

WHO WE ARE

Rochester's Double Helix Curriculum begins its 25th year in 2023. This integrated curriculum includes the Primary Care Clinical Clerkship that begins in March of the first year of medical school and includes much of the ambulatory medicine taught in Family Medicine, Medicine, and Pediatrics in the first two years of medical school. Most medical schools do not begin their clerkships until the latter part of the second year or the beginning of the third year of medical school.

OUR MISSION

The University of Rochester School of Medicine & Dentistry is dedicated to training future physicians who excel and become leaders in their profession. This goal is met by fostering the knowledge, skills, attitudes, and behaviors of the physician/scientist/humanist by combining cutting-edge, evidence-based medical science with the relationship-centered art that is Rochester medicine's distinctive trademark.

BIOPSYCHOSOCIAL TRADITION

Rochester's BPSM tradition fosters the knowledge, skills, attitudes, and behaviors of the physician-scientist-humanist by combining cutting-edge science with the relationship-centered art that is medicine's distinctive trademark. Our holistic view of the patient within the larger context of who they are (age, gender, ethnicity, faith, socioeconomic, culture, family and community) informs Rochester's approach to wellness and illness. Rochester is proud to be known as the "liberal arts of medical schools" because of our small classes and our focus on the "art and science" of medicine.

RESEARCH FUNDING

Total funding this last fiscal year for faculty in the School of Medicine and Dentistry was about \$300 million. This places us in the top quartile of medical schools nationally, despite the fact that URMC is among the smallest of this elite group of schools. Our School of Nursing ranks in the top third in NIH funding among our nation's nursing schools.
