

TRAUMA CARE DOESN'T STOP AT THE ED DOORS. WHY SHOULD TRAUMA EDUCATION?

Program Description

Unlike trauma education programs targeted at prehospital and emergency care providers, the Pediatric Care After Resuscitation (PCAR) course is specifically designed for acute care, critical care, and perioperative nurses who primarily work with children.

This pedi-specific version of the TCAR course is a live, 2-day program that gives inpatient bedside care providers the foundational, evidence-based information and critical thinking skills necessary to meet regulatory requirements and provide excellent care to this challenging patient population.

RATHER THAN UNIT-SPECIFIC PSYCHOMOTOR COMPETENCIES, THE PCAR COURSE EMPHASIZES KNOWLEDGE ENHANCEMENT AND CLINICAL REASONING SKILLS.

A TRAUMA FUNDAMENTALS COURSE DESIGNED FOR INPATIENT NURSES

Program Overview

PART 1

Participants focus on concepts relevant to the nursing care of the injured, hospitalized child:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

PART 2

Learners apply information from Part 1 by participating in interactive expanding case scenarios that focus on the care of hospitalized children with injuries to various body regions. Cases include the surgical, medical, and nursing management of patients with:

- Thoracic injury
- Abdominal injury
- Musculoskeletal injury
- Craniocerebral injury
- Spine & spinal cord injury
