## COURSE DESCRIPTION

Advanced Trauma Care for Nurses (ATCN) is an advanced course designed for the registered nurse interested in increasing his/her knowledge in the management of the multiple trauma patient. The ATCN course is taught concurrently with the American College of Surgeons (ACS) Advanced Trauma Life Support® course (ATLS).

The nurse participants audit the ATLS lectures.

During the ATLS skill and testing stations, the nurses are separated from the physician group and directed through ATCN skill stations. The Skill Stations are based on an interactive "hands-on: scenario-based approach" to adult education. The practical testing stations allow the ATCN students to demonstrate the application of ATLS and ATCN information on a moulaged patient. Participants receive both ATCN and ATLS manuals.

## COURSE OBJECTIVES

At the completion of this course, the participant will be able to:

- Articulate the principles of the primary and secondary surveys
- Establish management priorities in trauma activation
- Demonstrate skills used in the initial assessment and management of the patient with multiple injuries

## ACCREDITATION STATEMENT

17.5 contact hours are provided by the Society of Trauma Nurses

The ATCN program verifies successful completion of the ATCN course and provides continuing education for completion of a course. ATCN and STN do not certify or credential nurses.

## Course Schedule

DAY 1
WELCOME & INTRODUCTION
OVERVIEW OF ATLS / ATCN COURSE
INITIAL ASSESSMENT& MANAGEMENT INTERACTIVE DISCUSSION
AIRWAY & VENTILATORY MANAGEMENT- INTERACTIVE DISCUSSION
SHOCK - INTERACTIVE DISCUSSION
