Our October Newsletter is dedicated to Maternal Health

Our newsletter format will feature important industry news, periFACTS® programs and books, and a sneak peek into what's new this month for our monthly subscribers!

In The News

[Most pregnancy-related deaths could be avoided](#)

The CDC's Maternal Mortality Review Committees found that from 2017 to 2019, more than eight out of 10 pregnancy-related deaths in the US could have been prevented, including those related to mental health conditions, heart disease, hemorrhaging, blood clots, infection and cardiomyopathy.

Axios (9/2022)

[Health insurers use technology to improve maternal health](#)

Payers are implementing new programs that capitalize on telehealth and partnerships with technology companies to better engage pregnant members and improve maternal health outcomes.

Health Payer Intelligence (9/2022)

[Study links T1D in pregnancy to overnight hypoglycemia](#)

Pregnant women with type 1 diabetes had a higher risk of hypoglycemia at night, aside from having a persistent risk of hypoglycemic episodes during the day.

Medical Dialogues (9/2022)

[Pregnant women in rural areas more likely to deliver early](#)

Pregnant women living in rural counties of the United States were more likely to deliver before 39 weeks' gestation compared with those living in non-rural counties, according to a retrospective cohort study.
