It takes 17 years to turn 14 % of
original research to the benefit of
patient care
(Balas & Boren, 2000)

Implementation

Dissemination

Diffusion

“Make it happen”

“Help it happen”

“Let it happen”

(Greenhalgh et al., 2004; Lomas, 1993)

ACHIEVING STRONG IMPLEMENTATION PROCESS EFFICIENTLY AND THOROUGHLY TO IMPROVE HEALTH EQUITY

THE IMPLEMENTATION JOURNEY

“METHOD TO THE MADNESS”

- Implementation of new innovations entails extensive planning, training, and quality assurance
- Involves a complex set of interactions between developers, system leaders, front line staff, and consumers
- Recursive process of well-defined stages or steps that are not necessarily linear

IMPLEMENTATION PROCESS MODELS

- Describe and/or guide the process of translating research into practice
- Recognize a temporal sequence of implementation endeavors
- Specify steps (stages, phases) of implementation

Nilson, P. (2015). Making sense of implementation theories, models, and frameworks. *Implementation Science*, 10, 53.

IMPLEMENTATION PROCESS AND HEALTH EQUITY

Elements of Implementation Science that can Support Advancements in Health Equity

- Focus on reach from the very beginning
- Design and select interventions for vulnerable populations and low-resource communities with implementation in mind
- Implement what works and develop implementation strategies that can help reduce inequities in care

Baumann, A.A., Cabassa, L.J. (2020). Reframing implementation science to address inequities in healthcare delivery. *BMC Health Serv Res* 20, 190

Necessary to Achieve Positive **INTERVENTION** Outcomes Found in Clinical Trials

Adherence to Key Treatment Components

+

Delivering the Components with Competence

Treatment Integrity

Perepletchikova, F., Treat, T.A., & Kazdin, A.E. (2007). Treatment integrity in psychotherapy research: Analysis of the studies and examination of the associated factors. *Journal of Consulting and Clinical Psychology*, 75, 829–841

IMPLEMENTATION FIDELITY

- Performing implementation activities with both **adherence** and **quality**
- Goal: To increase positive **IMPLEMENTATION** outcomes

VALUE OF UNDERSTANDING IMPLEMENTATION PROCESS

- Building Blocks for What Makes an Implementation Work

IMPLEMENTATION STRATEGIES ARE...

“...Methods or techniques used to enhance the adoption, implementation, and sustainability of a clinical program or practice”

OR

The “*how*” of implementation

Proctor, Powell, & McMillen, 2013

MEASURING WHAT AND HOW MUCH

EPIS IMPLEMENTATION FRAMEWORK

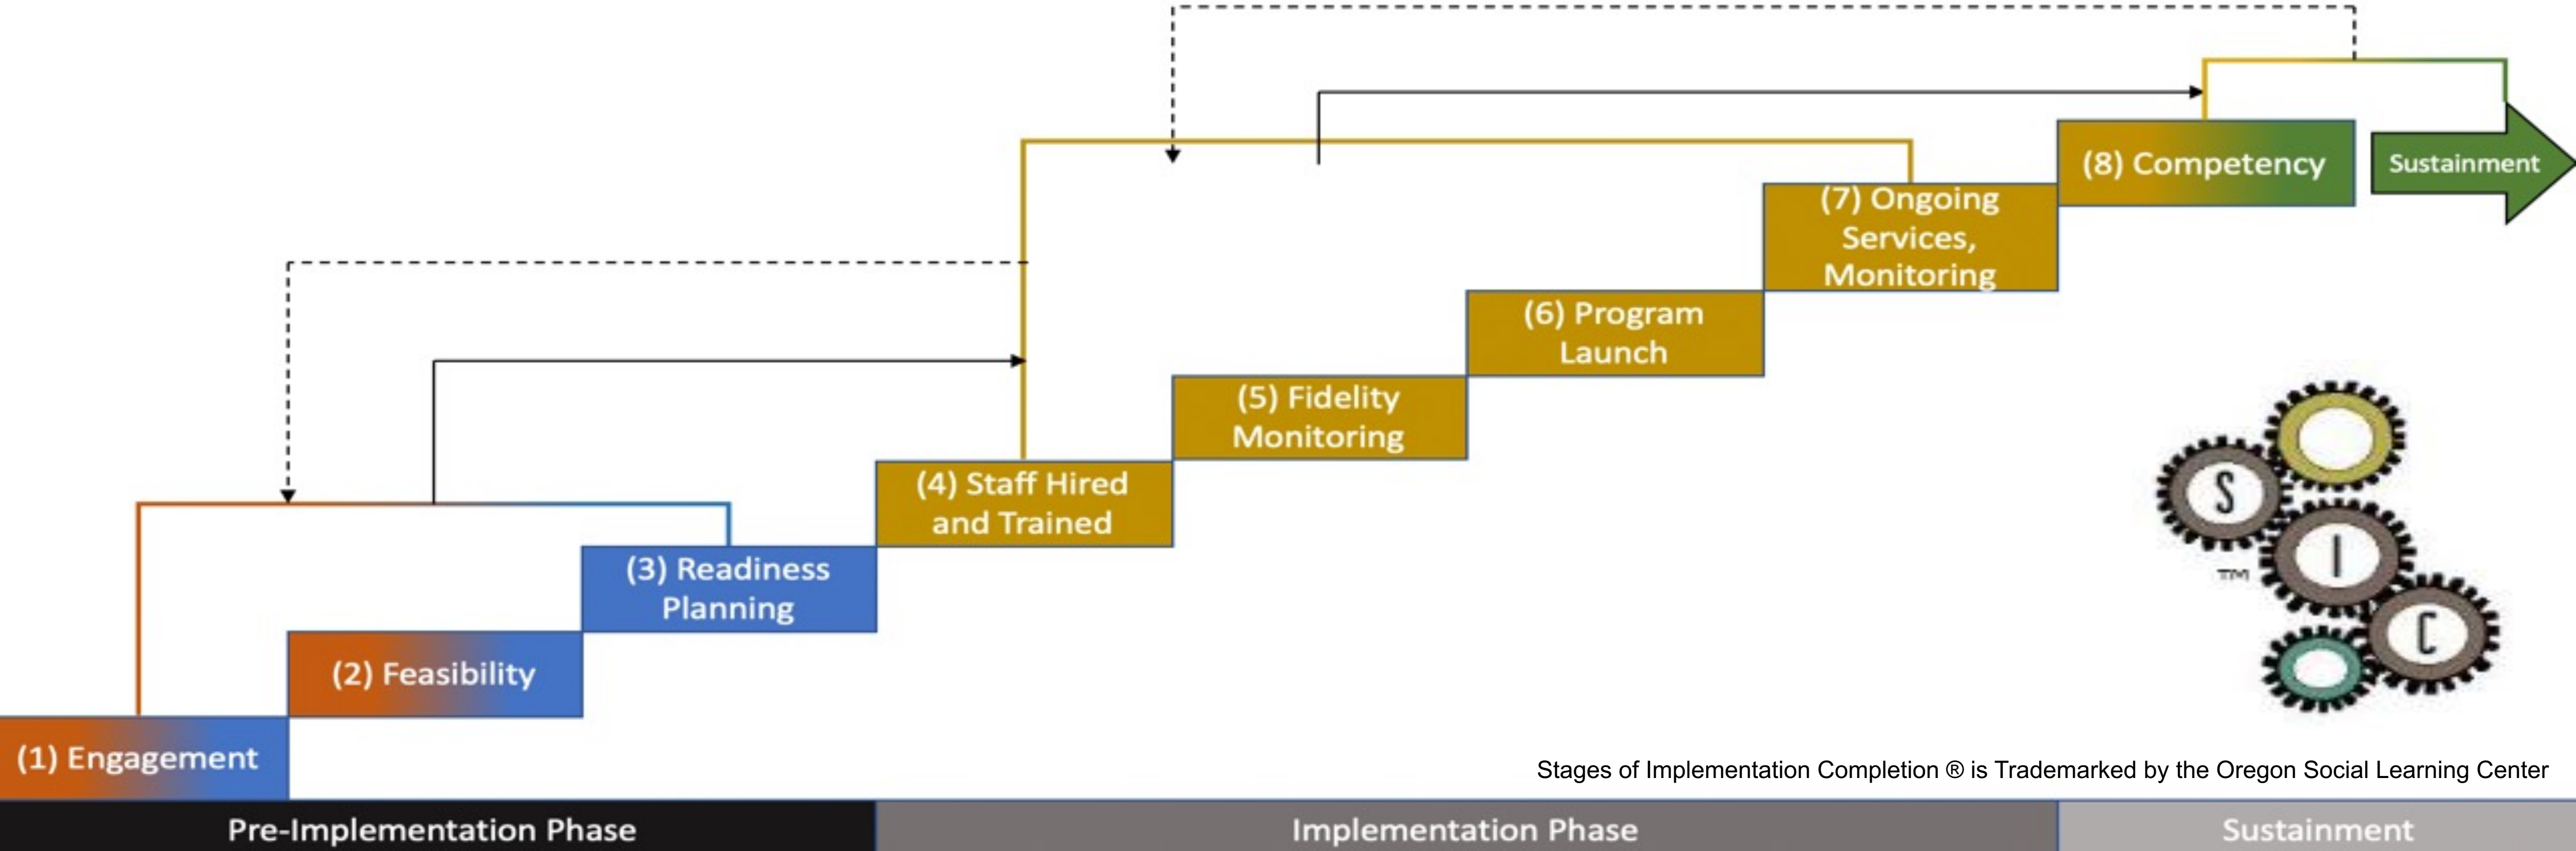

Aarons GA, Hurlburt M, Horwitz SM. 2011. Advancing a conceptual model of evidence-based practice implementation in public service sectors. *Adm. Policy Ment. Health Ment. Health Serv. Res.* 38:4–23

EPIS AND STAGES OF IMPLEMENTATION COMPLETION ®

Aarons GA, Hurlburt M, Horwitz SM. 2011. Advancing a conceptual model of evidence-based practice implementation in public service sectors. *Adm. Policy Ment. Health Ment. Health Serv. Res.* 38:4–23

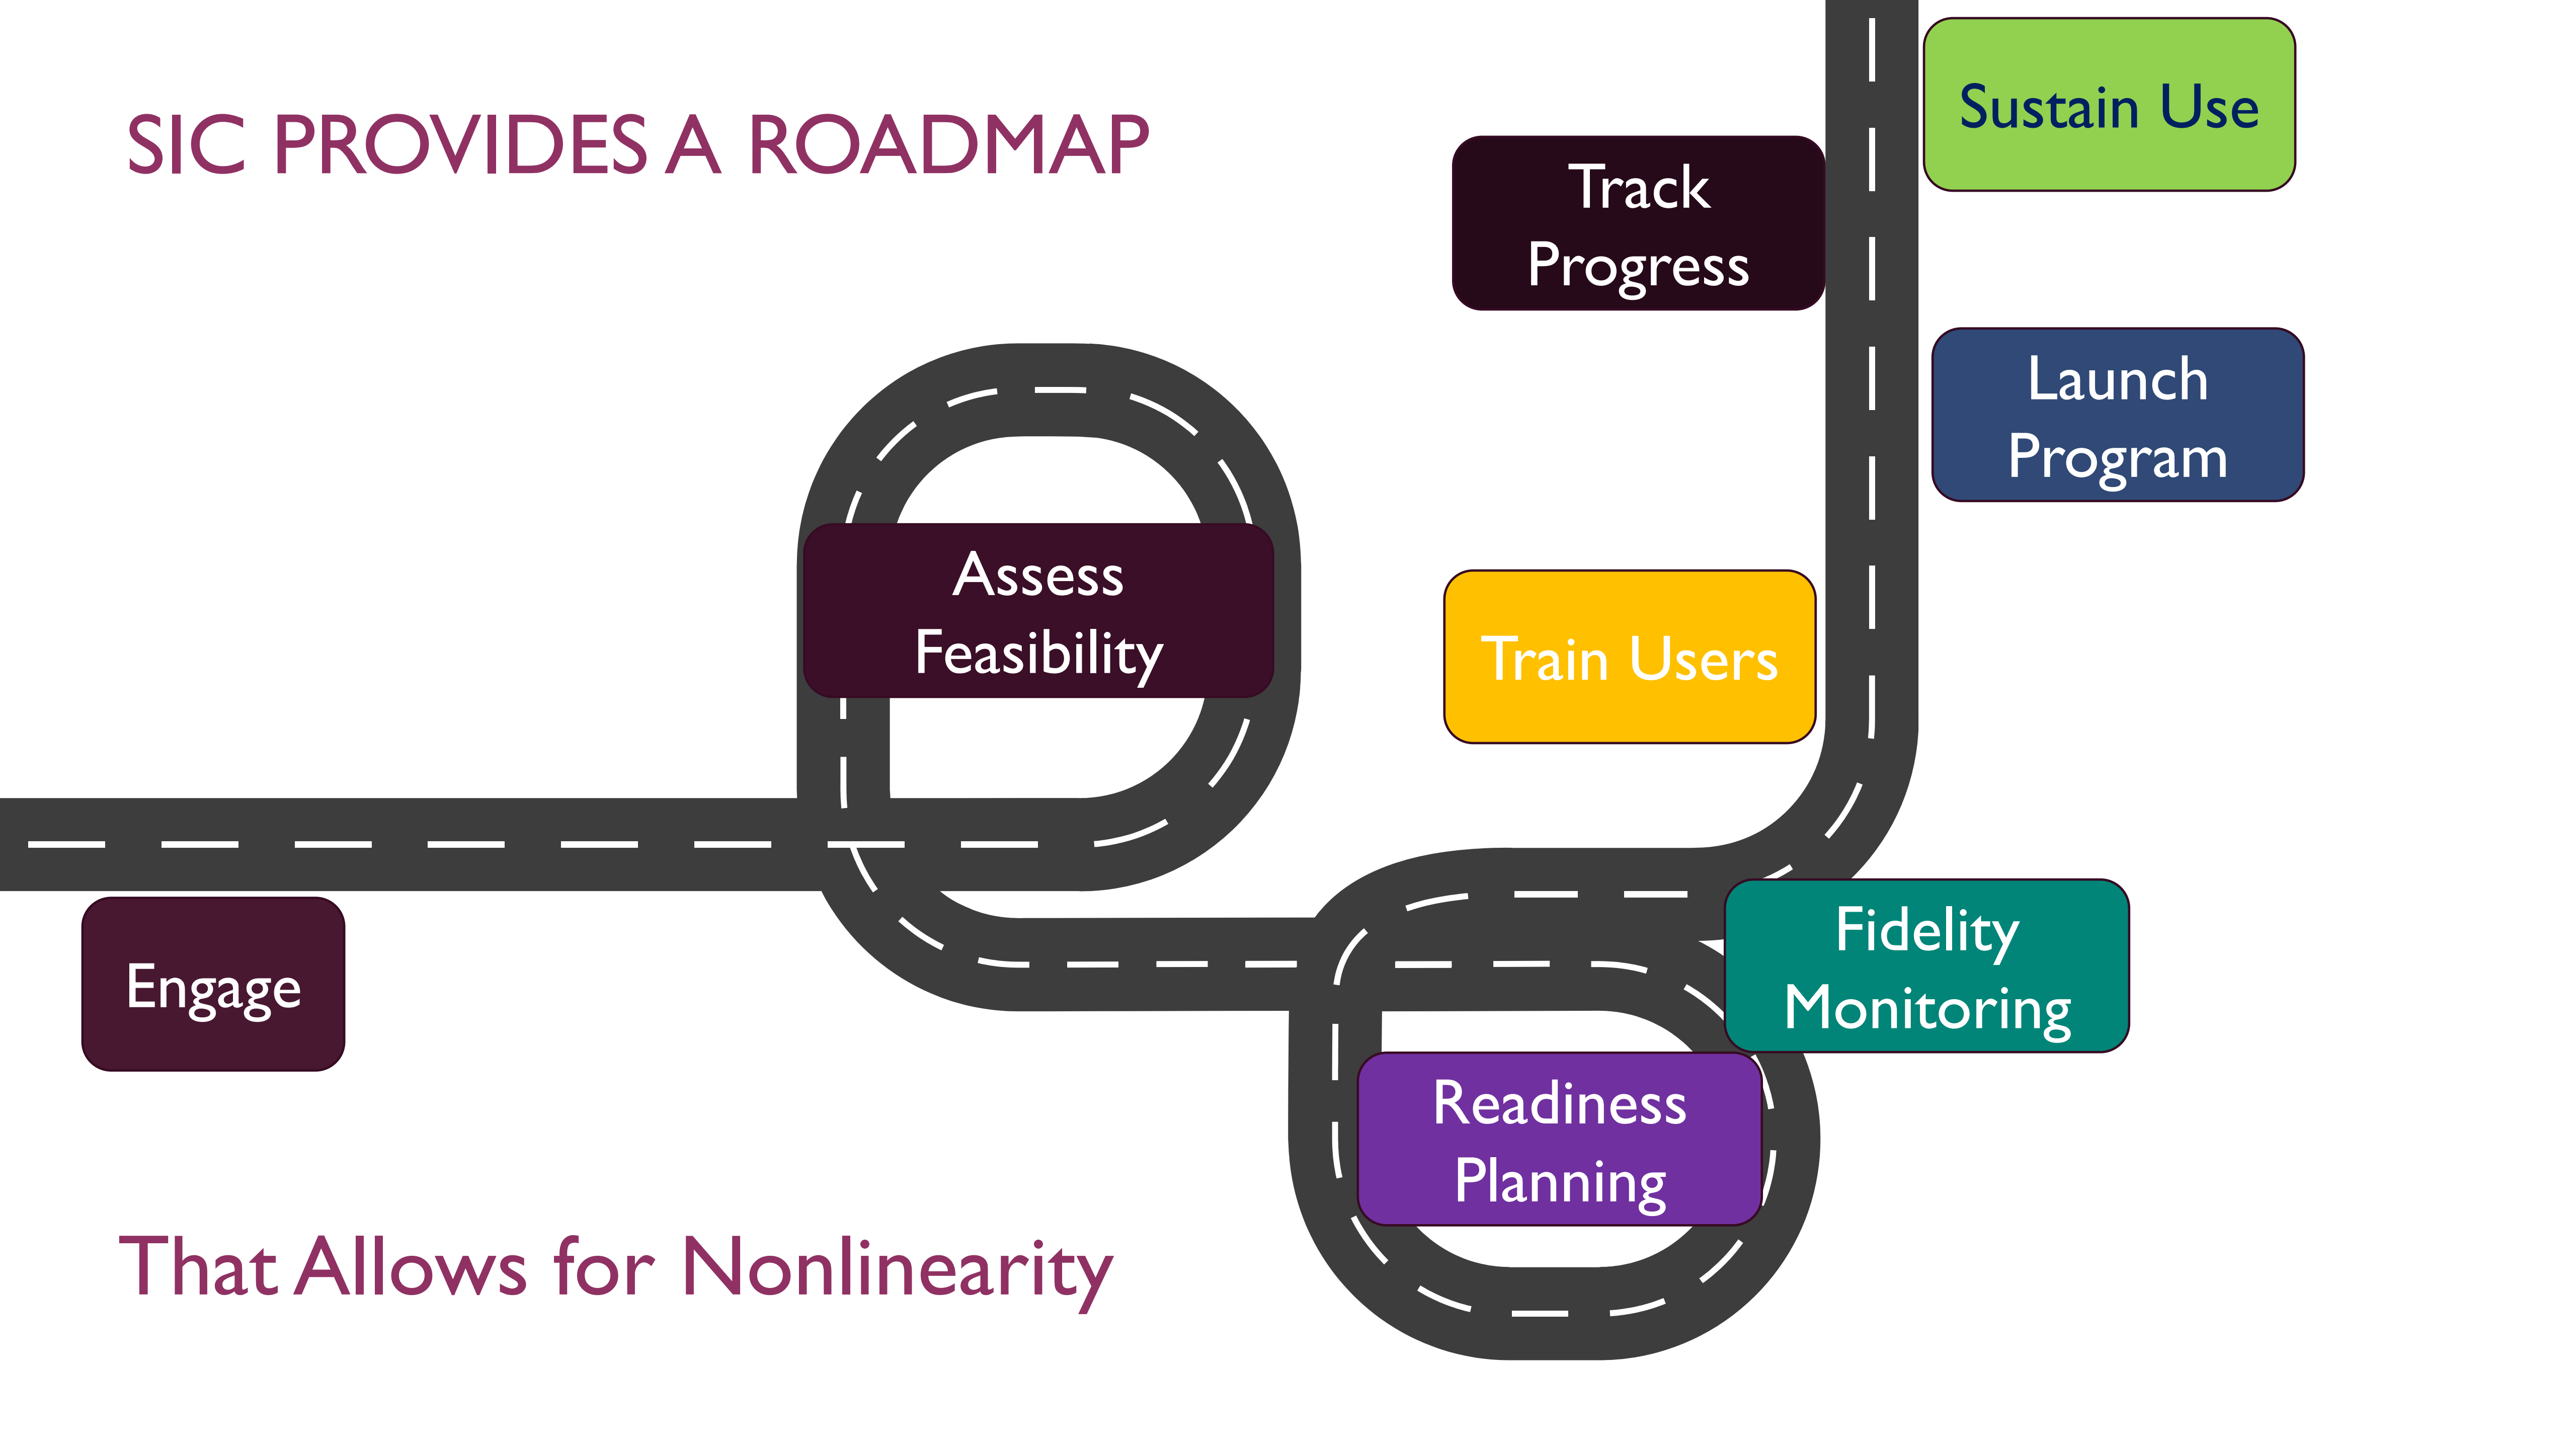

SAMPLE ACTIVITIES WITHIN EACH STAGE

1. Engagement
 - Date agreed to consider implementation
2. Consideration of Feasibility
 - Date of Community Partner Vision Meeting
3. Readiness Planning
 - Date of cost calculator/funding plan review
 - Date referral flow established
4. Staff Hired and Trained
 - Date of initial supervisor training
5. Fidelity and Adherence Monitoring Established
 - Date fidelity technology set-up
6. Services and Consultation Begin
 - Date of first patient enrolled
7. Ongoing Services, Consultation, Fidelity, Feedback
 - Date of Implementation Review #1
 - Date 50% of providers achieve 80% fidelity
8. Competency (certification)
 - Date first provider achieves certification standards

SIC PROVIDES A ROADMAP

That Allows for Nonlinearity

CONSORT Flow Diagram

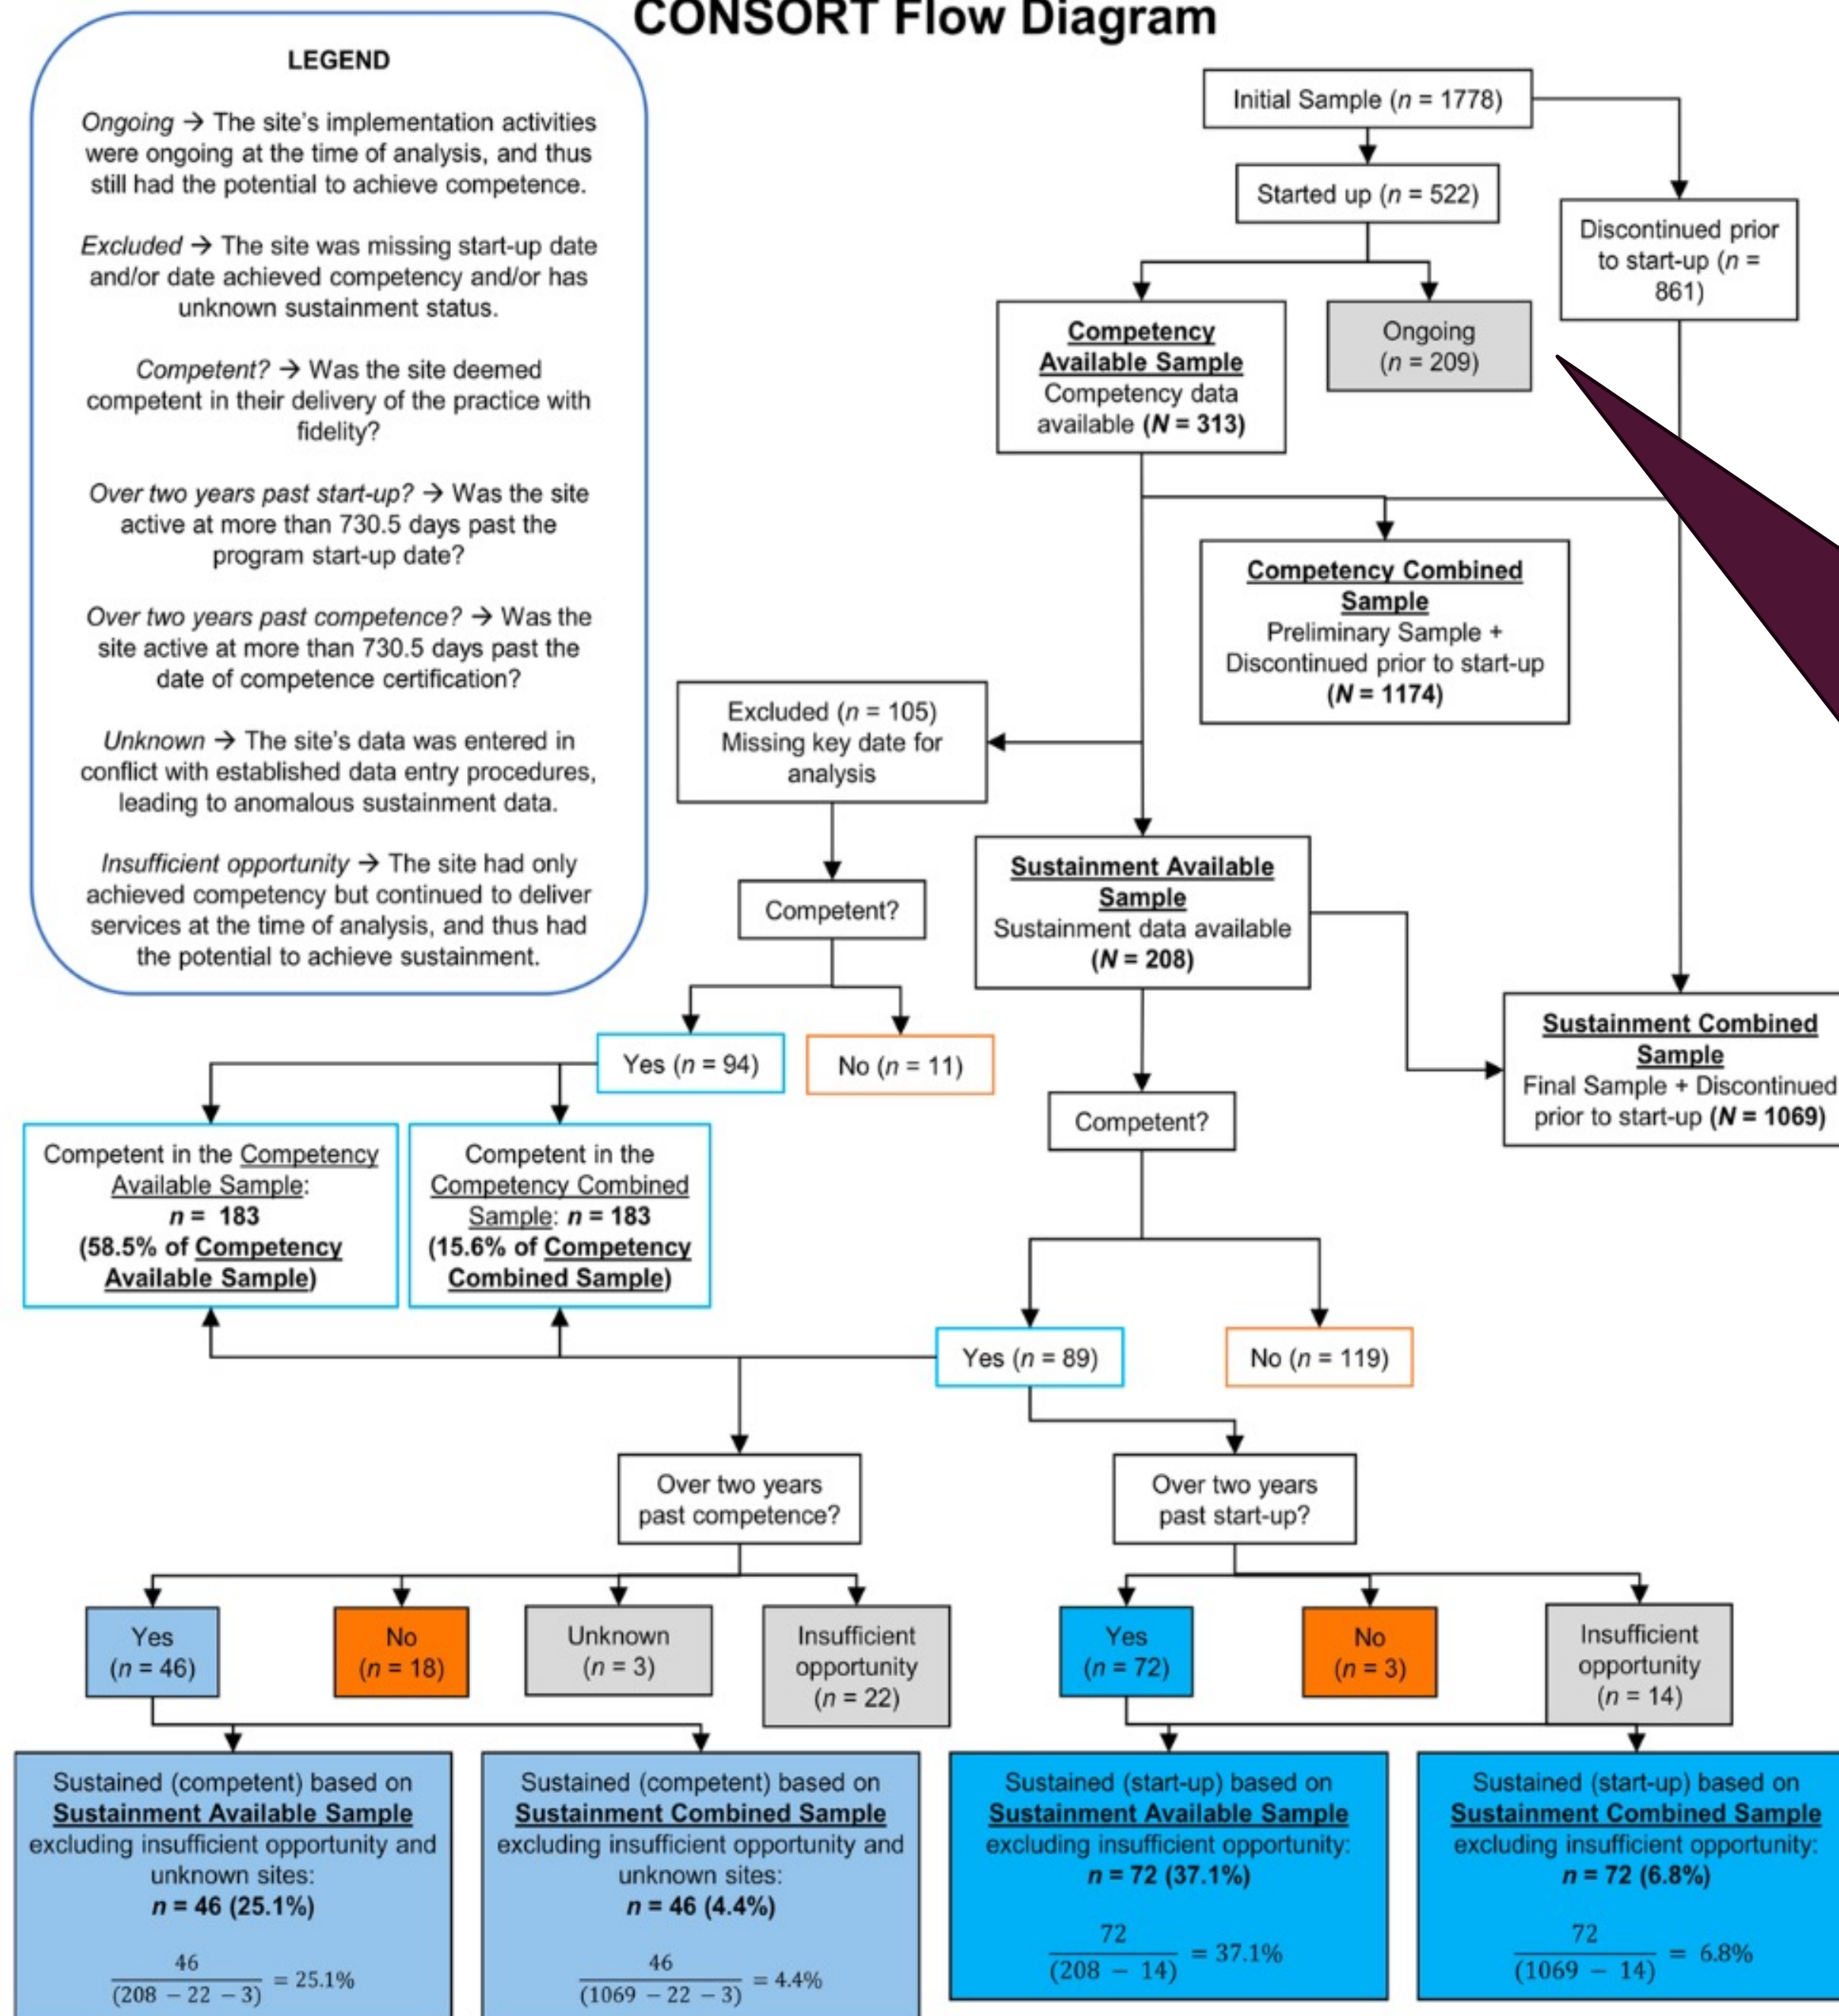

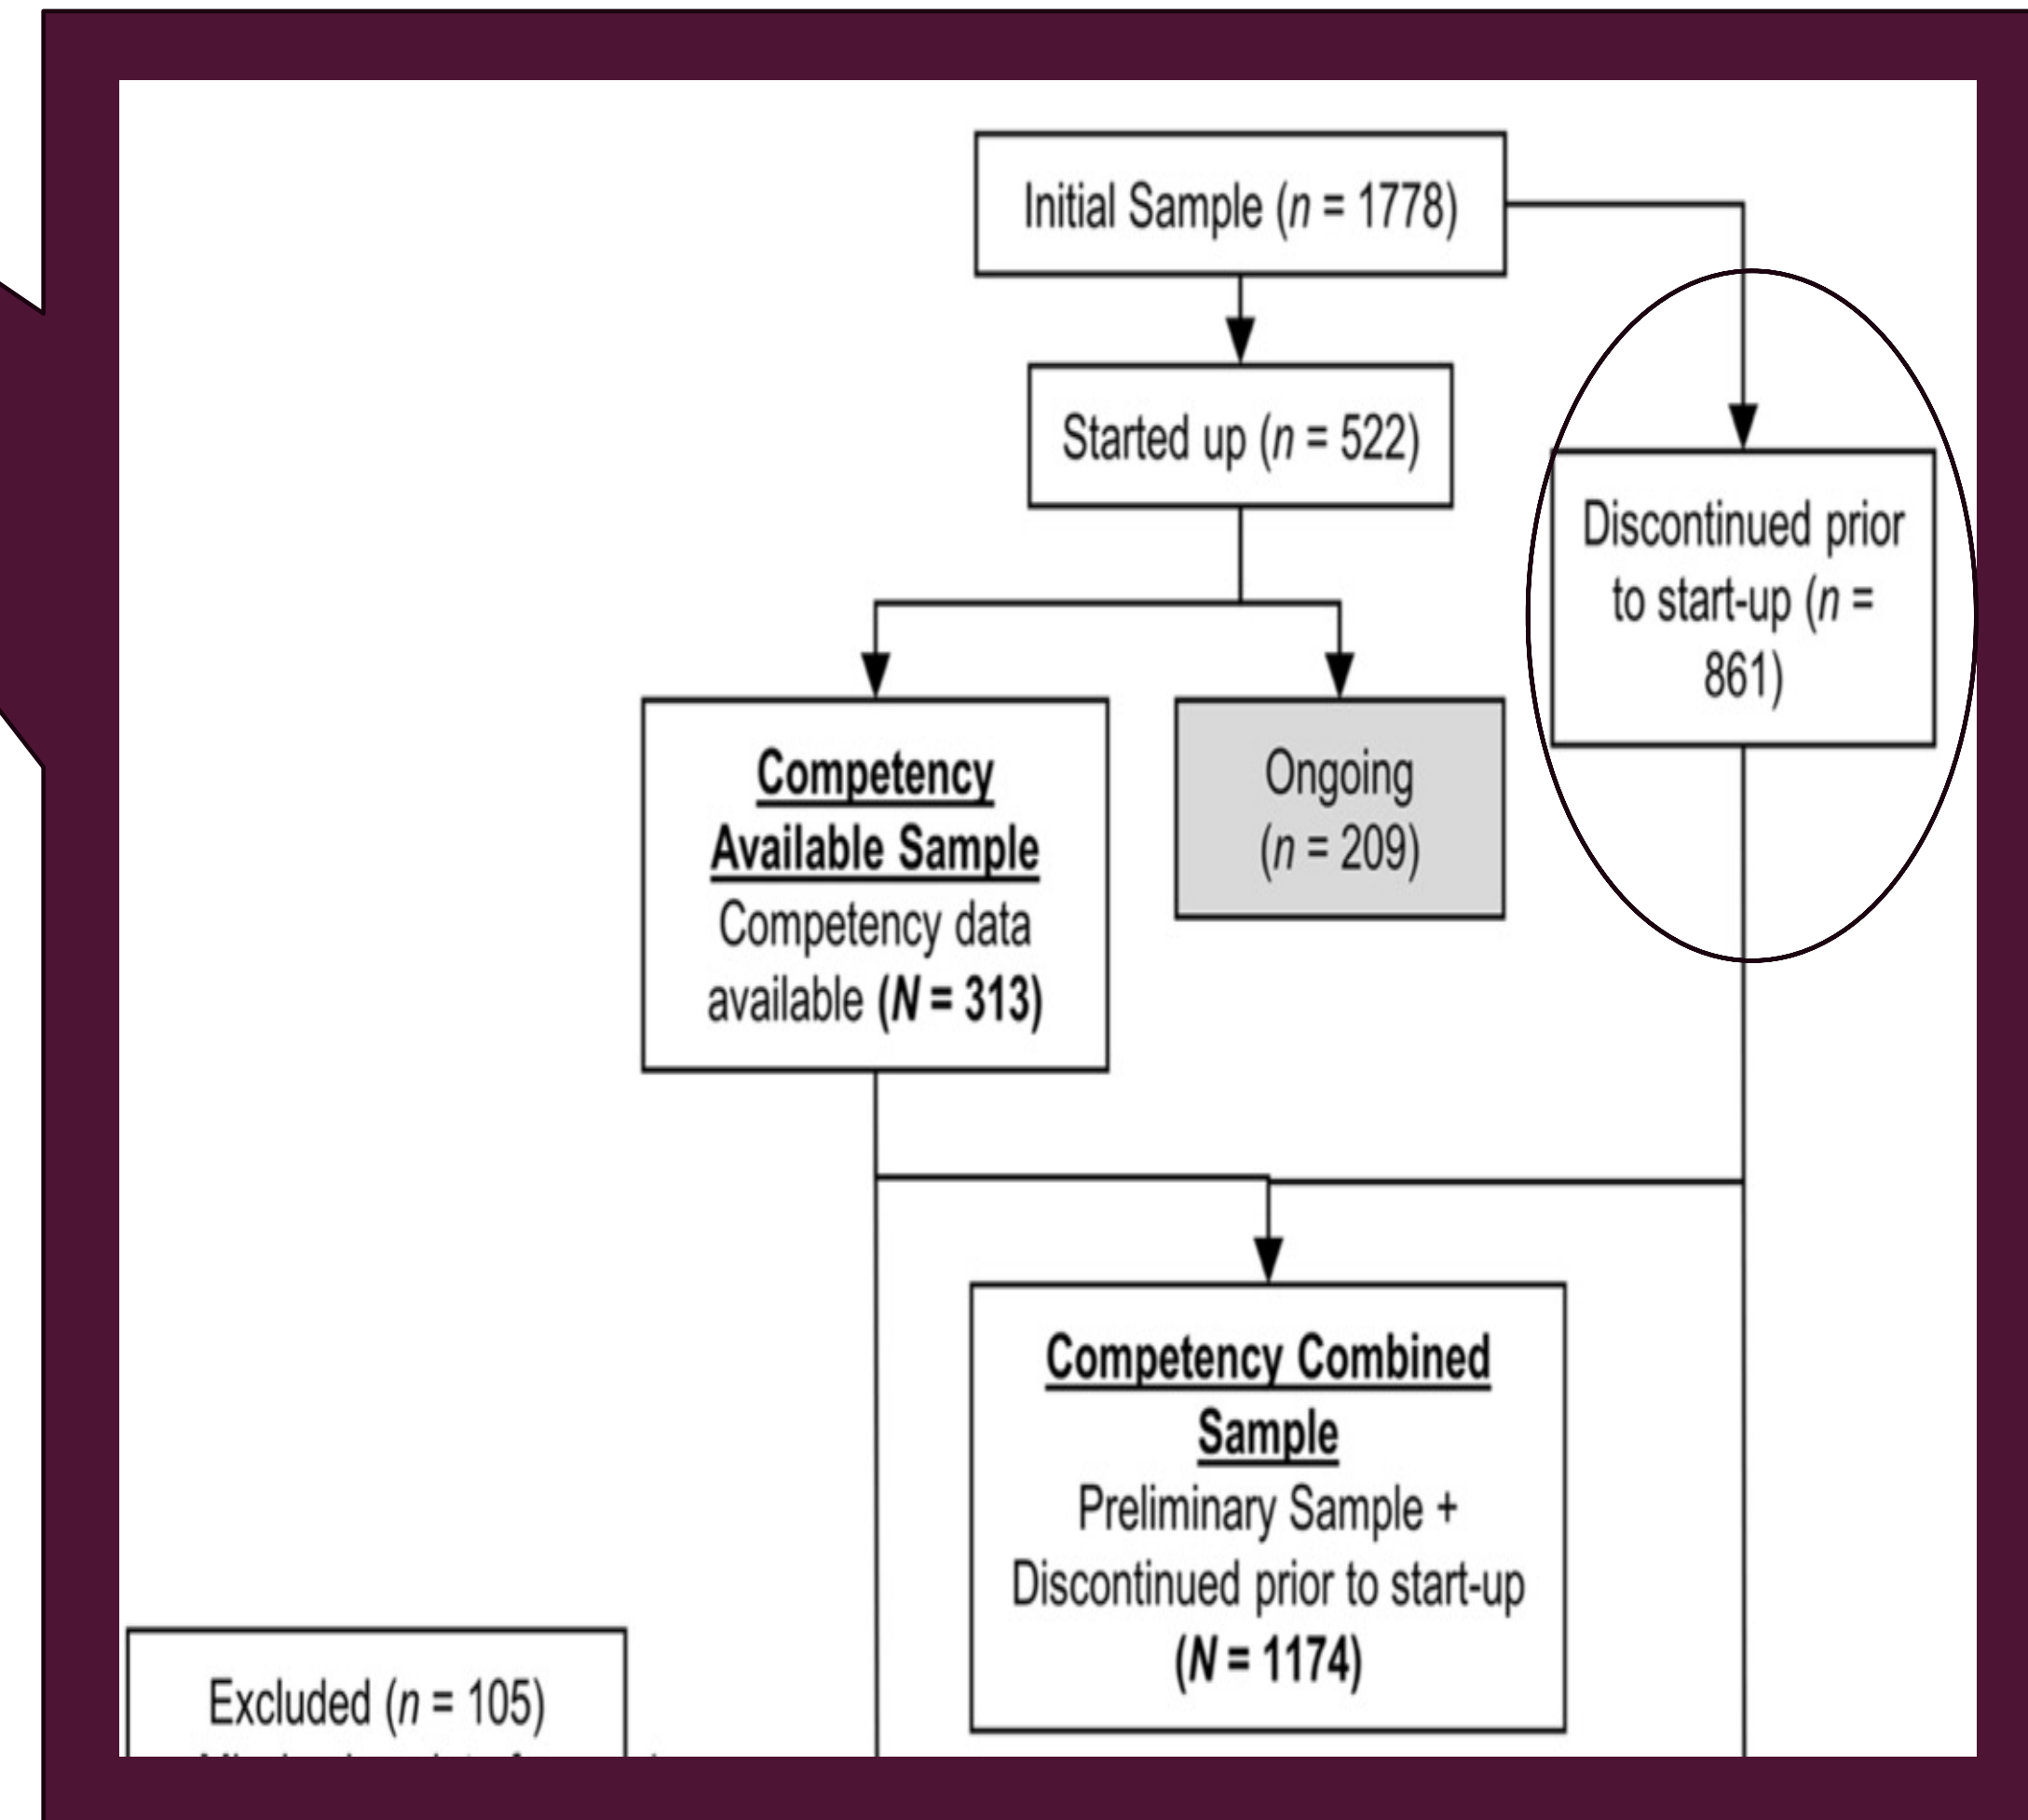

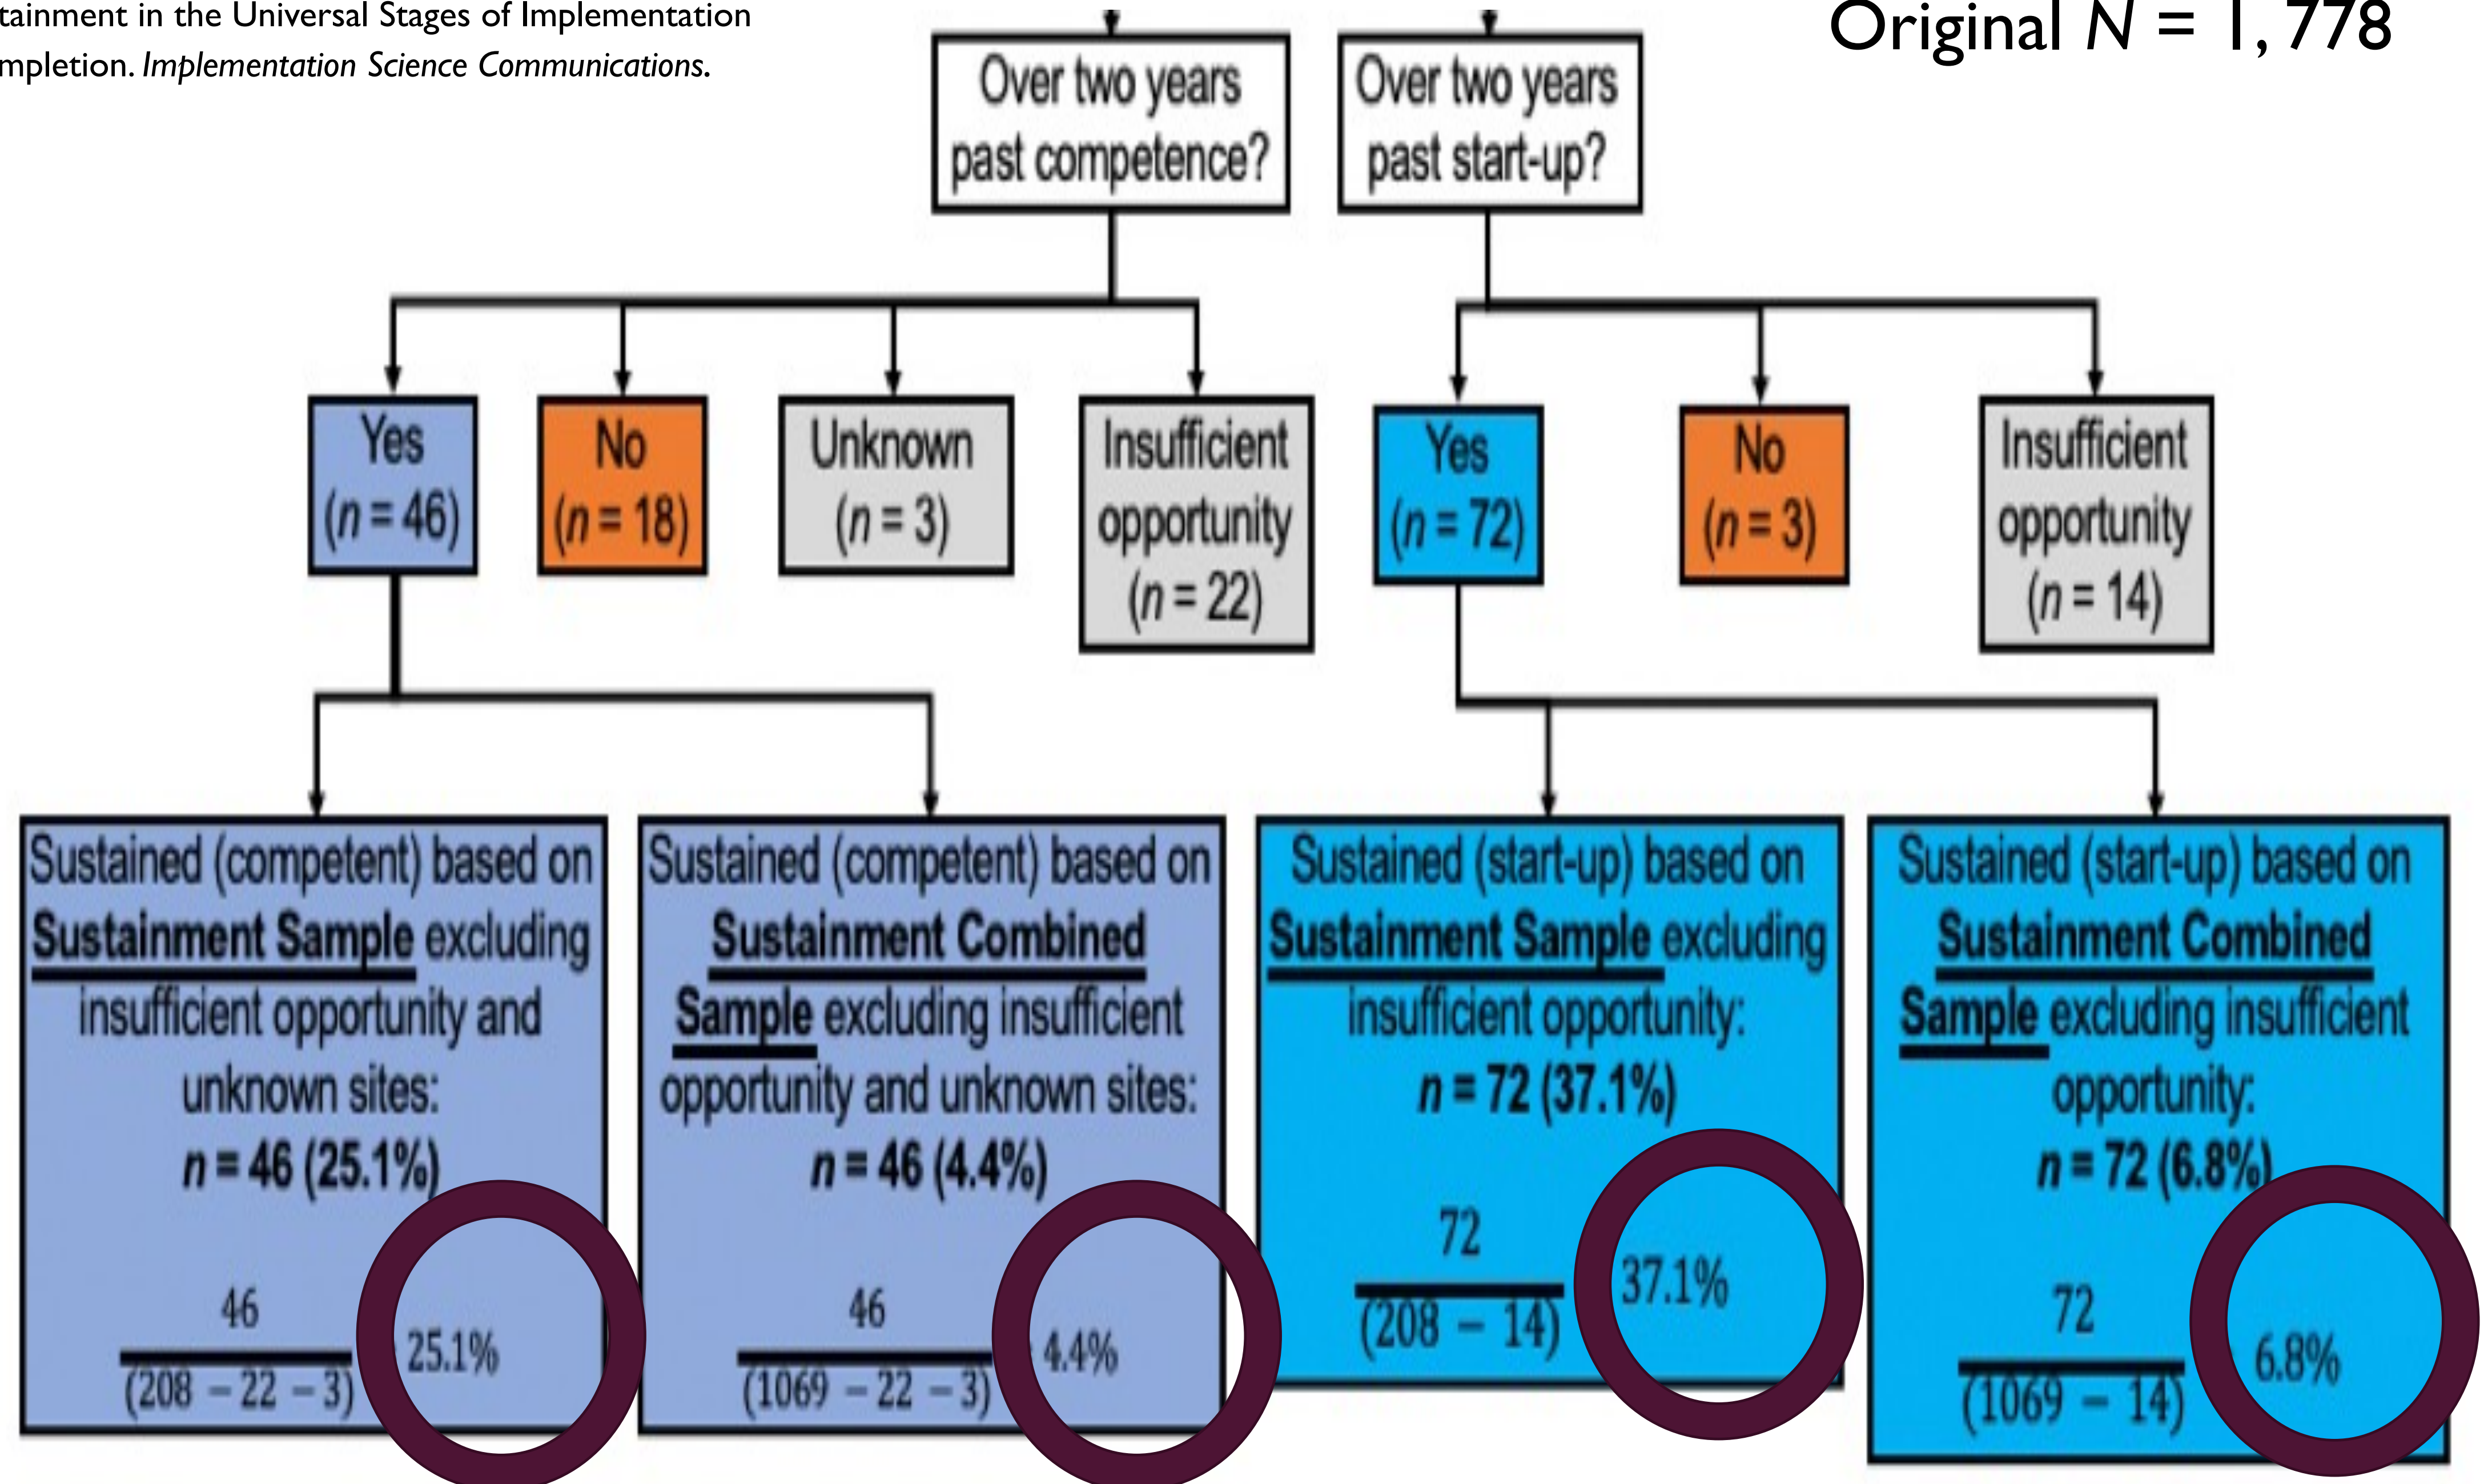

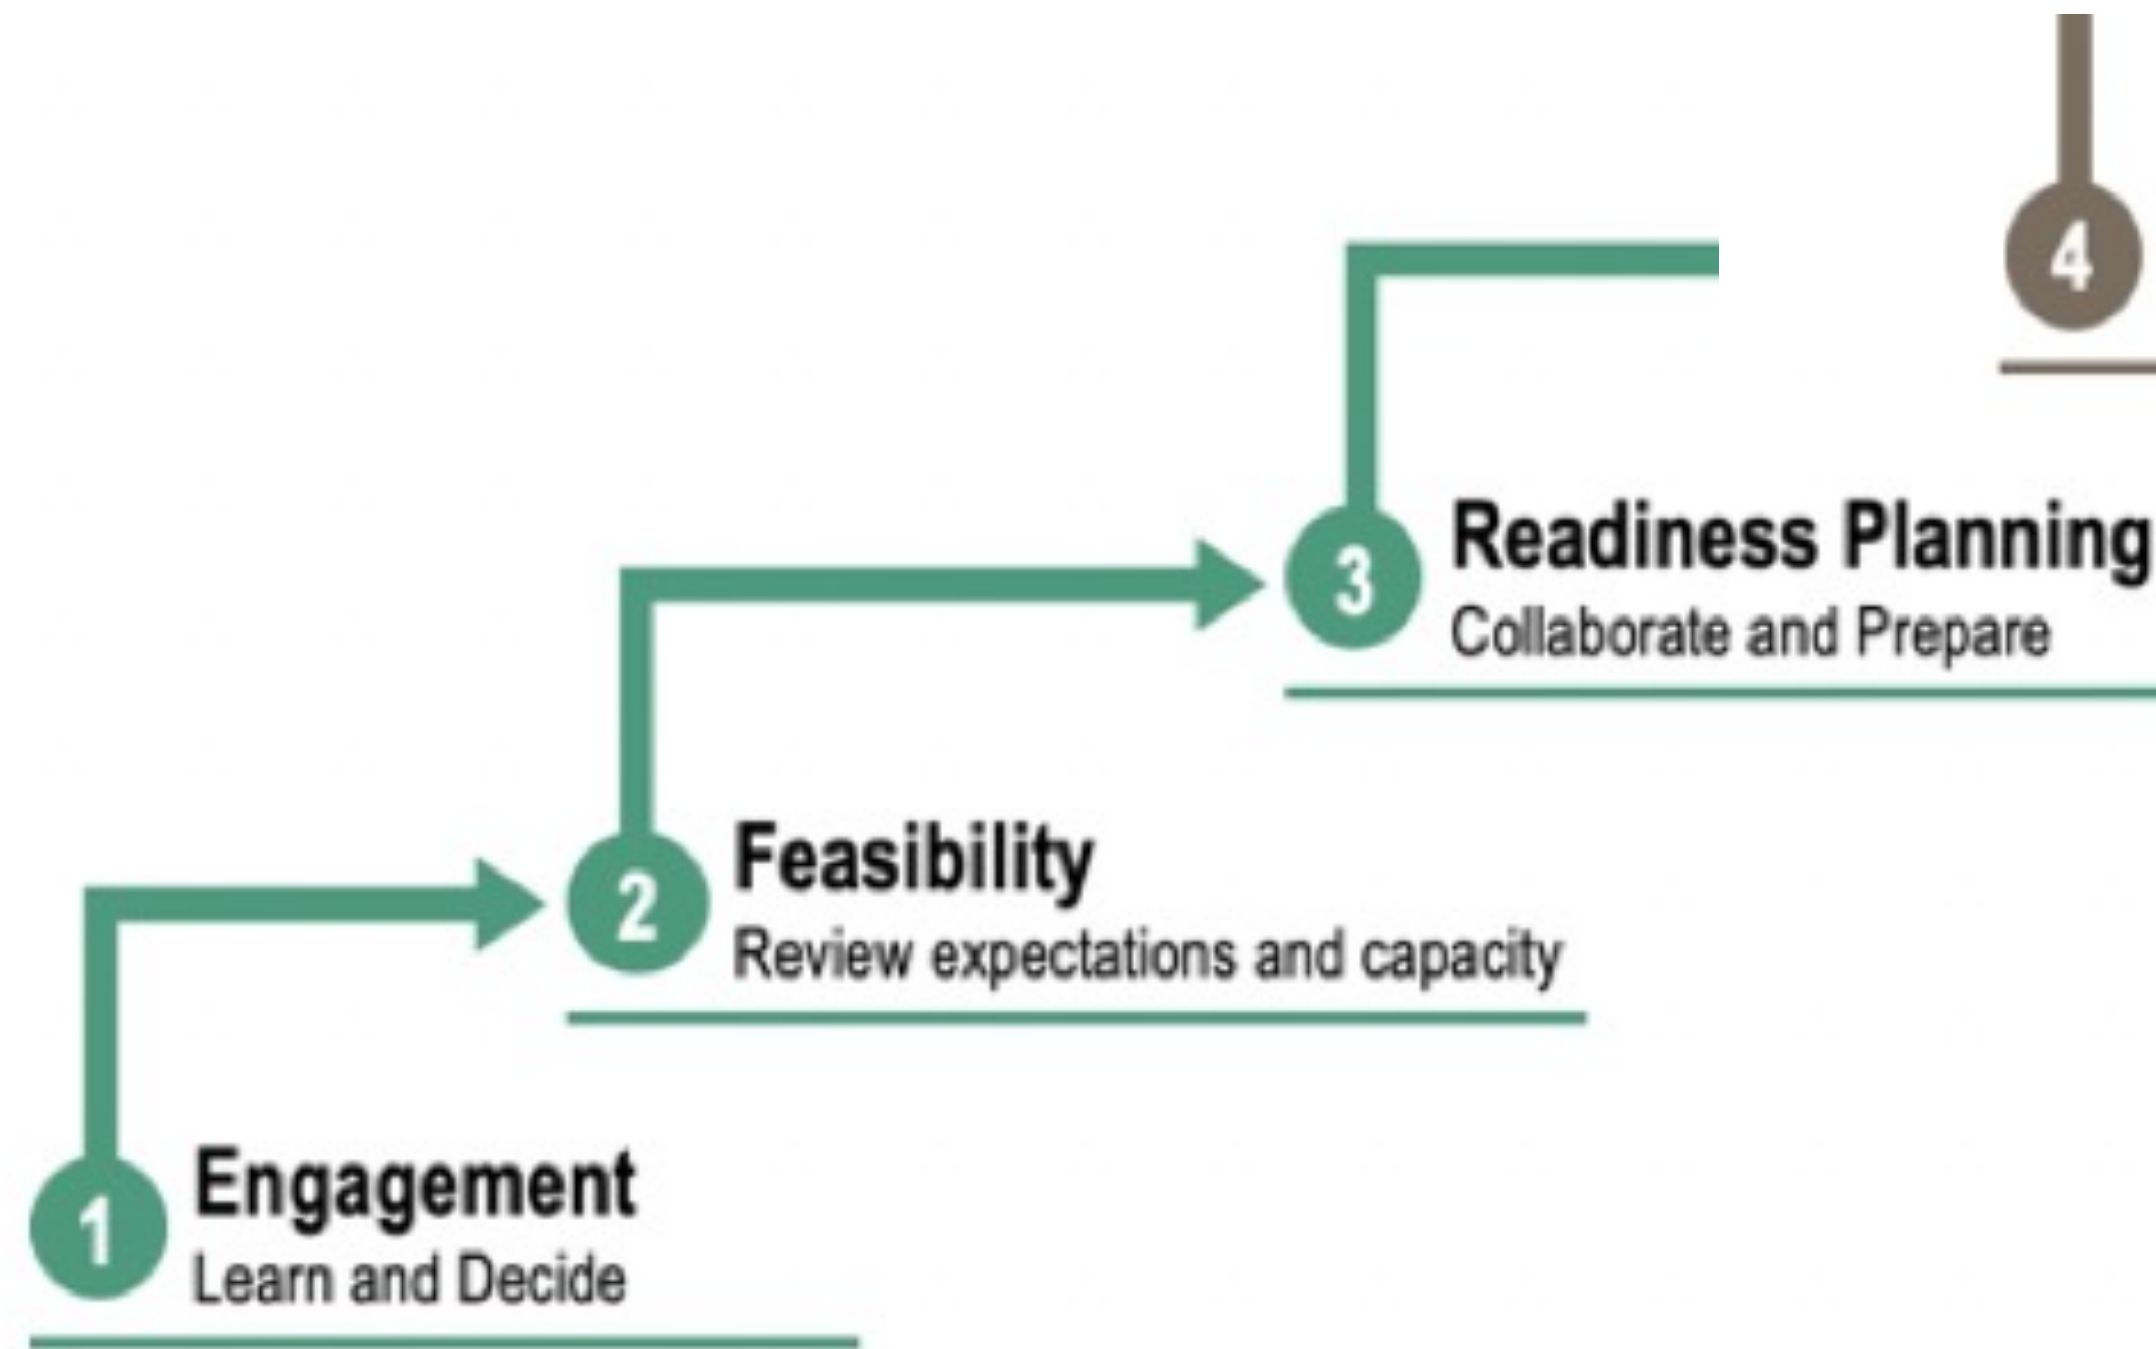

Fig. 2 The CONSORT diagram of sites implementing an evidence-based practice showing rates of achieving (1) competency, (2) 2-year sustainment post-program start-up, and (3) 2-year sustainment post-competency

Original $N = 1,778$

STRONG PRE-IMPLEMENTATION FIDELITY

Presents the Greatest Opportunity to Move the Needle on Successful Implementations
to Promote Equity in Receipt of EBP

CUSTOMIZING OR TAILORING A SIC

- Operationalizing the Implementation Process
 - Collaborative and Iterative
 - Defining "Completion" of Implementation Activities
 - Defining Decision Rules for Validity Checks
 - Comparing Skeletal SIC with Reality and Making Adjustments
 - Program onto the SIC website and Training
-
- 80+ Adaptations/Customizations across multiple service sectors feeding into SIC Repository

MISSING DATA TYPES

Truly Not Completed

Expansion Team

Not Applicable

Completed-Date Unknown

A word cloud consisting of the phrase "Missing Data" repeated multiple times. The text is rendered in various colors including red, blue, green, yellow, and purple. The words are oriented in different directions, some horizontally and some at angles, creating a dynamic and abstract visual effect.

HOW DO I PICK MY STRATEGIES?

WHAT ARE THE CONDITIONS OF IMPLEMENTATION?

- Site Demographics
- Urban vs Rural
- International or Domestic
- Service Sector
- Population Being Served
- Funding Source
- Policy Mandated
- Expansion Characteristics if Applicable

CONSIDERATIONS FOR DEFINING IMPLEMENTATION ACTIVITIES

Reading

Stages of Imp

The readiness process is all about getting the “n” other components of the implementation process monitoring intervention fidelity.

Some **typical roles** that might be involved in the

- **EBP developer:** the researcher or group
- **EBP purveyor:** the group who provides
- **Program champion for the site:** the s
- **Implementation coordinator:** the liais
- **Agency or organization director:** the leader or lead

The Stages of Implementation Completion (SIC) lists readiness activities that are common across many types of implementations. Although not all activities are present or relevant for each implementation, these are the most common activities across all different implementation types.

For each activity, in the “considerations” section, complete the following:

1. **Name:** the activity for your implementation.
2. **Definition:** What does this mean for your implementation process?
3. **Function:** Why is this activity important for your implementation?
4. **Roles:** Who is needed (internal and external partners) to complete this activity?
5. **When:** When in your readiness process does the activity need to be completed?
6. **Action:** What are the steps you can take to ensure you're ready?

For each activity, in the “considerations” section, complete the following:

1. **Name:** the activity for your implementation.
2. **Definition:** What does this mean for your implementation process?
3. **Function:** Why is this activity important for your implementation?
4. **Roles:** Who is needed (internal and external partners) to complete this activity?
5. **When:** When in your readiness process does the activity need to be completed?
6. **Action:** What are the steps you can take to ensure you're ready?

implementing site as a whole

FIRST STEP IN IMPLEMENTING

Stage 1. Engagement

Site is informed/learns services/program available

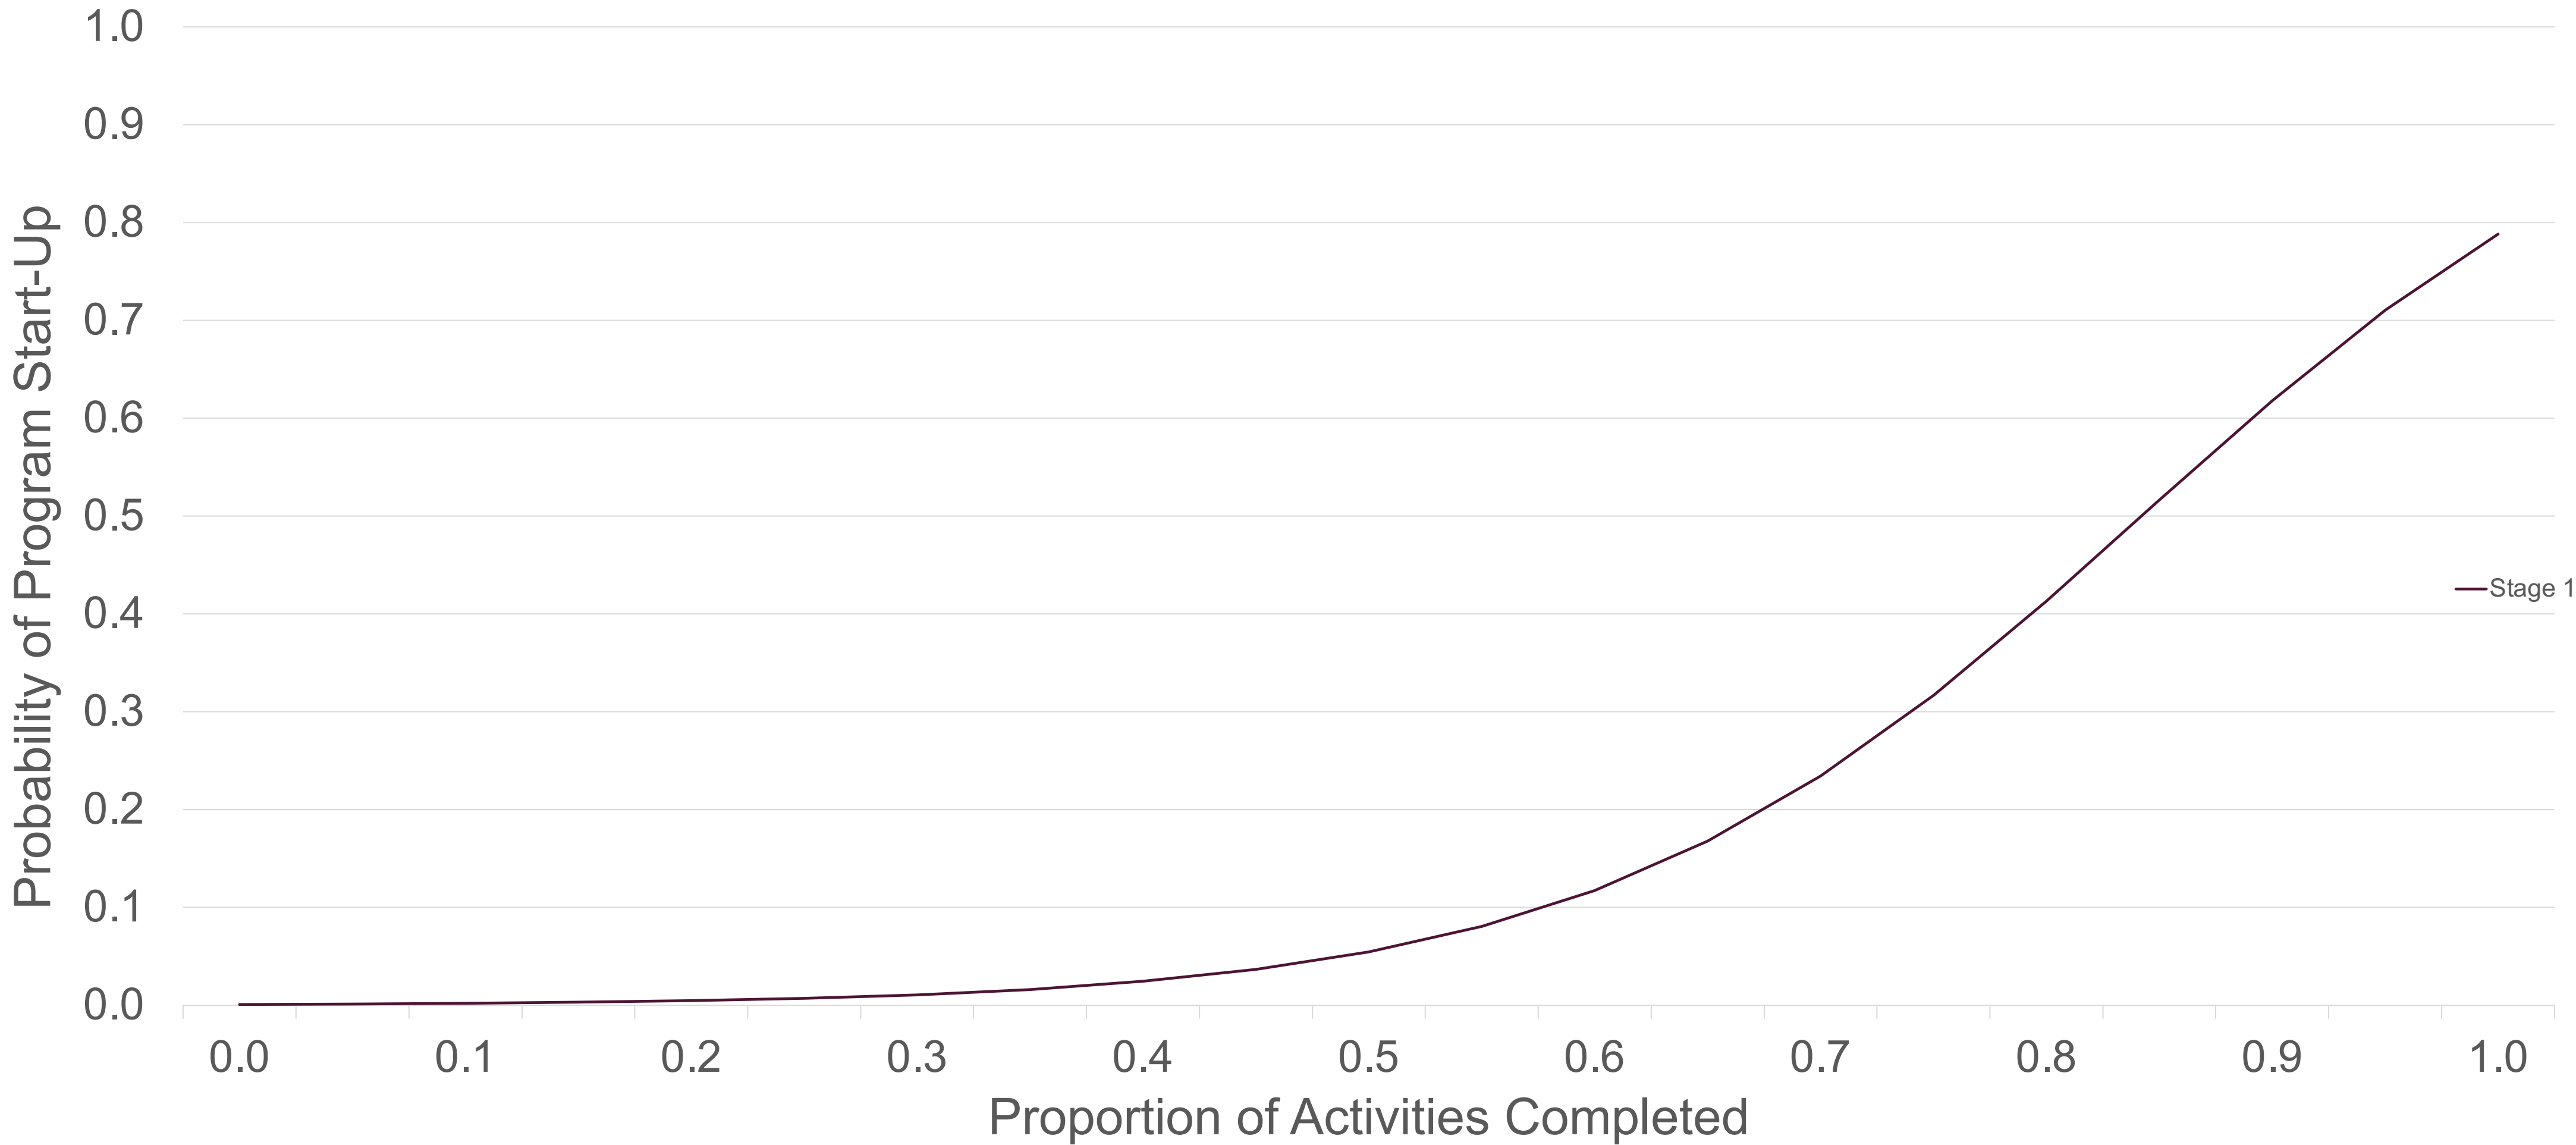

Site indicates interest

Site initially agrees to try implementation

Initial cost/resource information sent

STAGE I: ENGAGEMENT

IS THE IMPLEMENTATION FEASIBLE IN THIS CONTEXT?

Stage 2: Consideration of Feasibility

Site planning contact

Community Partner Feasibility Session

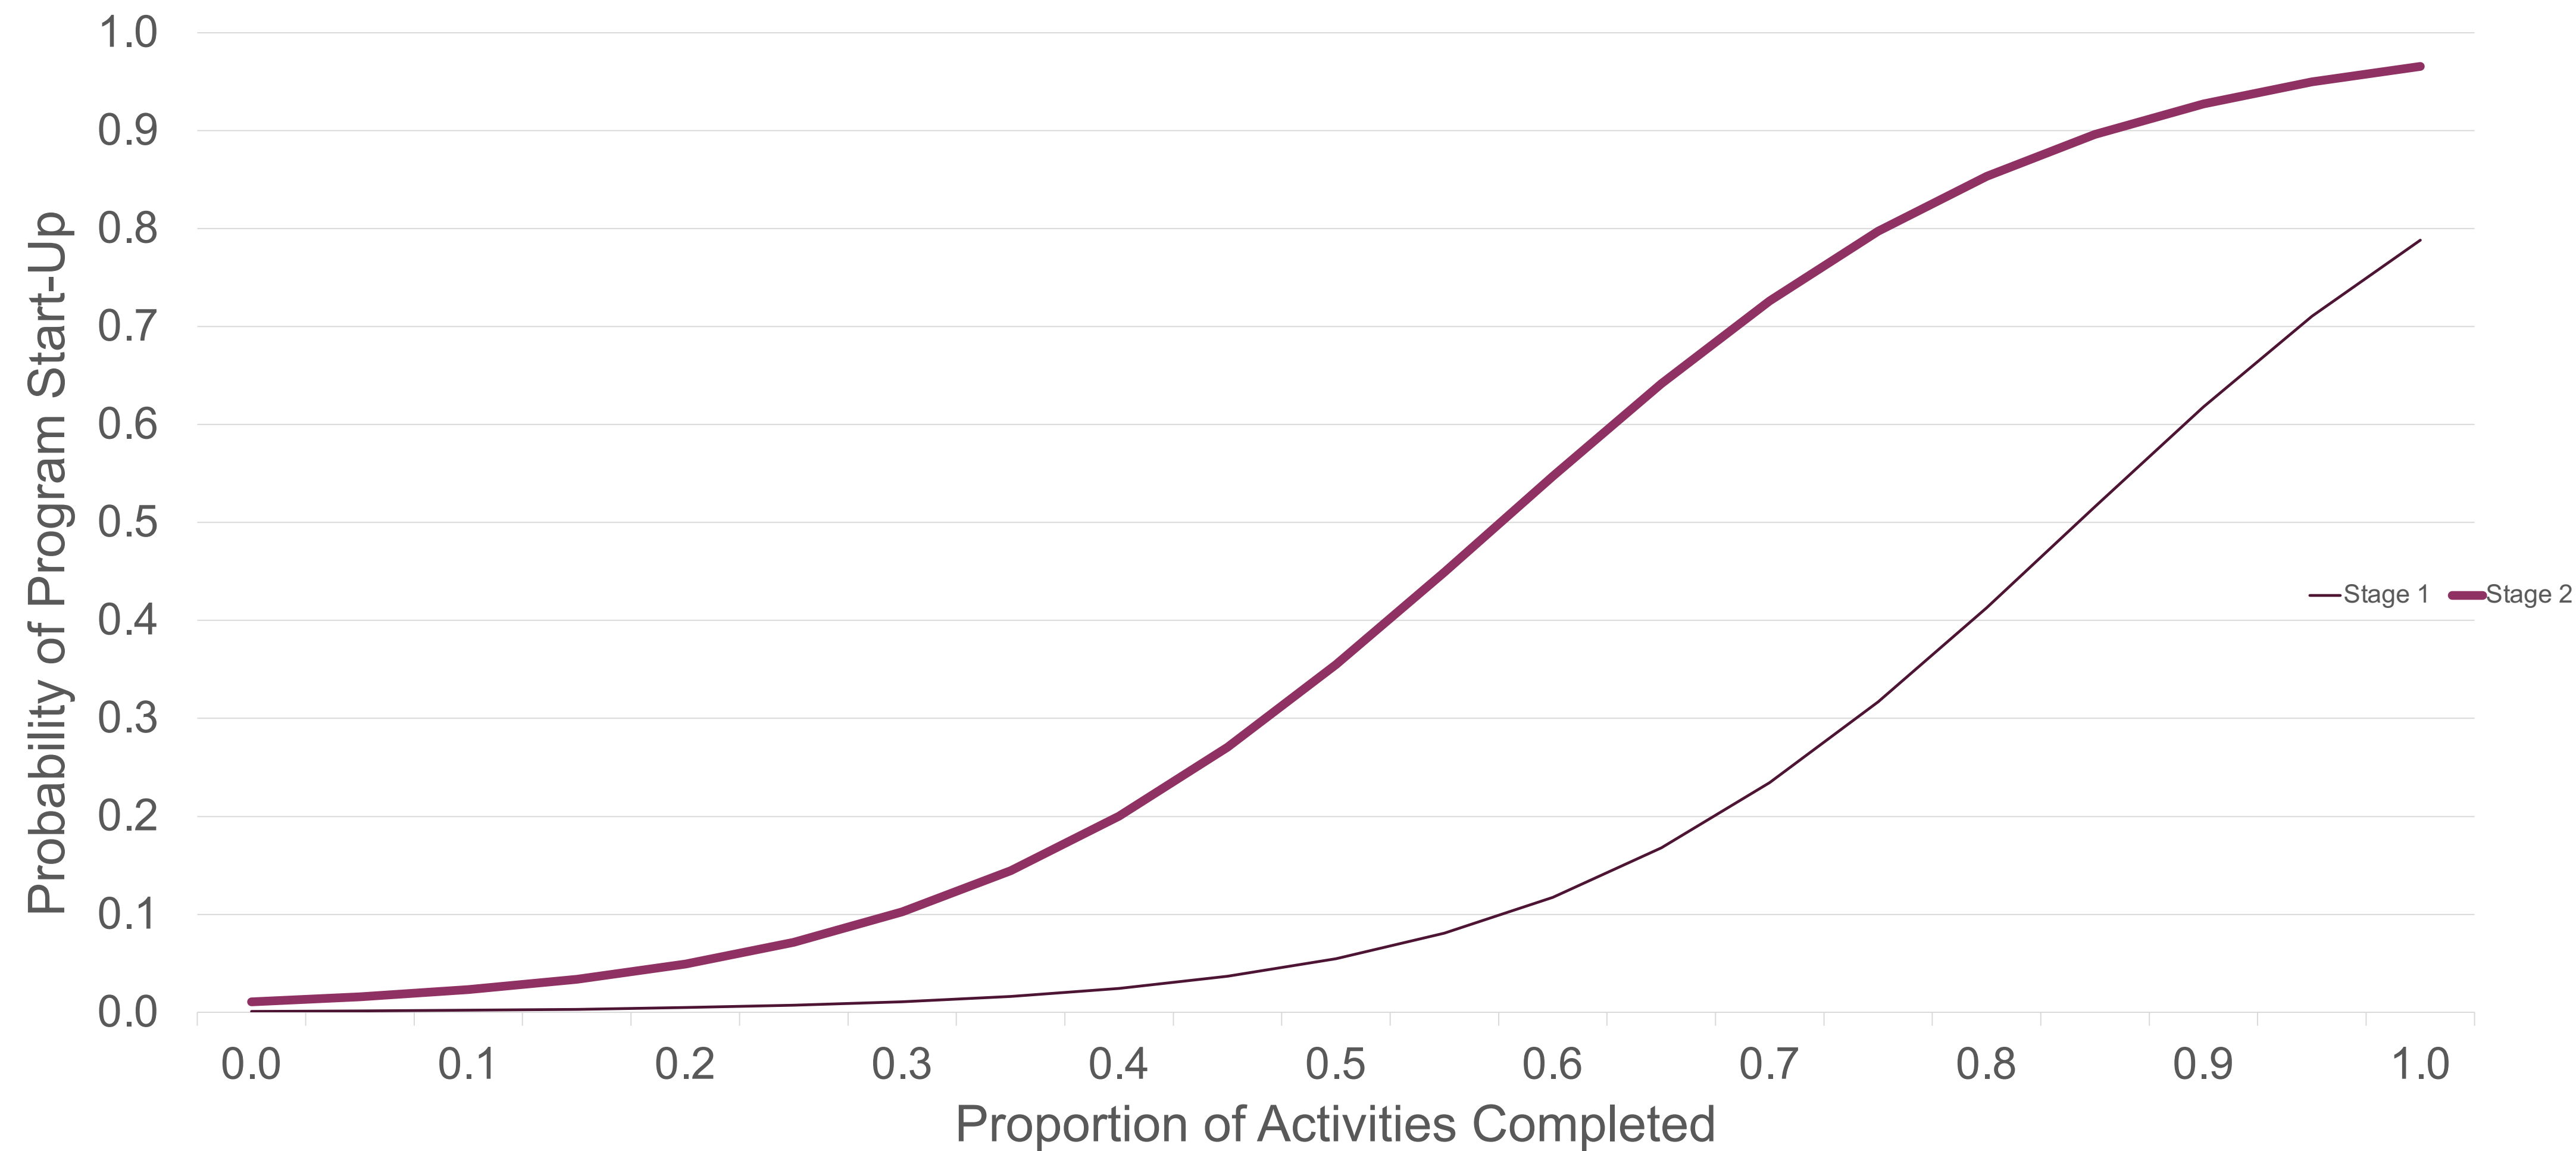

Assessment of Feasibility to Do All Components

Program Champion Identified

STAGE 2:ASSESSING FEASIBILITY

I,287

ESTABLISHING READINESS

Readiness Planning

Funding Plan – Short and Long-Term

Staffing – Hiring and Sequencing

Secondary Staffing – Recruitment and Support

Referral Criteria and Recruitment Plan

Communication Plan Finalized

Community Partner and Leadership Meeting

Written Implementation Plan Completed

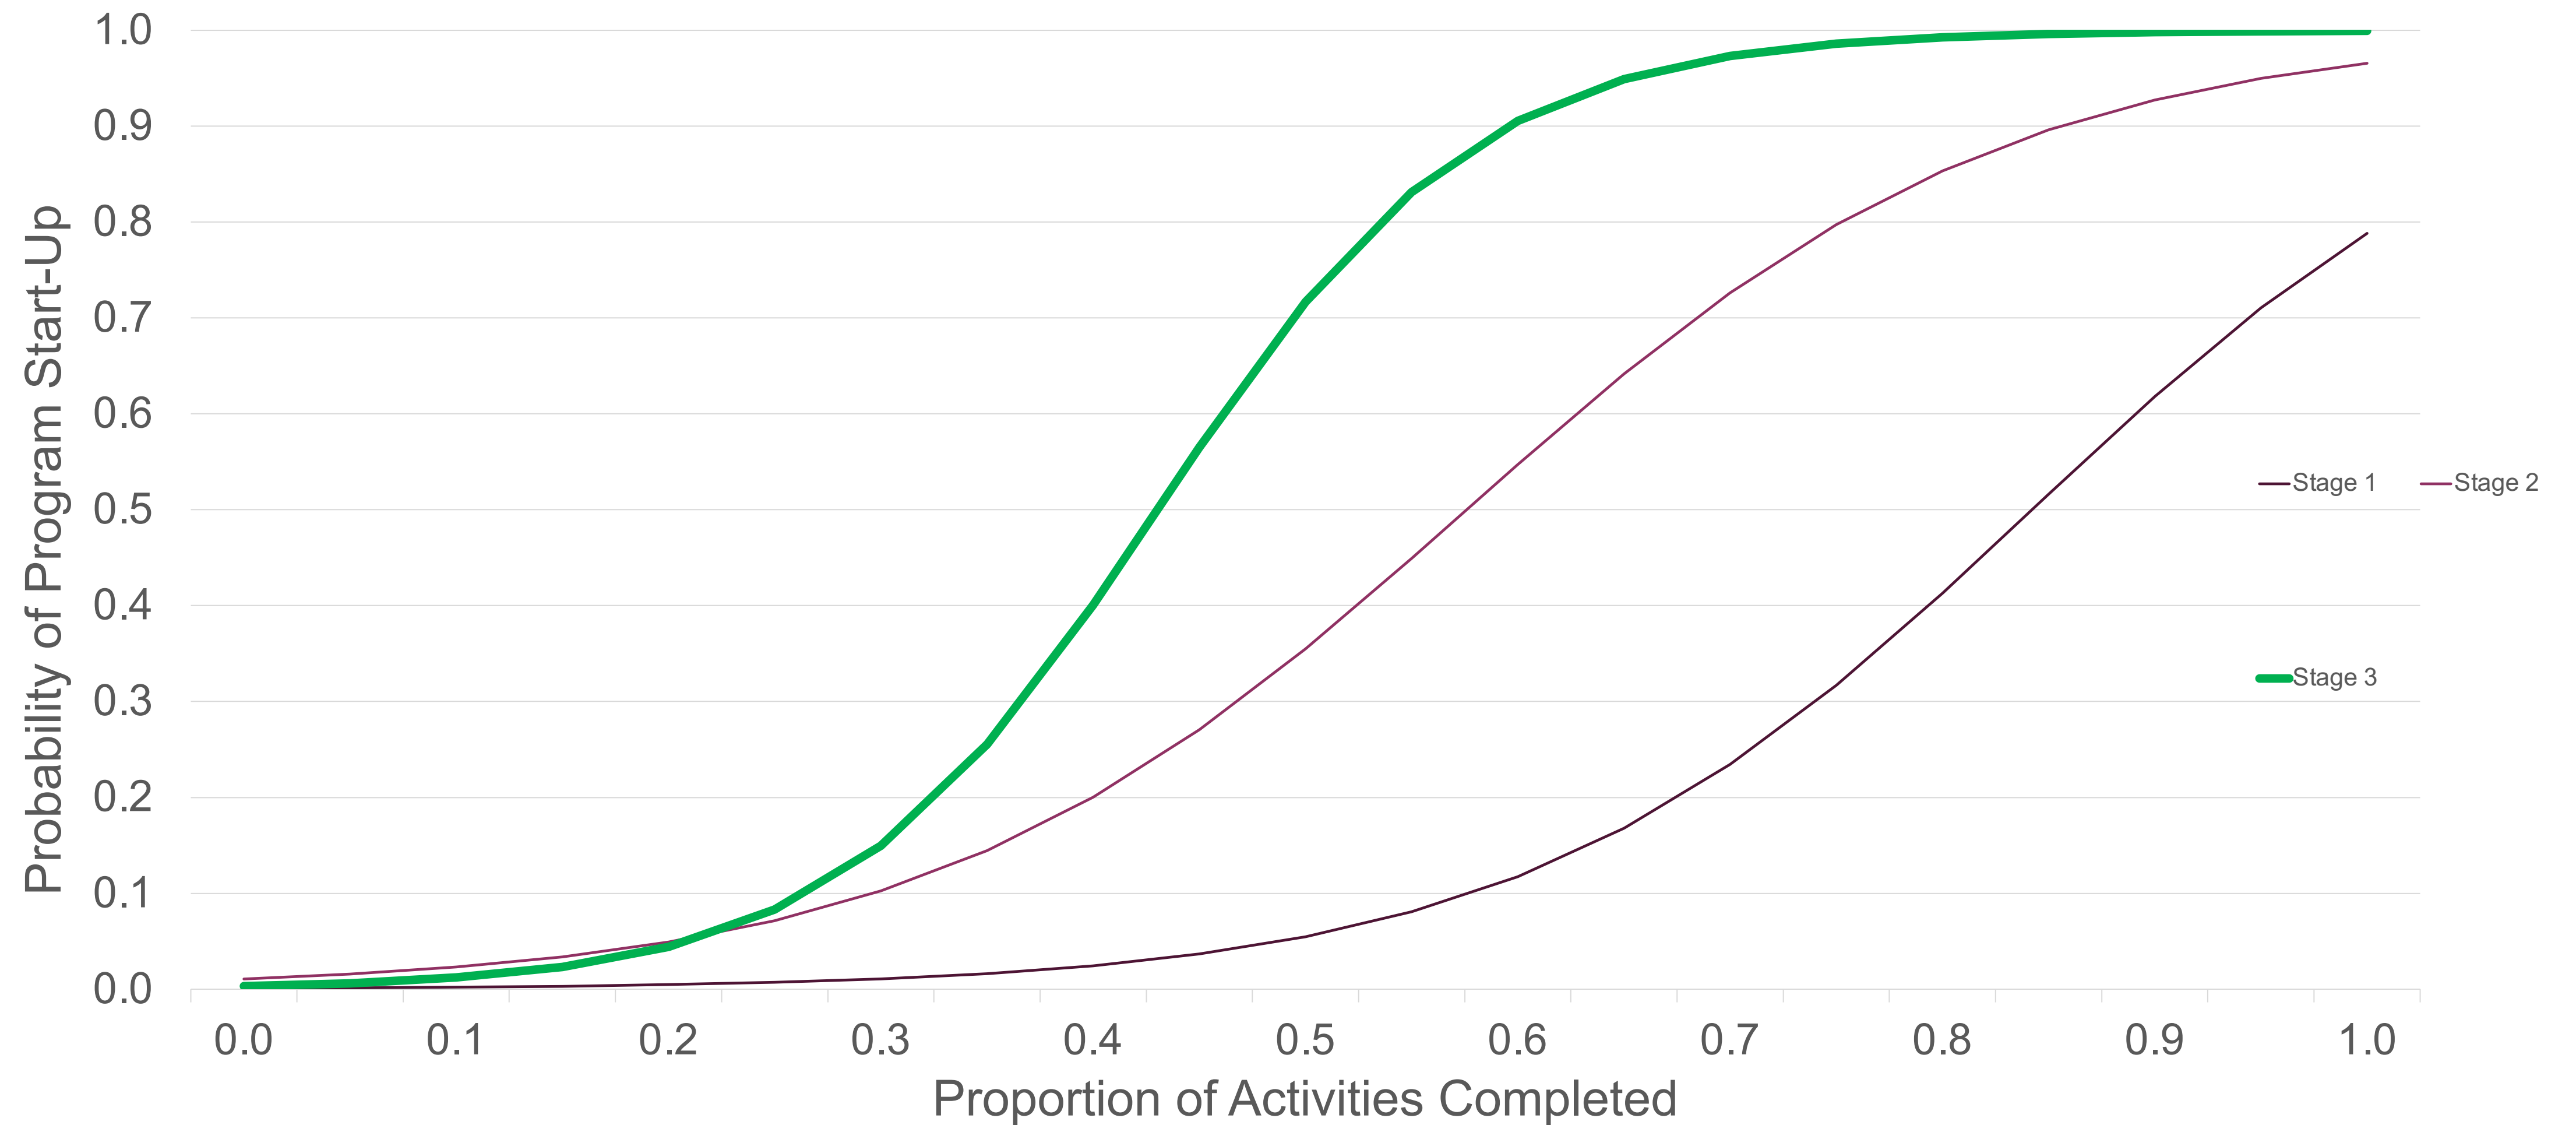

Service Provider Identified

Contracts, MOUS, DUAs Completed

Site Receives Initial Intervention Materials

STAGE 3: READINESS

1,287

BUT WE KNOW...

Not All Programs That Launch Sustain

COMBINATION OF PROPORTION AND DURATION MATTERS

Across 8 EBPs in Different Service Sectors

Certified sites (n=70)

Discontinue (n=214)

PRE-IMPLEMENTATION AND IMPLEMENTATION BEHAVIOR PREDICTING COMPETENCE FOR SUSTAINMENT

Alley et al. Implementation Science

(2023) 18:30

How You Get There Can Look Different

Predicting Program Start-Up

Example of a site that hits 80% by 2 months and continues at a steady pace

Note: No sites hit 80% probability prior to 2 months. This is the “fastest” successful pace available

And You Can Recover

Predicting Program Start-Up

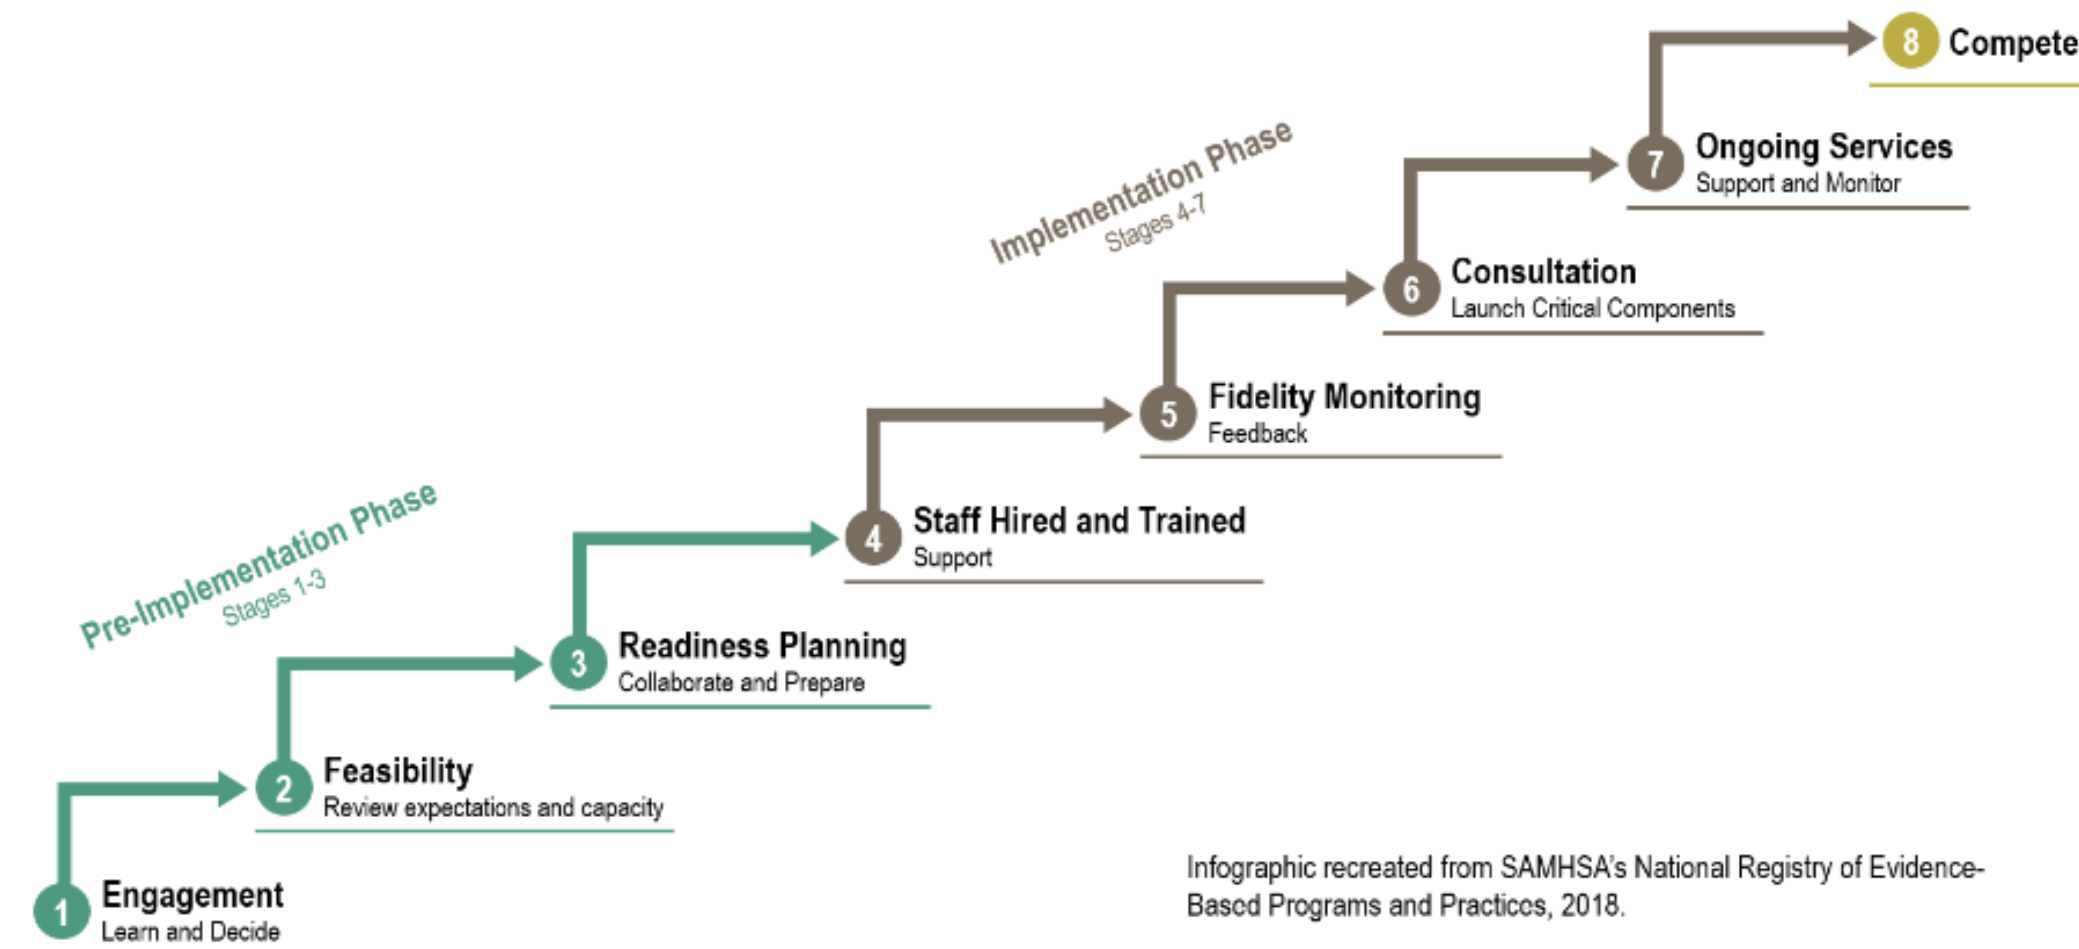

Example of a site that hits 40% by 2 months, then stalls out.

Eventually probability of successful launch starts to decrease. To correct for this, must jump-start -- must have high proportion and consistent movement through completion of pre-implementation

Resources

What is the SIC?

The Stages of Implementation Completion® (SIC) is an eight stage tool of implementation process, implementation, and initiation of sustainment. SIC scores have predicted variations in implementation progress.

Pre-Implementation and Implementation Progress Indicators

These indicators, located on the Teams List (or widget) page, can help gauge your team's (or site's) implementation progress.

The Progress Indicators offer two types of information:

- 1) At-a-glance proportion and duration values.
- 2) Color progress indicators of how this implementation compares to other implementation efforts that reached competency (SIC Stage 8) when those efforts were at a similar point in their implementation.

The color indicators answer the following questions:

Proportion: "Compared to sites of a similar age (i.e., duration) and reached competency, how many activities has this site completed?"

Too little completed

Somewhat too little
or
too much completed

Proportion is about right!

Duration: "Compared to sites that completed a similar number of activities (i.e., proportion) and reached competency, what is the pace of activity completion for this site?"

Too slow
or
too fast

Somewhat too slow
or
too fast

Duration is about right!

THE IMPLEMENTATION PATH CHOSEN IMPACTS RESOURCES

COMMON PRE-IMPLEMENTATION COSTS

- Engagement phone calls with purveyor/developer
- Community Partner meeting (person hours and travel)
- Identifying Program Champion
- Establishing program feasibility (securing funding; determining billing) and associated documentation
- Organizational readiness process (Agency buy-in across levels; Leadership established) and associated documentation
- Establishing Referral Connections and Developing Referral/Screening Protocols

COMMON IMPLEMENTATION COSTS

- Staff Hiring
- Training (not provided by EBP)
- Fidelity Monitoring Systems (e.g., IT tools– computers, video, audio; Service subscriptions– call centers, web-based systems)
- Clinical Supply Costs (e.g., incentives, supplies)
- Travel Costs (both for trainings and for intervention)
- New Additional Overhead Costs
- Increased Organizational Support (e.g., IT, Reception)

COMMON SUSTAINMENT COSTS

- Ongoing and Recursive Implementation Costs
 - Community Partner Meetings
 - Referral Refreshers
- Booster Trainings or Consultation
- Turnover Costs
- Re-training, Re-engagement

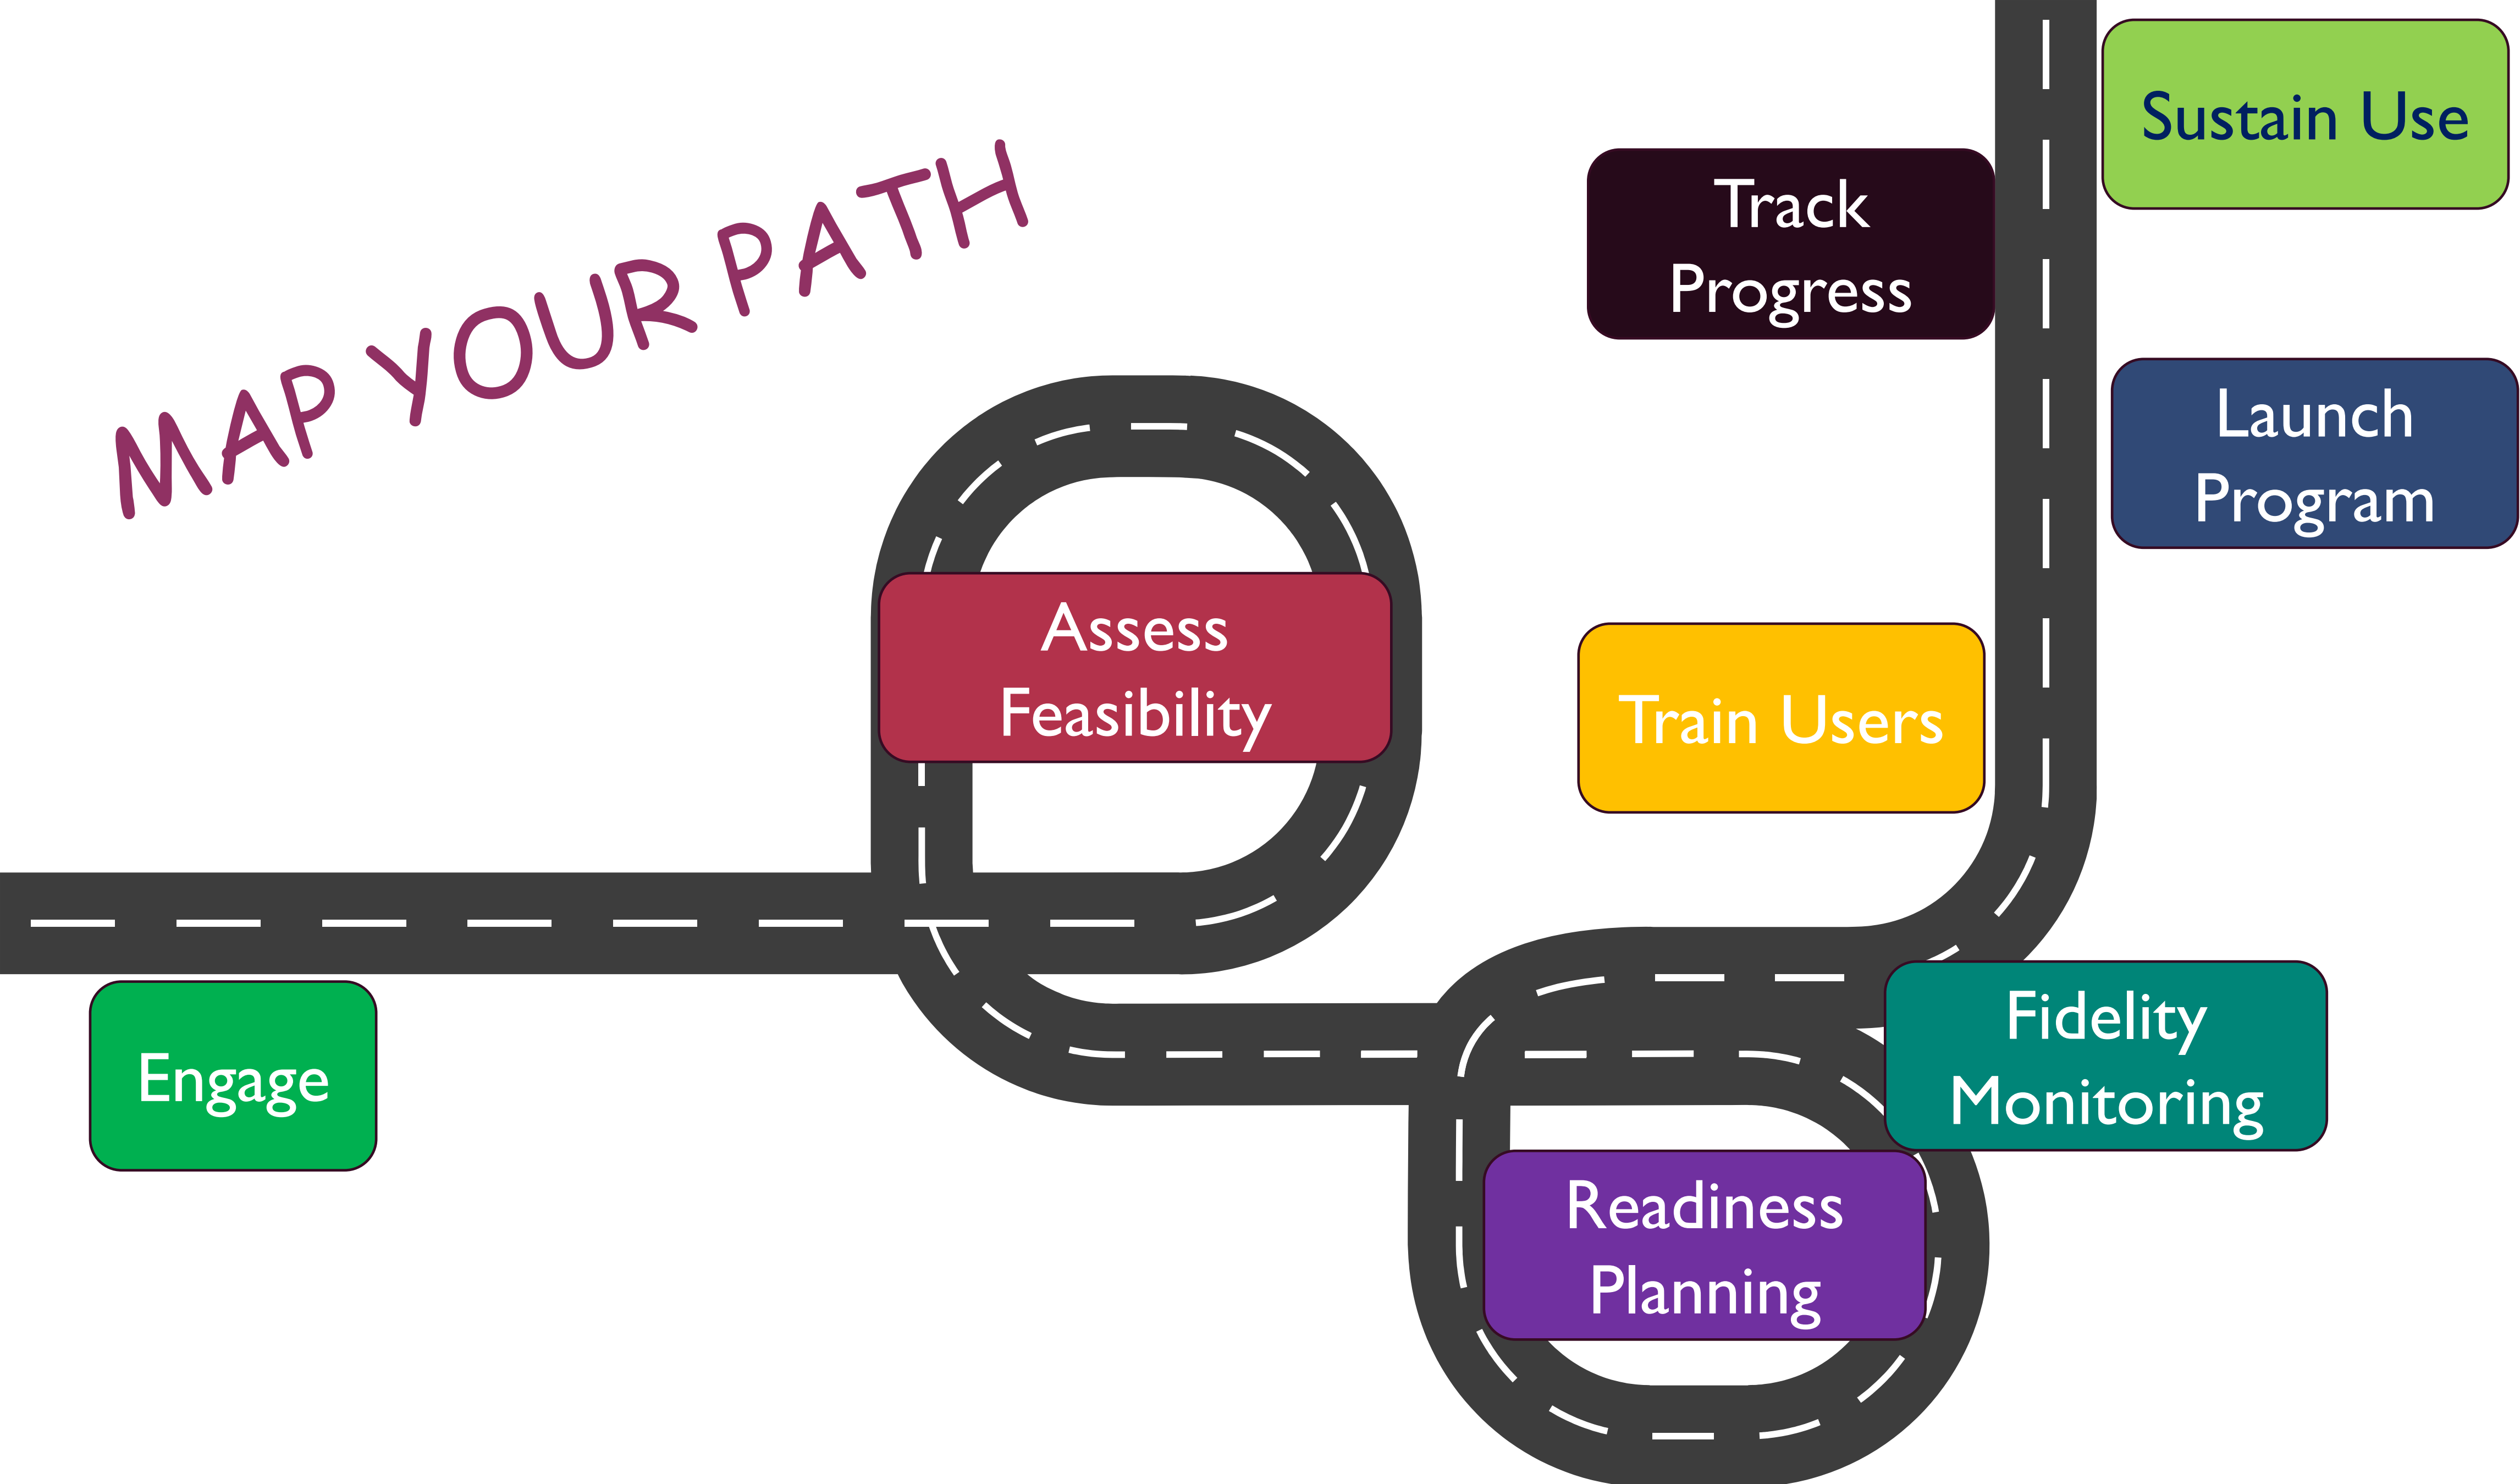

CONCLUSIONS AND NEXT STEPS

- The SIC is a measure of implementation fidelity across the full implementation process.
- Strong implementation fidelity considers "what" you do and "how" you do it.
- Facilitating strong implementation fidelity within new contexts and under unique environments, such as those targeted to address underserved populations, has the potential to facilitate implementation success and increase equitable access to EBPs.
- Purposeful selection and timing of implementation activities/strategies can help support an efficient and expected process, increasing the chance for a resource-intentional implementation.
