

Evacuation of Facilities In Disaster Systems

Link to recorded CTI-502 Training Session from December 2018

Background:

The eFINDS application is the Health Commerce System (HCS) platform for tracking evacuee movement. eFINDS captures minimal amounts of data, and allows facilities to track the evacuees as they move to other facilities, facility types or temporary shelters. This information is shared in real time with HCS authorized users statewide.

eFINDS is a role based application, therefore, the HCS Coordinator will need to assign the appropriate HCS users to the eFINDS Reader (for LHDs & NYSDOH ROs), or the facility eFINDS Data Reporter or eFINDS Reporting Administrator role. A key component to the success of this system is training of staff within facilities. It is vital that all facilities ensure an adequate number of staff are trained in the use of eFINDS equipment and the eFINDS system should the need arise to use it.

Purpose of Training:

This course is an instructor led webinar demonstration. At the end of the training session, the participant will be able to:

- List the new statuses in eFINDS 3.0 and the corresponding actions and buttons used to update the status.
- Determine which report to select to review certain data about an operation, a facility or person, and which reports can be exported.

As an **Evacuating/Sending** facility

- Determine best method to register people and update their statuses to Evacuated, SIP or Repatriated.

As a **Receiving** facility

- determine the best method to receive people from an evacuating facility, and update their status to Received, Repatriated Initiated or Will Not Repatriate.

Target Audience:

- Hospitals
- Non-acute Facilities
- Local County Health Departments
- NYSDOH Regional Offices

To Register for Scheduled Live webinar:

Click <https://www.nylearnsph.com> and enroll in the NYSDOH Learning Management System (LMS) for course number is CTI-502.
