

ASPR

Lesson Six – Delivery Site Warehouse Setup

SNS Learning Team
January 27, 2019

Learning Objectives

At the end of this lesson, participants will be able to:

- Design the delivery site warehouse floor space for receiving, storing and shipping
- Organize the delivery site warehouse to receive SNS assets, including areas for receiving, storing, and shipping

Saving Lives. Protecting Americans.

ASPR

Organizing the Warehouse Floor

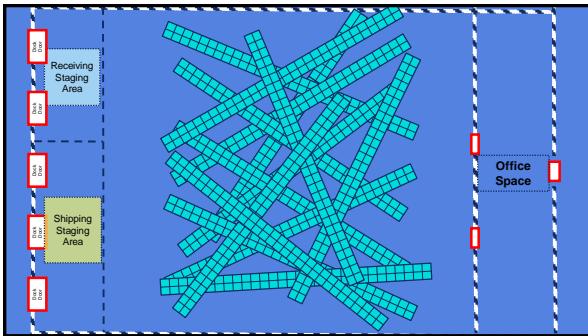

Why?

Why mark and organize the warehouse floor?

ASPR

Saving Lives. Protecting Americans.

4

Why?

- A warehouse full of items you cannot find serves no purpose!
 - You need to be able to mark locations spaces for both palletized and containerized products
 - You need to number each location so item locations on the floor, match with item locations in the inventory management system
 - You need to incorporate 10-foot aisles to allow two way pallet jack traffic

Palletized Products

- Palletized products may include:
 - DSNS-provided items
 - State purchased items
- Use 48" x 48" for planning
 - Pallets usually 40" x 48" – but use 48" x 48"
 - Pallet requires 36 sq ft (including half of the 10-ft aisle space)
 - Antiviral pallets vary in size
 - Each pallet is a location, that must be reflected in your inventory management system,

Containerized Products

- Floor marking planning figures
 - Containers from 60.625" to 66 inches (5.5 ft.) wide
 - Containers from 43" to 48" (4 ft.) deep
 - Each container requires 49.5 sq. ft. including aisle space (5.5 x 9)
 - 130 containers require 6,435 square feet (49.5 x 130) – NOT including staging and admin areas

Storage Area Numbering

- Postal numbering - Evens on one side, odds on the other
- Sequential numbering - Up one aisle and down the next aisle - Preferred!
- Containers are color coded and numbered

Marking the Warehouse Floor

Marking the Warehouse Floor – Snap String

Marking the Warehouse Floor – Engineer Tape

Marking the Warehouse Floor – Towing Straps

Marking the Warehouse Floor – Lasers!

Marking the Warehouse Floor

Pallet depth marking template – ten foot aisles

Image created by Richard Bishop, DNR RSS Course Manager

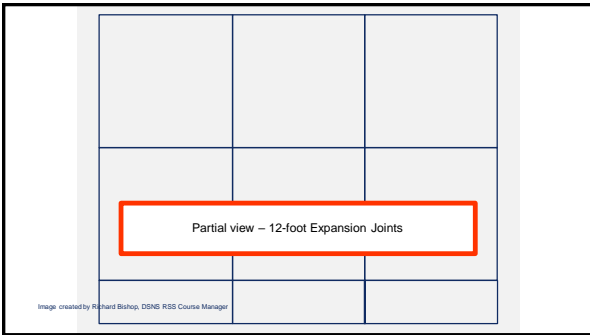

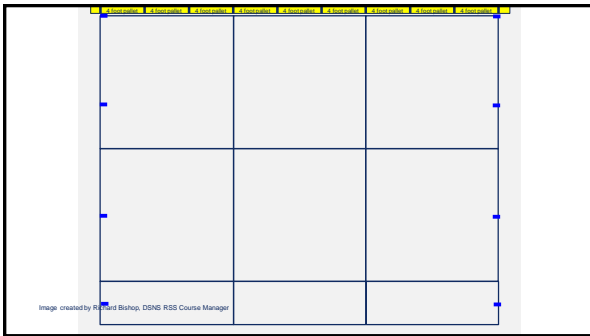

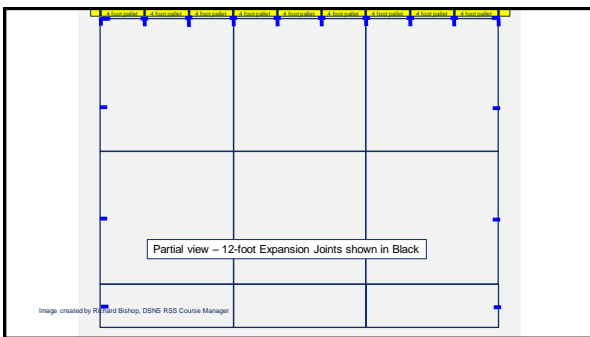

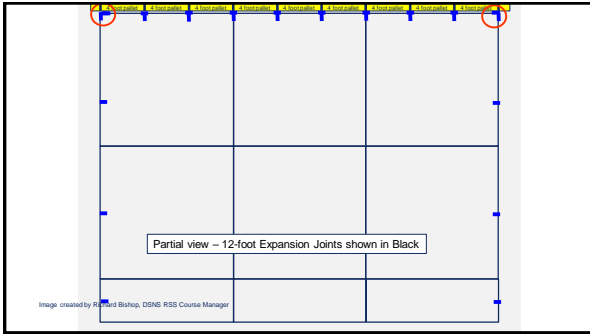

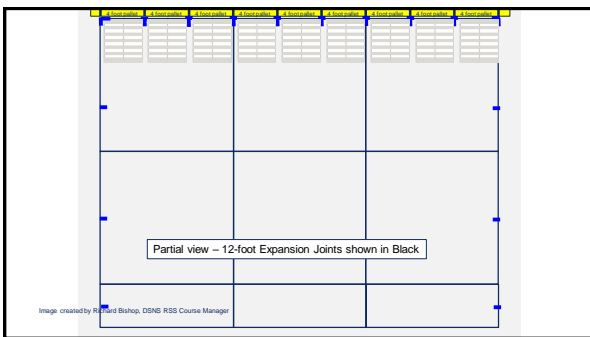

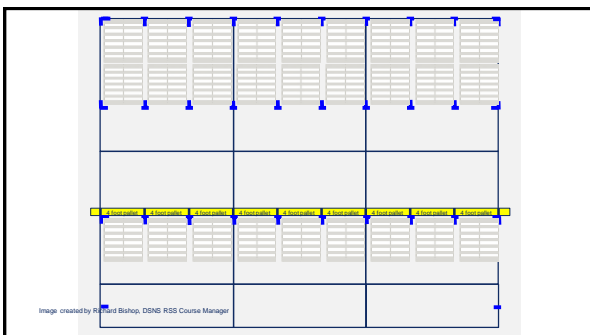

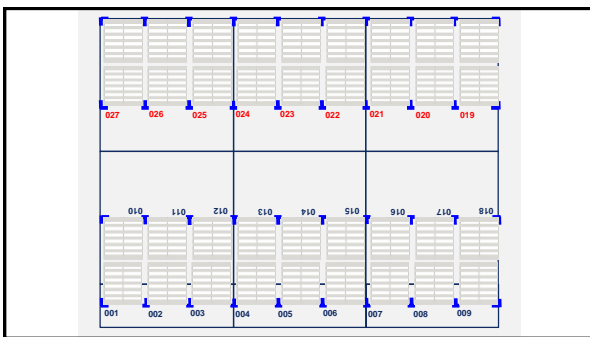

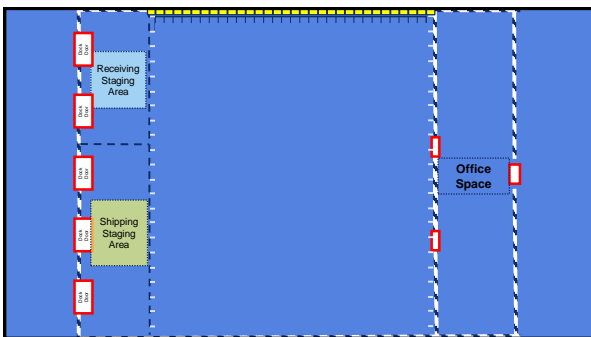

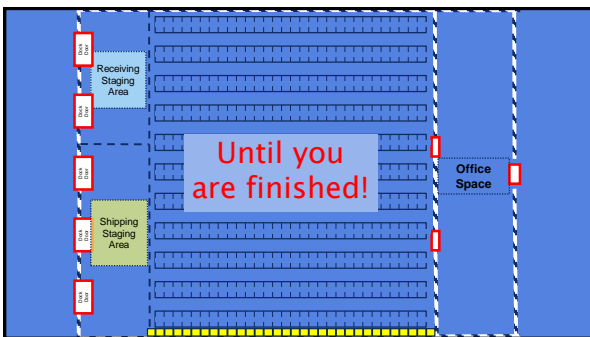

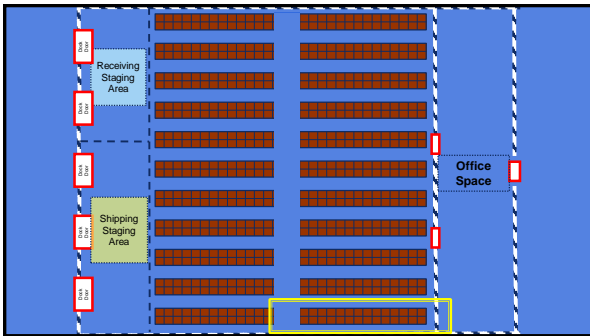

The slide features the ASPR logo at the top left, which includes the text 'ASPR' and 'ADVANCED SURVEILLANCE PROGRAM' around a stylized eagle. The main title is 'Summary'. Below the title are four icons representing different software features: 'TurningPoint' (a tablet), 'PowerPoint Polling' (a pie chart), 'Anywhere Polling' (a laptop and a person), and 'Self-Paced Testing' (a computer monitor and a calculator).

A single 12-hour Push Package container, **including aisle space**, requires how many square feet? (Choose one)

- 1. 16
- 2. 36
- 3. 49

A single pallet, **including aisle space**, requires how many square feet? (Choose one)

- 1. 16
- 2. 36
- 3. 49
