

SUBJECTS NEEDED FOR AUTISM RESEARCH

Reimbursement
\$18 per hour
\$25 for parent
of participant

MEDICINE of THE HIGHEST ORDER

Spectrum Brain Lab

We are recruiting children **with** and **without** autism or **ADHD** for a study to better understand sensory perception.

Participation will include at least two visits (~3-4 hrs each). The participant will be asked to look at objects on a screen or in virtual reality and listen to sounds via headphones while we monitor brain activity with electroencephalogram (EEG), and will participate in psychological testing.

Subjects should:

- Be 7-12 years old
- Have normal hearing
- Have normal (or corrected-to-normal) vision
- Have average or above average IQ
- Have no history of major head injury or seizures
- Subjects with autism or ADHD must already have a formal clinical diagnosis
