

Current. Comprehensive. Continuing Education Online.

Our July Newsletter is dedicated to Pregnancy Management

Our newsletter format will feature important industry news, periFACTS® programs and books, and a sneak peek to what's new this month for our monthly subscribers!

In The News

[Triptan use in pregnancy not linked to ADHD in offspring](#)

Triptan use during pregnancy does not increase the risk for attention- deficit/hyperactivity disorder (ADHD) in offspring, new research suggests.

Medscape (6/2022)

[Coffee does not increase pregnancy risks](#)

Coffee consumption during pregnancy was not linked to an increased risk for adverse outcomes, according to a study in the International Journal of Epidemiology.

Healio - Free Registration Req'd (6/2022)

[Anemia During Pregnancy Increased Among WIC Participants](#)

The prevalence of anemia during pregnancy, identified using the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) Participant and Program Characteristics (PC) data, increased from 2008 to 2018, according to research published in the June 24 issue of the U.S. Centers for Disease Control and Prevention Morbidity and Mortality Weekly Report.

HealthDay (6/2022)

[Pregnancy-related hypertension doubles short-term risk](#)

Women experiencing gestational hypertension or preeclampsia have a 2.4-times higher risk of developing hypertension 10 years post-pregnancy, a study published June 13 in the Journal of the American College of Cardiology found.

Becker's Hospital Review (6/2022)

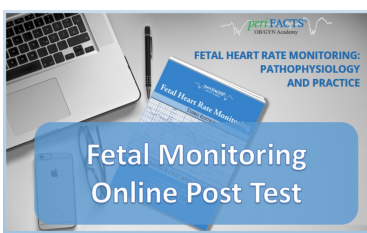

[Maternal Deaths Up With Pregnancies Complicated by Cancer](#)

Among pregnancies complicated by cancer, the risks for severe maternal morbidity and mortality are increased, according to a research letter published in JAMA Oncology. The most common cancer types were breast cancer, lymphoma, leukemia, and gynecologic cancers.
