Packets should be sent by check or credit card 

To register in advance for the Esthetic Conference by January 3, 2014 

Bottom Line.

The Academy of Dental Occlusion.

The program will provide participating dentists with comprehensive hands-on understanding of specific treatment areas. It is geared towards professionals within the fixed and removable prosthetics area of dentistry. Material and the American Dental Association, Dr. Burgess will conduct 6-8 hours of structured didactic and clinical education courses. He is a graduate of Denroy University, School of Dentistry, New York City. He possesses over 30 years of experience, including over 20 years in private practice and 10 years as a professor of clinical dentistry.

Participants will be provided with the 

is a part-time practice with an emphasis on fixed prosthodontics and occlusion, operative dentistry and endodontics from the same university. From 1997 to 1999, he was a visiting professor at the University of Santiago de Compostela. After conducting two years of research in the United States, Dr. Burgess returned to Sweden to work at the University of Umeå.

He is currently Professor and Director of Continuing Education in General Dentistry as well as the programs in Periodontics, Prosthodontics and 

in Clinical Dentistry. He has written several scientific articles and has lectured extensively in the United States and abroad.

Kimberly (Kimm) McCubrey Dr. Hans Malmström, Division Chair of General Dentistry and Director of the AGD Fellowship Program at the University of Rochester Eastman School of Dentistry, Rochester, NY

He is Professor of Professions of Continuum Dental Education at Eastman Institute for Oral Health in Rochester, New York. He is the University's expert on esthetic dentistry and facial esthetics for dentists and his areas of expertise include: the use of composite materials and ceramics to enhance the perception of oral function; the color and form of porcelain restorations and the use of porcelain veneers.

To advance the skills of the participant in the clinical setting, where patients are treated under the guidance of the superb restorative dentists of the Eastman Institute for Oral Health. 

The participants then have the opportunity to apply the specific techniques in a lab setting, after which they can then observe the participation and the use of over-the-shoulder assistance from the faculty.

Interested participants may then advance to a more intensive level of training in a series of modules, where emphasis will be on the clinical setting, where patients are treated under the guidance of the superb restorative dentists of the Eastman Institute for Oral Health.
