MEDICINE of THE HIGHEST ORDER

Critical Care Nursing Symposium

September 17, 2018
University of Rochester MC
Arthur Kornberg
Medical Research Building
Class of '62 Auditorium

Critical Care Nursing Symposium

Purpose:

The Critical Care Nursing Symposium will enable the learner to gather practical and evidence-based knowledge through the educational sessions on the topics below:

AACN Theme: "Our Voice, Our Strength"

Hypertensive Crisis

Targeted Temperature Management

Right Line, Right Now! Making the Best Vascular Access Decision

Night Shift: How Nurses and Patients can Adapt to the Dark

Organ Donation Overview

Target Audience:

The Critical Care Nursing Symposium's intended audience includes nurses who care for acute or critically ill patients in community and teaching hospitals. Nursing students who are interested in critical care or progressive care after graduation are also targeted.

The University of Rochester Center for Nursing Professional Development is accredited with distinction as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

Contact Hours:

This activity will provide 5.50 contact hours

Learning Objectives:

- Discuss the importance of using our voice as our strength to promote patient safety and improve outcomes.
- Describe pathophysiology of hypertensive crisis, its impact on various systems in the body, and potential treatment options.
- Discuss indications for targeted temperature management and describe different applications of the therapy based on patient condition.
- Explore the physical and physiological impact of night shift on nurses and patients and discuss how patient care is impacted on night shift.
- Distinguish between specific therapies related to donation in brain dead donors and explore cutting edge donation techniques.
- Outline device options for vascular access in emergent, urgent, and medically necessary situations and review anatomical characteristics and locations for device insertion, nerve, artery, and vein structures

Exhibits:

- Learner will review newest medical technology and pharmaceuticals that may assist critical care nurses in providing better care and improved outcomes for critically ill patients.
