ELCOMED SA-310 PROFESSIONAL KIT W/LED

The W&H Elcomed is the number one maxillofacial surgery and implantology motor in the operating theater. All settings can easily be changed through a single screen. The Elcomed motor has a speed range of 300 - 50,000 rpm and up to 80 Ncm on the rotary instrument and is the shortest and lightest of its kind. The Elcomed has an automatic thread cutter function and six individually adjustable program locations that can be changed or edited at any time in any program. The motor with cable and motor holder are sterilizable (135° C) and thermo washer disinfectable. Complete torque documentation is provided via USB-stick and saved data can be viewed in .bmp and .csv formats.

\$9,000

EQUIPMENT

9.

COMPLETE BASIC STAINLESS KIT

Guide Right (TM) Kits are designed to provide the necessary components used to create a guide for guiding the implant placement process. Each kit type contains a different combination of posts, inserts, sleeves and supporting accessories. Several different kit configurations are offered, depending on the implant size and the specific surgical procedure. Parts are autoclavable and reusable
