**UR**  
MEDICINE

*You are cordially invited to  
**An Evening with Dr. Michael Gottlieb***

***Hear the Story of How One Disease Changed His Career and Life.***

Michael Gottlieb '73M (MD), '74M (Res), '77M (Res), Associate Clinical Professor of Medicine, David Geffen School of Medicine at UCLA, is one of the most renowned HIV/AIDS specialists in the world.

In 1981, he made history when he identified AIDS as a new disease. His patients included *Rock Hudson* and *Elizabeth Glazer*, and with the late actress *Elizabeth Taylor* and *Dr. Mathilde Krim*, he co-founded the American Foundation for AIDS Research (AMFAR). He is currently the medical advisor to the Board of the Global AIDS Interfaith Alliance, and continues to see patients in his private practice in Los Angeles, CA.

**University of Rochester  
Panel of Experts**

For nearly 30 years, the University of Rochester Medical Center (URMC) has been a leader in research to improve the prevention, detection, and treatment of HIV/AIDS. We were recently awarded two National Institutes of Health grants to develop new vaccine strategies to prevent HIV. Our panel's work shows promise not only for HIV/AIDS, but for neurocognitive disorders and other diseases characterized by chronic inflammation such as multiple sclerosis and heart failure.
