## Our May newsletter is dedicated to **Breastfeeding**

Our newsletter format will feature important industry news, periFACTS® programs and books, and a sneak peek to what's new this month for our monthly subscribers!

---

### In The News

#### [Here's what a breastfeeding-friendly workplace looks like](#)

For new moms, finding a space to breastfeed during the workday can be a source of stress and discomfort. While it's mandated by the Affordable Care Act that an employer provide a dedicated location and time for a woman to pump at work, only 40% have a space that is not a bathroom, according to a study by Women's Health Issues medical journal. Nineteen percent of moms reported that they felt pressure from their job to stop breastfeeding entirely.

Employee Benefit News (4/2022)

#### [Breastfeeding reduces risk for lower respiratory tract infections, asthma in infants](#)

Breastfeeding mitigated the risks for developing lower respiratory tract infections in infancy and for developing asthma and allergic rhinitis in childhood, according to a study.

#### [Transmission of COVID-19 from mother to baby is rare](#)

The virus that causes COVID-19 can be passed from a pregnant person to their baby before, during and after childbirth, but such cases are "rare," a study published Wednesday by BMJ found. Still, vaginal births and breastfeeding do not increase the risk for COVID-19 in newborns, even when their mothers have the infection.
