Coronavirus - Social Story
Sometimes people get sick.
When people get sick, it is because of germs. Germs can live on all things. We can't see germs.
There is a new sickness called Coronavirus.
Coronavirus germs can spread easily from person to person.
If bad germs stick on me, I can get sick.
I need to wash my hands with soap so that I can stay healthy!
When I wash my hands with soap, I can sing “Happy Birthday”, or I can count to 20 while I scrub my hands.
If I have to sneeze or cough, I will sneeze or cough into my elbow.
This will make sure my hands are clean and that I don’t spread germs.
My school might close to make sure the germs don’t spread to other people.
If my school closes, the janitors will clean it to get rid of all of the germs.
While my school is being cleaned, I will stay at home with my family.
I will stay healthy and safe at home!
My teacher might give some work for me to work on while school is closed.
This will keep my brain working hard!
I will go back to school very soon!
I can protect myself from germs by washing my hands, and staying at home.
THE END
