Certified Community Behavioral Health Clinic

Substance Use Disorder Services

UR Medicine Pediatric Behavioral Health & Wellness has recently implemented a new model of care for behavioral health and substance use disorders called Certified Community Behavioral Health Clinics (CCBHC).

This innovative model brings together behavioral, chemical and physical health care for people with behavioral health and substance use disorders. CCBHC serves as a “one-stop shop” to help adults, adolescents and children get the help they need.

Services

As part of the CCBHC model, we provide Substance Use Disorder Services within our behavioral health setting. These services include:

- Substance Use Disorder evaluations
- Impaired DWI/DUI evaluations
- Individual, group and family therapy for substance use
- Onsite drug and alcohol screenings
- Onsite breathalyzer testing
- Consultations
Payment and Insurance

Our services are covered by most health insurance plans. If you have questions about insurance coverage, co-payments, financial assistance or billing, you may contact our financial advisor at (585) 279-7823.

As part of our onsite drug and alcohol screenings, individuals with certain insurances may be subject to an additional fee. Please consult with your insurance company and/or the Substance Use Disorder therapist with any questions or concerns about your insurance coverage for Substance Use services.

Contact

Please consult with your primary therapist for further information or to initiate a substance use assessment.
