIVERSITY OF ROCHESTER
SCHOOL OF MEDICINE AND DENTISTRY
260 CATTENDEN BOULEVARD
ROCHESTER, NEW YORK 14620

January 14, 1966

Airmail
Personal and Confidential

Dr. Robert J. Joynt
The University of Iowa
University Hospitals
Department of Neurology
Iowa City, Iowa 52241

Dear Dr. Joynt:

I am delighted to inform you that on the unanimous and enthusiastic recommendation of the Advisory Board of the School of Medicine and Dentistry, President Wallis has authorized me to offer you the position of Professor of Neurology and Chairman of the Department of Neurology effective July 1, 1966.

In keeping with our customary procedure, this appointment is subject to confirmation by the Board of Trustees. The next meeting of the Board will occur in early February. I am certain that there will be no question about the Board's approval. However, the appointment cannot be official and no general public announcement can be made until the Board acts.

The position being offered you carries an annual salary of \$22,500. You would be enrolled in Plan B of the Faculty Compensation Program described in the enclosed pamphlet. In keeping with the terms of this Plan, you would be allowed to retain fees from private practice to a total of \$7,500 per year. For the first two years that you are here we shall guarantee this additional income of \$7,500 per year. Under this arrangement, if your gross receipts from private practice in either or both of these years fall short of \$7,500, we shall make up the difference at the end of each 12-month period.

You would have unlimited tenure as described in the enclosed brochure, "Regulations Concerning Appointment, Promotion, Tenure, Retirement, and Leave of Absence".

All members of the faculty participate in the University's benefit program which consists of:

WINNER OF 6 ACADEMY AWARDS!
"BEST PICTURE!"
