

No matter where we're from, what language we speak, or our economic status, we all need health care. One of the most rewarding aspects of your career will be working with patients of all cultures and backgrounds. The Office of Medical Student Enrichment Programs (OMSEP) provides student programs to further enrich their educational experience beyond the formal curriculum and elective pathways, with a means to strengthening their ability and readiness to practice medicine. OMSEP serves as a resource to bridge URSMD with local, national, and international communities.

RESEARCH PROGRAMS

Offering our students diverse year-out or summer research experiences locally, nationally, or internationally is at the cornerstone of URSMD's mission to create experiences that complement our student's varied interests. Students can conduct research in several areas including: Basic, Clinical, Translational Science, International Medicine, Medical Humanities, or Community Research.

INTERNATIONAL ELECTIVES

URSMD medical students in Phase 3 or Phase 4 are able to participate in international electives at any of the institutions listed below. Students are also able to complete international electives at other institutions/organizations of their choosing.

- Jagiellonian University Medical School (Krakow, Poland)
- National Taiwan University Medical College (Taipei City, Taiwan)
- Universidad de Navarra Facultad de Medicina (Pamplona, Spain)
- Universidad Nacional Mayor de San Marcos Facultad de Medicina San Fernando (Lima, Peru)
- Universidad Nacional de San Agustín de Arequipa (Arequipa, Peru)
- Seoul National University College of Medicine (Seoul, South Korea)
- Royal College of Surgeons - Ireland

STUDENTS OF ROCHESTER OUTREACH (SRO)

Offers medical students the ability to work with the community of Rochester to better support and provide opportunities to individuals from all different backgrounds and lifestyles. These groups are primarily led by medical students or a URSMD faculty member.
