Building and Managing an Effective Research Program

Presented by

Stephen Dewhurst, PhD

Professor of Microbiology and Immunology
Vice Dean for Research

Jill Halterman, MD, MPH

Professor of Pediatrics
Executive Vice Chair, Department of Pediatrics

Monday, April 12, 2021 | 4:00 p.m. – 5:30 p.m.

<https://urmc.zoom.us/j/99778722256>

Developing an effective research program is a key aspect of success for junior faculty. In this session, Drs. Stephen Dewhurst and Jill Halterman, with experience in preclinical and clinical research, respectively, will join us to share their insights into developing a research program. Topics will include hiring of staff (research coordinators, lab technicians, etc.), setting expectations of the lab research culture, and day-to-day management of a research program, including virtual management techniques.

The last half hour will be available for networking with JFBRA members.

To register for this session: <https://forms.gle/yjq7CUPrwYDqzWzeA>

The URSMD Junior Faculty Biomedical Research Association (JFBRA) is an academic peer group designed to serve the unique needs of early-stage Ph.D. and M.D. faculty to promote our success in scientific discovery, funding, publications, mentoring, teaching and service to the University of Rochester and the greater Rochester community. For more information or to be added to the JFBRA distribution list, please contact the JFBRA Co-directors or email faculty_development@urmc.rochester.edu
