The Importance of Population Health Analytics in Value-Based Care

Irena Pesis-Katz, PhD
Senior Director of Population Health Informatics and Payment Innovation &
David Krusch, MD
Chief Medical Information Officer

In value-based care, the payment structure is the underpinning for measuring return on investment. Patient volume as a revenue source is being replaced by dollars tied to risk with this extending to premiums, capitation and allocations of care dollars. This session will share the experiences of our healthcare system leveraging its investment in Epic to create a flexible data warehouse information chassis and how the platform uses the wealth of the local chart data alongside key external information (claims, network clinical information, etc) and analytics. Early high-value high-ROI deliverables built on the foundation will be also shared and discussed.

Friday, February 3, 2017
Helen Wood Hall Auditorium
12:00 pm – 1:00 pm

Assorted wraps will be available while supplies last. Bring your own beverage.

ASL interpreters or other accommodations are available upon request.
Contact Jennifer VanRy @ 224-2061 or Jennifer_VanRy@urmc.rochester.edu with requests and/or questions.
