

# SUBJECTS NEEDED FOR AUTISM RESEARCH

Reimbursement  
\$15 per hour

MEDICINE of THE HIGHEST ORDER

## Cognitive Neurophysiology Lab

We are recruiting children and adults **with** and **without autism** for a study to better understand visual, auditory, and tactile perception.

Participation will include at least two visits (~2-3 hrs each). The participant will be asked to look at objects on a screen, listen to sounds via headphones, or feel different sensations on their hand while we monitor brain activity with electroencephalogram (EEG)

### Subjects should:

- Be age 6 years old and up
- Have normal hearing
- Have normal (or corrected-to-normal) vision
- Have no history of major head injury
- Subjects with autism should have a formal clinical diagnosis

**ALL LEVELS OF COGNITIVE  
AND VERBAL ABILITY ARE**
