POST-DOCTORAL RESEARCH FELLOW
Two positions are available immediately for outstanding candidates in the broad area of cell biology and immunology. Our NIH-funded projects study dynamic T cell migrations during immune reactions in live cells or animals using state-of-the-art optic microscopy systems including multiphoton intravital microscopy.

Applicants should have strong practical knowledge of T cell biology and mouse disease models. Candidates with prior experience in transgenic- or knock-out/knock-in mouse models or tumor immunology are especially encouraged to apply. A highly competitive salary and benefits package are offered. Good command of English is required.

To apply, send a letter of application, CV and the names of three references to:

Minsoo Kim, Ph.D.
