

A Post-Doctoral Position is available in the Yu Lab at the University of Rochester Medical Center in Rochester, NY.

Applicants should hold a PhD or MD/PhD degree(s) and have expertise in molecular or cellular biology to study one of many ongoing projects: Nonsense suppression by RNA-guided RNA modification. Although not required, a computational or RNA biology background would facilitate the project. Interested individuals should submit a complete curriculum vitae.

The successful applicant will join a very motivated and collaborative team to execute basic and clinically related research. There are excellent opportunities to collaborate with basic scientists and clinicians. In addition, the Yu lab has a strong track record of success in training post-docs or staff scientists for academic and industry positions.

Applicants should email a cover letter, CV, and contact information for references to yitao_yu@urmc.rochester.edu
