

## Postdoctoral Fellow - Human Vestibular Perception

A postdoctoral research position is available at the University of Rochester within the Vestibular Perception and Spatial Orientation Labs. This fully funded position will join a team of research staff, students, and faculty in Otolaryngology, Neuroscience, and Biomedical Engineering.

The successful candidate will be expected to focus on one or more of the following areas:

- Vestibular spatial perception
- Vestibular reflex adaptation
- Multisensory self-motion perception
- Locomotion in virtual reality

Minimum Requirements and Competencies:

- PhD in a field relevant to one of the focus areas listed above
- Research and laboratory skills and experience
- Programming skills (MATLAB, LabView, Python)
- Analytic skills
- Organizational skills
- Strong team ethic
- Attention to detail
- Effective communication skills
