

Arie Weinstock, MD

Department of Neurology
UB MD Neurology, Oishei Children's Hospital

Dr. Weinstock joined the Department of Neurology and the University at Buffalo in July 1998 with the goal to develop the EEG and pediatric epilepsy program. Prior to that time, he completed residencies in Pediatrics at the University of Tel-Aviv and at Rainbow Babies Case Western University, as well as fellowships in Child Neurology and in Epilepsy and Clinical Neurophysiology at the Cleveland Clinic Foundation.

Dr. Weinstock currently serves as Director of the Division of Child Neurology, the Epilepsy Monitoring Unit as well as the EEG laboratories for Kaleida Health. He was promoted to Professor in Clinical Neurology in March 2014 and served as the main instructor for EEG and Epilepsy for neurology residents and clinical neurophysiology fellows, and mentored numerous residents and fellows for research projects.

His interests in child neurology and epilepsy have focused on management of refractory epilepsy in children, epilepsy surgery and EEG. He is board certified in child neurology, clinical neurophysiology and epilepsy.

Dr. Weinstock's main research is related to the diagnosis and management of refractory epilepsy and epilepsy surgery. He has been the site investigator for many Pharma and NINDS sponsored studies on novel anti-epileptic drug therapies, particularly as they relate to pediatric epilepsy, and was the PI of various investigator initiated studies. He is passionate in the education of epilepsy and EEG and guiding medical students, neurology residents and clinical neurophysiology fellows into their careers while promoting the field of epilepsy.
