

**CYNTHIA L. ANGEL, MD**

## **WHAT IS AN ENDOWED PROFESSORSHIP?**

*Endowed professorships are permanent funds that honor acclaimed leaders who perform groundbreaking research, mentor Ph.D. candidates and early- and mid-career faculty, and help us attract talented fellows, medical students, and residents. They recognize and foster faculty excellence, and are both the highest distinction the University can bestow upon its faculty as well as a vote of confidence in the faculty who receive them. Professorships also serve as a powerful recruitment tool, drawing new faculty of established merit from around the world. They are, therefore, a philanthropic priority across the entire University.*

## *A Legacy of Exceptional Care*

For more than 35 years, Cynthia L. Angel, MD has been providing outstanding care to women with ovarian and other gynecologic cancers at the University of Rochester Medical Center.

Known for her skills not only as an expert clinician, but also as a compassionate provider and advocate who guides women through diagnosis, surgery, treatment, and follow-up care, Dr. Angel exemplifies “Medicine of the Highest Order.” She is thoughtful in her approach, reassuring as an advocate, and gives women the best possible patient experience at a devastating time in their lives.

**With your help, our goal is to establish an endowed professorship for \$1.5 million—a lasting tribute for the life of the University of Rochester—to support world-class clinicians and providers like Dr. Angel and their numerous contributions to patient care.**

It would be a privilege for the Division of Gynecologic Oncology to have its first endowed professorship be inspired by a physician who cares so tirelessly for the women in Upstate New York, connects them with survivors, and helps them focus, long-term, on quality of life. An endowed professorship will also ensure that future generations of leaders in gynecologic oncology build on Dr. Angel’s incredible legacy of saving lives and continue her same high standard for life-changing care. The endowed professorship will also stand as a lasting tribute to you, the donor, as a forward-thinking benefactor who has provided an ongoing source of inspiration for women who will benefit forevermore from professors’ care.
