About FAB

The Pediatric Behavioral Health & Wellness Family Advisory Board (FAB) is a group that provides an opportunity for parents, guardians, young adults and older teens to meet with senior staff members of our organization.

Our FAB offers a convenient way to discuss current and proposed services, policies and educational materials, as well as operational procedures. The feedback we receive enables us to best serve our patients and their families.

FAQs

Q: Are there any requirements to participate?
A: To take part in our FAB, all you need to do is simply listen with an open mind, be comfortable expressing your opinion in a group setting and provide feedback on current services, new initiatives and ways to enhance each family’s experience with us.

Q: How often does the board meet?
A: FAB meetings are held four times per year and are scheduled for 90 minutes. Refreshments are provided.

Q: Why should you participate?
A: Our Pediatric Behavioral Health & Wellness team values your feedback because it helps ensure that our services and initiatives will meet the needs of our patients. Families on our FAB say, “We participate because we feel it makes a difference.”

We appreciate your feedback!

The mission of our service is to meet the emotional and behavioral healthcare needs of those in the community we serve – and we believe input from families is critical to our success in achieving this goal. Your input helps us better serve our patients.

Please tear-off this section and leave with the Front Desk if you are interested in hearing more about our FAB.
