

GENERAL DENTISTRY

HANS S. MALMSTROM, D.D.S.

CHAIR AND PROGRAM DIRECTOR,
GENERAL DENTISTRY

Dr. Malmstrom's significant clinical and research interests focus on comprehensive care and restoring the comfort, appearance, and function of the mouth in patients with missing or damaged teeth. The recipient of numerous awards, in 2005 he became a Member of the American College of Dentists, and in 2013, he received the Eastman Institute for Oral Health Iranpour Award for Excellence in Clinical Education.

"The distinguished General Dentistry Residency Program came to life under the watchful guidance of Dr. Stanley Handelman. His mentorship and friendship have been integral to shaping my career, and his legacy as the father of postdoctoral general dentistry education will have a profound impact on residents for generations to come."

—Dr. Hans Malmstrom

Leading the World in General Dentistry Education

At the Eastman Institute for Oral Health (EIOH), our highly competitive, world-renowned Advanced Education in General Dentistry program has long been sought after to train dentists for future roles in research, academia, and practice. Today, our program remains unparalleled. Each year, hundreds of dentists from around the globe apply for less than two dozen positions.

Our residents train in all aspects of dentistry, working collaboratively with faculty in all dental fields to provide state-of-the-art patient care and research and educational advancements. For example, we now have an Advanced Faculty Development program—an educational partnership with the Simon Business School and the Warner School of Education—to supplement traditional dental education with business acumen and educational training.

Our program also emphasizes the importance of clinical research and the development of innovative ideas. As we look to the future, our goal is to be a world leader in clinical research, using the latest, evolving technologies, and improving and expanding opportunities for residents to network and present research in unprecedented ways.

We must recruit additional faculty to further develop our exceptional programs, fund clinical renovations, and consistently incorporate the latest technologies used in dental treatment. Your philanthropy will help us reach new heights in our pursuit of redefining the benchmarks by which the world defines dental education, research, and practice.

With your support, we can help people around the world by providing innovative resident oral health training and strengthen our curriculum in state-of-the-art facilities with the latest equipment and diagnostic tools.

Your gift will help us *Provide Training and Cutting-Edge Technology to General Dentists Worldwide*

100 years ago, George Eastman recognized the vital importance of good oral health and its relationship to your overall health. Today, your philanthropy can help us to proudly carry on George Eastman's legacy, continuing our significant impact around the world in research, clinical training, and helping the underserved and people with special needs. Join us today to make an impact in Rochester, the nation, and the world.

NAMING THE ADVANCED FACULTY DEVELOPMENT PROGRAM—Please inquire

With your gift to name the Advanced Faculty Development Program, we can recruit additional faculty, expand our enrollment, and become an international model for the training of dental professionals. This will provide residents, in perpetuity, with the skills they need to not only become exceptional dentists, but to effectively run a dental practice or a dental school, and learn how to educate other professionals and staff to excel in dental education, research, and care.

ENDOWED PROFESSORSHIPS—\$1,500,000 to \$2,000,000

Endowed professorships are permanent funds that honor acclaimed leaders who perform groundbreaking research, mentor junior faculty, and attract and retain talented fellows, residents, and students. Recognizing and fostering excellence, this is one of the most coveted and defining rewards a faculty member can receive. Professorships also serve as a powerful recruitment tool, drawing new faculty of established distinction from around the world.

ENDOWED FELLOWSHIPS—\$750,000

Fellowships provide significant work experiences for scientists to conduct in-depth research that advances oral health. These fellowships provide permanent support, allowing fellows to complete their training without having to devote time to working outside their field, or resorting to additional loans for support.

NAMING THE GENERAL DENTISTRY CLINIC—\$500,000

Your gift to name the General Dentistry Clinic at Eastman Dental will allow us to renovate the clinic and provide the very best resident training and patient care environment.

ENDOWED TECHNOLOGY FUND—\$250,000 to \$1,000,000

The field of dentistry is constantly evolving and changing to best suit patients' needs. Your support of an endowed technology fund will help us provide the latest technology to train our residents, and to provide safe, comfortable care to the patients we serve. Your gift would help add ever-evolving technologies such as scanners, CAD, cameras, and lasers to the armamentarium used in the treatment of dental patients.

RESIDENT EDUCATION FUNDS—\$50,000 to \$100,000

At the Eastman Institute for Oral Health, our general dentistry graduates become leaders in their field, having distinguished careers in academics and practice that encompass research, education and patient care. Our residents must have opportunities to travel in order to teach, to network among peers at professional conferences, and to present at scientific meetings; simply, to broaden one's horizons. Finding funds to consistently support these opportunities is a challenge. Your support will allow general dentistry residents to travel to educational meetings and international electives, and to support educational initiatives that could not be otherwise funded.

GEORGE EASTMAN CIRCLE—\$10,000 to \$50,000

Pledges to the George Eastman Circle of \$10,000 to \$50,000, payable for five years, provide crucial, flexible support for the General Dentistry program. Funds can help the program take advantage of new opportunities in research, support post-doctoral fellows for one year, or allow our Master's and Ph.D. students, and post-doctoral fellows to present their work at national scientific seminars and conferences and learn from mentors in the field of oral health.
