

Activating Appointment Registration URLs (Web Links) in CDMS

1. After creating an Operation and creating a schedule or schedules for a specific date or dates, the Registration Schedules screen will list all Operation dates.
2. Once Operation schedules have been created, the Operation and registration links can be activated.
3. Click on the Activate Operation & Registration Links tab.
4. Click on the Activate Operation button. 
5. Registration links are created enabling registration for appointments for the Operation.
 - The **Operation Registration Link** URL allows registration for any date within the Operation
 - The **Operation Registration Date Links** allow registration for only the date corresponding to that link
 - The **Operation Registration Kiosk Links** allow registration for only the date corresponding to that link but with NO appointment time selection. This URL is used for walk-in registrations - DO NOT release this URL outside your organization.
