Kim Bielicki, RN, BSN, CCRN
RN Trauma Registrar
ECMC ACS Level I Trauma Center
kbelicki@ecmc.edu

COURSE DESCRIPTION

Advanced Trauma Care for Nurses (ATCN) is an advanced course designed for the registered nurse interested in increasing his/her knowledge in the management of the multiple trauma patient. The ATCN Hybrid course utilizes components of the American College of Surgeons (ACS) Advanced Trauma Life Support® course (ATLS). The nurse will independently complete 13 on-line modules which have replaced the ATLS interactive discussions. This permits the learner to advance at their own pace. After completion of the on-line modules, learners will proceed to their registered course site to complete the skills and testing portion of the program. The Skill Stations are based on an interactive "hands-on: scenario-based approach" to adult education. The practical testing stations allow the ATCN students to demonstrate the application of ATLS and ATCN information on a moulaged simulated patient. Participants will receive both ATCN and ATLS manuals.

COURSE OBJECTIVES

At the completion of this course, the participant will be able to:

- Articulate the principles of the primary and secondary surveys
- Establish management priorities in trauma activation
- Demonstrate skills used in the initial assessment and management of the patient with multiple injuries

ACCREDITATION STATEMENT

19 contact hours are provided by the Society of Trauma Nurses

The ATCN program verifies successful completion of the ATCN course and provides continuing education for completion of a course. ATCN and STN do not certify or credential nurses.

Course Schedule

Online mATLS Course Module Outline:

- Module 0: ATLS Overview
- Module 1: Initial Assessment and Management
- Module 2: Airway and Ventilatory Management
- Module 3: Shock
