

Glaucoma Specialists

Due to continued clinical and academic growth, the University of Rochester Flaum Eye Institute is recruiting faculty across all the sub-subspecialties. We currently have an opening for glaucoma specialists at the Junior and senior levels, including service chief. Applicants should be graduates of an accredited ophthalmology residency program having completed a Glaucoma fellowship. Junior level candidates should be board certified or board eligible. Senior-level recruits having an interest in clinical, translational or basic research are encouraged to apply. All positions include generous start-up packages commensurate with experience.

- Walk into established clinical and surgical volumes
- Opportunity for participation in clinical and scientific research including access to leading glaucoma scientists and *in vivo* models of disease
- Potential involvement to collaborate in research using the world's preeminent armamentarium of adaptive optics scanning laser ophthalmoscopes
- Support from and the opportunity to teach within a growing residency program
- Administrative and technical staff invested in your success and world-leading diagnostic imaging professionals
- State-of-art facilities and opportunities to practice at modern satellite locations

The [University of Rochester Flaum Eye Institute](#) is a nationally recognized center for patient care, education and research in ophthalmology founded on the principles of collaboration and continuous learning. Flaum Eye Institute has a strong history of being at the forefront of clinical innovation and offers faculty the opportunity to interact with thought leaders in optics and every discipline of visual science imaginable through the University of Rochester.

[Rochester](#) is at the center of a dynamic region encompassing the [Finger Lakes](#), [Western](#), and [Central New York](#).
