# Student Tutorial

## An Introduction to Fetal Heart Rate Monitoring

Our Student Tutorial program introduces nursing students to the basics of fetal heart rate monitoring interpretation. We currently use the National Institute of Child Health and Human Development (NICHD) nomenclature for fetal heart rate interpretation.

Students received online access for one-year to the program and receive a certificate of completion upon successful completion of the program to add to their personal portfolio.

Instructors receive online access to the program for one-year, along with the ability to track and report on students in one convenient location.

## WHAT'S NEW

We are excited to announce our periFACTS® online courses for the monthly Online Continuing Education Program and Individual Store courses are now iPhone and iPad compatible for mobile use! We are working on transitioning all of our courses by 2018!
